In addition to simple pain or sprains which result from overtraining, a new research found that doing excessive endurance exercise- especially during middle-age and beyond- could theoretically lead to unhealthy structural changes in the chambers of the heart.

1.The paragraph preceding this passage most probably discusses …… .

a) some adverse consequences caused by overtraining
b) the positive effect of overtraining on the body
c) pain and heart problem caused by overtraining
d) the adverse causes of overtraining

Approximately one in four Americans will suffer from a neurodegenerative disease, and virtually all Americans will have a family member with one of these conditions.
Unfortunately, the underlying mechanisms of neurodegeneration- and how they lead to disease- are not well understood.

2.The first sentence deals with the …… of neurodegenerative disease in America.

a) magnitude b) interactivity c) hazards d) treatment

Two different kinds of technology make up most of the telemedicine application in use today. The first is called 'store and forward', and is used for transferring digital images from one location to another when it is necessary. A digital image is taken using a digital camera (stored) and then sent (forwarded) by computer to another location. The image may be transferred within a building, between two buildings in the same city, or from one location to another, anywhere in the world. Teleradiology, the sending of x-rays, CT scans, or MRIs (store-and-forward images) is the most common application of telemedicine in use today. There are hundreds of medical centers, clinics, and individual physicians who use some form of teleradiology. When radiologists install computer technology in their homes, they can have images sent directly to them for diagnosis, and they do not need to make an **off-hours** trip to a hospital or clinic.

3.The paragraph following this text will most probably discuss ..... .

a) teleradiography in radiologists' homes b) instruction of 'store-and-forward' technique
c) improvements in image transfer technology d) another technology in telemedicine

---

For the latter, drugs such as nandrolone phenpropionate are used. The user develops larger appearing muscles, increased body weight, and body water, but reports on the effectiveness in improving performance have been conflicting. Many valid studies have failed to demonstrate any improvement in performance.

4.Based on the writer's concluding remarks, ...

a) ergogenic substances can be harmlessly used by athletes
b) ergogenic substances lead to substantial improvement in performance
c) there is controversy on the possible impact of ergogenic substances
d) athletes' performance can be definitely attributed to the use of ergogenic substances

---

Having the "One Health approach" in place facilities understanding the co-benefits, risks, trade-offs and opportunities to advance equitable and holistic solutions. In the aftermath of the COVID-19 pandemic, we have an unprecedented opportunity to strengthen cross-sectoral collaboration, to increase policy coordination and coherence supported by a more systematic use of robust scientific evidence, and to promote the development of integrated indicators and safeguards to address upstream drivers of the disease, with a focus on prevention. These efforts will contribute to the prevention of future pandemics and help to build more resilient systems, environments, economies, and societies.

5.The author closes the passage with .....about prevention of future pandemics. (02)

a)futile actions b)uncertain remarks
c)suspicious comments d)optimistic attempts

Good social support also improves our ability to cope with stress. Simply disclosing our feelings to friends (or to a psychotherapist) has been shown to improve immune system functioning and reduce need for medical care. But there will be times when we cope ineffectively with stress. The trick of course, is to cope as effectively as possible and not worry too much about the rest.

6.The last sentence ..... its preceding one.

a) fails to address b) is identical to c) tends to challenge d) presents a solution to

---

Imagine that, instead, one of the overseas date entry people confused your records for someone with the same name who has a terminal disease. How many times will you get rejected for insurance because the company database shows you have a pre-existing condition?

7.The last sentence ..... the way people's insurance data is handled.

a) criticizes b) supports c) ignores d) favors

When teachers use picture books, they are simply continuing a long-established tradition that is accepted without question. And for the past two decades, illustrations in reading primers have become increasingly detailed and obtrusive, while language has become impoverished - sometimes to the point of extinction.

8.The last sentence of this reading selection indicates that the writer ..... .

a) is in favor of illustrations in reading primers
b) supports continuing traditional approaches
c) supports the use of modern teaching techniques
d) *is critical of* the contents of reading books

In the aftermath of the COVID-19 pandemic, we have an unprecedented opportunity to strengthen cross-sectoral collaboration, to increase policy coordination and coherence supported by a more systematic use of robust scientific evidence, and to promote the development of integrated indicators and safeguards to address upstream drivers of the disease, with a focus on prevention. These efforts will contribute to the prevention of future pandemics and help to build more resilient systems, environments, economies, and societies.

9.The author closes the passage with ……about prevention of future pandemics.

a)futile actions b)uncertain remarks c)suspicious comments *d)optimistic attempts*

The focus of the next campaign was polio, which can paralyze or kill its victims if it is untreated. The elimination of this disease is not yet complete, but the number of cases has greatly decreased. As the battles against smallpox and polio show, remarkable advances can be made in the field of public health.

10.The author of this text seems to be ..... the future of public health.

a) uncertain of b) critical of *c) optimistic about* d) indifferent to

---

Tele-surgery requires a network with high reliability, an acceptable transmission delay, the ability to transfer vast amounts of data, and low data error rates. Fortunately, telecommunication technology is advancing at an exponential rate, and with the development of both satellite and inexpensive land-based broadband capabilities, the future of Tele-surgery is very promising.

11.The writer of the passage above is …… .

a)*positive about the <u>future</u> of* Tele-surgery in light of rapid advances in technology
b) doubtful about the future of Tele-surgery due to high cost and challenges of telecommunication
c)positive that transmission delay and high data error will be covered up by the high reliability of the network
d)assured that electronic and mechanical scalpels and needles applied through satellite will make the future of surgery

---

Delivering anti-cancer drugs to the brain has been a major problem due to the blood-brain barrier. However, anti-cancer drugs bound to nanomaterials successfully cross the blood-brain barrier and release the drugs at therapeutic concentrations in the brain.

12.The author's attitude toward the future of drug delivery systems is ..... .

a) adverse b) unsupportive *c) optimistic* d) critical

Bob Twillman, deputy executive director of policy and advocacy for the American Academy of Pain Management, said he can envision Cara's drug eventually being prescribed instead of commonly abused painkillers.

13.Bob Twill man is ..... prescription of Cara's drug in future.

a) doubtful about b) indifferent toward c) openly against *d) positive about*

It is important to gain a good understanding of the molecular basis for the development of resistance because it allows us to develop new approaches to manage the infections caused by these bacteria and to create new strategies for the development of new treatments against these bacteria.

14.The text ..... to defeat the infectious diseases.

a) opposes recent methods b) provides a definite solution
c) is doubtful about future attempts d) considers ongoing new efforts

The excess storage of fat is surpassingly difficult to define and to measure accurately. In practice, an experienced eve is a good judge of the presence of obesity especially in the unclothed patient. To measure **it**, one requires data on weight and height. Life insurance companies have published tables showing the desired or ideal weights of men and women of different heights, that is the weights associated with the best life expectancy.

15.The underlined pronoun “it” in line 3 refers to ……. .

a) data b) obesity c) weight d) the patient

Food addiction is often linked to ultra-processed foods, which are foods made with little to no whole ingredients, along with a lot of sugar, salt, and fat, to "make them highly palatable," Keri Gans, author of The Small Change Diet and a registered dietitian, tells Yahoo Life. "When consumed, they lead to a release of dopamine in our brain, and leave us wanting more and more of this feel-good hormone," she says. Experts say **this** is done on purpose since "these is evidence that the food industry designs ultra-processed foods to be highly rewarding, to maximize craveability and to make us want more and more and more," Gearhardt says.

16.In paragraph 2, the underlined "this" refers to …… .(02)

a)release of the dopamine hormone
b)lessened desirability of some foods
c)food to which whole ingredients are added
d)production of foods which are highly processed

Vaccines are apathogenic entities that cause the immune system to respond in such a way that when it encounters the specific pathogen represented by the vaccine, **it** is able to recognize it and mount a protective immune response, even though the body may not have encountered that particular pathogen before.

17.The underlined "it" (line 2) refers to …… .

a) specific pathogen b) immune system c) immune response d) apathogenic entity

---

Folk or traditional medicine originated from primitive man's reactions or attitudes to natural events. Magic and witchcraft played an important role here. In **these societies**, where witchcraft and religious beliefs were of great importance, disease and health were explained by external factors penetrating and harming the body.

18.The underlined word "these societies", paragraph 1 line 2, refers to ..... people.

a) folk b) non-native c) unsettled d) primitive

These two people, Dr. Frank Meleney and Miss Balbina Johnson, knowing that the human body had some kind of action in itself with **which** it fights infections, began to search for the chemical that **does this**.

19.The underlined 'does this' (line 4) refers to …… .

a) infecting the body
b) starting some kind of action
c) fighting infection
d) beginning to search for the chemical

20.The underlined 'which' (line 4) refers to ……. .

a) action b) human body c) itself d) bacitracin

Not too long ago, deadly infections were feared in the Western world. Since that time, many countries have undergone a transformation from disease cesspools to much safer, healthier habitats. Starting in the mid-1800s, there was a steady drop in deaths from all infectious diseases, decreasing to relatively minor levels by the early 1900s. The history of **that** transformation involves famine, poverty, filth, lost cures, eugenicist doctrine, individual freedoms versus state power, protests and arrests over vaccine refusal, and much more.

21.The underlined "that" (line 4) refers to transformation from a deadly environment to a(n) ..... .

a) rise in illness b) filthy habitat c) safer setting d) absolute poverty

---

Though differences persist, many poor countries have recently experienced large improvements in life expectancy. In India and China, life expectancy has risen by 30 years since 1950s. Even in Africa, life expectancy rose by 13 years from the early 1950s until the late 1980s, when the spread of HIV/AIDS reversed the trend.

What factors explain **this outcome**? Some of the main factors are changes in income, literacy (especially among women), and the supply of calories.

22."This outcome" in paragraph 3, refers to ..... .

a) improvement in people's life expectancy
b) decrease of life expectancy in Africa
c) changes in people's income
d) spread of AIDS in African countries

This minimum requires that the individual gain relief from pain, which destroys the higher human functioning, and restores at least the minimum functioning valued by society; that **she** be spared a death that is the result of trivial or avoidable circumstances; that she be spared disfigurement that will make her repugnant to her society and herself; and that she be spared a loss of function that will make her unable to share the actions, burdens, and accomplishments that membership in society demands.

23.The underlined pronoun "she" in the text refers to ..... .

a) a specific person in a poor society
b) the female patient in need of health
c) the woman addressed by the writer
d) every member of the society

For this reason, "enhanced recovery after surgery" (ERAS) guidelines suggest that post operation patients who are able to be active, do more standing and walking around after surgery as soon as they can. This is particularly helpful for older patients, who can sometimes develop pneumonia after surgery, because standing and walking helps them to use their lungs more. Research has shown that it also helps patients to regain bowel function more quickly and can even reduce the need for medication.

24.The underlined "This" refers to ..... .

a) postoperative recovery b) enhanced recovery
c) standing and walking d) immobility

▪An outbreak of the anthrax is identical to that of the flu**.**
▪Although the cause of obesity in children is similar to **that of** adults (i.e. more energy intake vs. energy utilized), emerging data suggest associations between the influence of maternal and fetal factors, during intrauterine growth and growth during the first year of life, on risk of later development of adult obesity and its complications.
▪The number of patients and surgeons who choose lumpectomy for stage one disease today is shown to be much below than **that of** 20 years ago.
▪It is stated than an allergy shaped in DID sufferers is more difficult to detect than **that of** a normal person.
▪People with serious drinking problems have an increased risk of dying which is between two and three times greater than **that** of the general population at the same age and sex.
▪The term “adult respiratory distress syndrome” was introduced long after **that of** ARDS.
▪ However, unsaturated fats, derived from vegetable oils, tend to lower serum cholesterol if taken in a proportion twice **that of** saturated fats.
▪They believe that there are no physiological differences at all between the memory of Shereshevskii or Toscanini and **that of** the average person.

Also:

The opening in the chamber, where you will be, will be quite small. Lying on your back for a prolonged period of time might cause some pain in your back. **It** could *also* cause pain in other areas from lying on an uncomfortable patient table.

The environmental movement, or the ecology movement, includes conservation and green politics. It advocates the sustainable management of resources and care of the environment through changes in public policy and individual behavior. *Also*, **it** considers human beings as a participant in, rather than the enemy of, ecosystems, and entails the countries to consider at least three types of rights: property rights, citizens' rights, and the nature's rights; but it varies from country to country.

SHAHREZA

جمله معترضه :

SHAHREZA

Some 200,000 babies are born in the United States each year with deformed bodies, impaired minds and possibly fatal abnormalities in body chemistry-often because of defective genes or chromosomes. If a way could be found to "test" routinely the genes of prospective married couples-much as the couples now take Wasseremann tests to detect syphilis-the ***toll*** might be reduced drastically. This is the goal of genetic counseling. And while it is still far off, testing is expensive and elaborate, genetic counseling centers in hospitals and clinics across the United States are already helping parents.

25.“The *toll* might be reduced …. .” (line 6). In this sentence *toll* refers to the ……. .

a) birth of abnormal children b) cost and complexity of testing
c) sufferers of syphilis d) defective genes and chromosomes

Says the university of Zurich’s Charles Weissman, 50, who in 1980 became the first scientist to make bacteria produce a facsimile of human interferon (a possible weapon with which to attack cancer):

26.The interferon produced from bacteria by Weissman was the first of its type to ……. .

a) modify heredity b) fuse cells
c) be used as a probable cure for cancer d) be located and identified in human beings

A single genetic mutation seems to cause the abnormal facial features and other defects in the heart, bone, blood and reproductive cells, which come along with Hamamy syndrome, a rare disorder, whose exact cause was unknown until researchers pinpointed the genetic problem, in their recent paper, that produces the disease to be a mutation in a single gene called IRX5.

27.It is said that Hamamy syndrome is ……. throughout the world.

a) uncommon b) incurable c) contagious d) prevalent

In addition to genetic ties to lifespan, diet has been shown to substantially affect lifespan in many animals. Specifically, caloric restriction (that is, restricting calories to 30-50% less than an *ad libitum* animal would consume, while still maintaining proper nutrient intake), has been shown to increase lifespan in mice up to 50%.

28.According to the passage, caloric restriction ……. the life span.

a) has positive effects on b) has a negative correlation with
c) is mostly independent of d) is as genetically determined as

But gradual depletion of ready-made compounds in the environment compelled the evolution of mechanisms to synthesize at least carbohydrates from the atmospheric carbon dioxide. The crucial step which gave 'life' to **these chemical factories** was the evolution of mechanisms for self-replication accompanied by information transfer.

29.Chemical factories (line 8) was mentioned to refer to the ……. .

a) carbohydrates b) amino acids c) compounds d) mechanisms

After adjusting for a range of variables, they found that people with disordered breathing during sleep became cognitively impaired an average of about 10 years sooner than those without the disorder.

30.The underlined word disorder (line 8) refers to ..... .

a)apnea b) memory loss c) Alzheimer's disease d) cognitive impairment

The idea of determinism, that no event occurs in nature without natural causes, has been postulated as a natural law; yet, it is under attack on both scientific and philosophical grounds. Scientific laws assume that a specific set of conditions will unerringly lead to predetermined outcome. However, studies in the field of physics have demonstrated that the location and speed of minuscule particles such as electrons are the result of random behaviors rather than predictable results determined by pre-existing conditions.

31."Unerringly" (line 3) is closest in meaning to ……. .

a) philosophically b) definitely c) doubtfully d) effortlessly

When radiologists install computer technology in their homes, they can have images sent directly to them for diagnosis, and they do not need to make an **off-hours** trip to a hospital or clinic.

32.The expression "off-hours" in the last line is closest in meaning to "hours .....".

a) busy with work load b) away from work place
c) on duty d) on call

The term breathing-related sleep disorder refers to a spectrum of breathing abnormalities ranging from chronic or habitual snoring to upper airway resistance syndrome (UARS) to **frank** obstructive sleep apnea (OSA) or, in some cases, obesity hypoventilation syndrome (OHS).

33.The word "frank", in the first paragraph, is closest in meaning to ..... .

a) honest b) weary c) sincere d) obvious

The common understanding of intelligence involves individual comprehension, reasoning, and judgment. Simple as this sounds, psychologists continue to wrestle with the concept of intelligence. Much effort has gone into measuring intelligence by tests designed to distinguish among individuals and to distribute the results on a numerical scale.

34."Simple as this sounds …", this clause means …… .

a) when this sounds simple
b) although it seems to be simple
c) this is as simple as others
d) as long as it is simple

35.The passage mainly discusses the …… .
a) definition of cognitive condition
b) relationship between food and cognitive disorders
c) different types of cognitive diseases
d) impact of cognitive condition on nutrition
The passage implies that …… .
d) mother's nutrition may prevent some cognitive disorders
The passage discusses "a woman's nutritional status" to …… .
c) show its impact on a child's mental development
According to the passage, the influence of food on cognitive health starts …… .
d) when a sperm joins the ovum
36.The overall tone of the passage is …… .
a) scientific and informative b) informative and humorous
c) subjective and technical d) academic and disbelieving

The influenza vaccine is effective in preventing disease and death, especially in high risk groups, and in the context of routing vaccination, the World Health Organization reports that the "influenza vaccine is the most effective preventive measure available". With regard to the present fear of an imminent influenza pandemic, "vaccination and the use of antiviral drugs are the two of the most important response measures for reducing morbidity and mortality during a pandemic.

37.The best topic for the third paragraph is …… .
a)preventive measures of morbidity and mortality
b)the imminent influenza pandemic
c)vaccination and the use of antiviral drugs
d)the preventive effect of flu vaccine

The passage mostly discusses *anxiety-its etiology.*
The second paragraph deals mainly with the *etiology* of mental disorders.

The main purpose of the passage is to *explore the causes of dyslexia*.
A suitable title for the passage would be *A new epidemic and its causes*.

In the first paragraph the author deals with *why labels on products are necessary*.
The second paragraph mainly discusses *why people get overweight*.
This passage mainly attempts to find out *why MS is more prevalent among women.*
d) account for the health issues in women and their *etiology*

The paragraph is mainly related to *origins of creativity.*
The passage is mainly trying to indicate the *herbal origin of drugs*.
The passage aims at describing the *origin of cell*.

The text discusses *two different views on post-operation bed rest.*
The passage above is mainly about *two main types* of hepatitis
The text discusses *two different views on post-operation bed rest.*
The text describes *two types* of "loss of consciousness".
The writer *makes a distinction between* a genuine loss of consciousness and a supposed loss.
The text *makes a distinction* between benign and malignant cells.
The first paragraph *makes a distinction* between regular and occasional snorers.
The text *differentiates between norms and values followed by males and females at puberty.*
The passage describes a *contrast between the art and science of medicine*.
The passage mainly discusses *different types of ozone existing in the air*.
What is the best topic for this paragraph? *Acute pain versus chronic pain*.
b) Etiology of acute pain
The first paragraph mostly discusses *life expectancy in poor and rich countries*.
The best title for this passage could be *the border between hypnosis and sleep.*

The best topic for the third paragraph is the preventive *effect of* flu vaccine.
The passage mainly discusses the *effects of* social support on well-being.
This passage is mainly about the *effects of* poverty, race and family structure on children's health.

The last paragraph focuses on the *role of* early childhood in communication development
The passage is primarily concerned with the *role of* fats in human health
The main purpose of the writer is to explain and approve the *role of* VRT for phobic patients.

The best title for the passage would be *Benefits of* Walking.
The second paragraph mainly deals with *benefits* and harms of memory enhancing pills.

The first paragraph mainly focuses on the extent of the *problems* that cancer can cause.
This passage mainly discusses the *existing problems* with saving energy.
The best topic for this passage could be common *health issues* related to sugar.
The last paragraph deals mostly with *problems* which may arise due to the application of RAE.
The main idea of the passage is to introduce *the obstacles* affecting healthcare services.

The writer has written this passage to show that *new findings* on calcium supplements should be considered
The best topic for the passage could be *new findings* on chromosome changes in tumor cells
This passage primarily discusses a *changing approach* to breast cancer.

The purpose of the author is to *warn patients* against false information on the Internet.
The main purpose of the author for writing this passage is to show that any new therapy should be approved with strong evidence
This passage is mainly written to *make consumers aware* of the claims lacking scientific evidence.

The second paragraph mainly *attributes poverty to social inequity*.

A good title for this passage is Oral Hygiene and Heart Disease.
The best title for the passage could be Our Feet and Our Health.
A good title for the passage is Spontaneous gene mutations *linked to* kid's heart defects
A good title for the passage is b) spontaneous gene mutations *linked to* children's heart defects.

The text aims at understanding the *nature of intelligence.*
The text is mostly about *subparts of intelligence.*
The main idea of this passage is that *intelligence exists in different forms*.
The main idea of the second paragraph is that intelligence is represented *in various types and different degrees.*

In the first paragraph, the writer tries explain what mental trauma is.
What is the main idea of the passage? mortality data measurement.
The second paragraph mainly deals with lack of information about future pandemics.
The second paragraph highlights the need for aid delivery to countries in need.
The first paragraph of the text is describing a new academic discipline.
A good title for this passage is child susceptibility to smoke effects.
A suitable title for the passage is eating and exercise habits vary by season.
A good title for the passage is Plasma Jets Could Replace Dental Drills.
This passage mainly about using the patient's immune system to attack cancer.
The passage mainly discusses acupuncture, a complementary practice against depression.
The best title for this passage is MRI: a safe procedure with some side effects.
The main idea of the passage is the possibility of delaying memory decline by treating sleep apnea.
The passage is mostly discussing Cuban experience in health promotion.
The present study is mainly about identifying early signs of autism.
The main point of paragraph 2 is that what matters about the two types of fats is their relative amounts consumed.
The main idea of this paragraph is that our attitude toward the newborns needs to be changed further.
The author of this reading selection indicates the significance of group pressure.
The best title for the passage could be Eradication of Smallpox.
The most appropriate title for the passage could be an unusual sleep disturbance.
The first paragraph views humor as a/an useful option in people's daily lives.
The ideas in the second paragraph are elaborations of those in the first paragraph.
Which of the following subjects is discussed in this passage? Loss of flavor perception in semantic dementia.
This paragraph mostly deals with public health successes.
A suitable title for the passage above could be chronic pain management.
This passage mainly deals with the controversies over the use of cloning.
This paragraph is mostly about the unsuccessful communication styles employed by people.
The first paragraph is mainly about the insufficiency of efforts to defeat infectious diseases.

The most commonly accepted definition of stress is that it occurs when a person believes that "demands exceed the personal and social resources the individual is able to mobilize". In short, it is when we feel out of control. When people feel stressed, they have made two main judgments: First, they feel threatened by the situation, and second, they believe that they're not able to meet the threat. How much stress someone feels depends on how much the situation can hurt them, and how closely their resources meet the demands of the situation. Perception is the key to this as situations are not stressful in their own right. Rather, it is our interpretation of the situation that drives the level of stress that we feel.

38.The main idea of this passage is that although threatening situations exist for everybody, the individual's personal adjustments are helpful

The main idea of this passage is that although there are many theories, how free radicals really affect aging is unclear.

What is the main idea of this passage?

The problem of high infant mortality among black mothers can be explained mainly by social factors.

The ability to laugh, play, and have fun with others not only makes life more enjoyable but also helps you solve problems, connect with others, and be more creative. People who incorporate humor and play into their daily lives find that it renews them and all of their relationships.

Life brings challenges that can either get the best of you or become playthings for your imagination. When "you become the problem" and take yourself too seriously, it can be hard to think outside the box and find new solutions. But when you play with the problem, you can often transform it into an opportunity for creative learning.

Playing with problems seems to come naturally to children. When they are confused or afraid, they make their problems into a game, giving them a sense of control and an opportunity to experiment with new solutions. Interacting with others in playful ways helps you retain this creative ability.

39.The ideas in the second paragraph are elaborations of those in the first paragraph.

The paragraph before the first paragraph most probably is about ..... colds.
c) factors affecting vulnerability to
The results of the Michigan study ..... .
d) are related to different age groups
According to this passage, ... are most likely to catch colds.
a)male and female babies

41.The writer in this passage, ...
a) is highly critical of the issue b) is unaware of the topic
c) considers his personal views d) tries to remain *objective*

42.The text is ..... playing and having fun in life.
a) in favor of b) critical of c) impartial about d) skeptical about
As part of its benefits, a happy approach to life can help the individual to get more ..... .
c) innovative
The first paragraph views humor as a/an ..... in people's daily lives
c) useful option
According to the passage, life challenges ..... the individual.
d) could be changed into opportunities by

The thickness of the tumor ..... the radiation dose to be used.
b) determines
Collimators are used to ..... the amount of radiation required in a single dose.
b) regulate
Tomotherapy is referred to as a/an ..... for treating cancers.
c) possible choice

43.The writer intends to ..... tomography as a treatment method.
a) criticize b) dismiss *c) introduce* d) ignore

As for the runny nose that accompanies cold, we don't yet know if it benefits us or viruses, but we certainly need to know in order to decide if nose sprays will help or harm us. Much of clinical medicine relieves people's discomfort by blocking defenses like fever, pain, nausea and diarrhea.

44.The author is …… the usefulness of nose sprays.

a) confident about b) indifferent toward *c) skeptical about* d) conscious of

---

Public health officials frequently worry about low levels of childhood vaccination, often driven by unfounded concerns that vaccines are linked with autism. But in many nations without mandatory vaccination rules, rates of childhood vaccination remain surprisingly high, said Tamer Oraby, a mathematician at the University of Guelph in Ontario, Canada.

45.The author .....people's worries on the link between autism and childhood vaccination.

a) confirms *b) opposes* c) justifies d) triggers

Addressing the two approaches, the writer seems to ..... .

a) support the school reform movement b) advocate the school revisioning approach

c) criticize both movements *d) remain impartial*

The author's tone in this passage could best be described as ..... .

a) neutral and objective b) quite humorous c) tentative but interested d) highly critical

The writer seems to ..... the occasional misinterpretation of physicians' telephone orders.

a) deny b) underestimate *c) acknowledge* d) justify

The overall tone of the passage is ..... .

a) scientific and informative b) informative and humorous

c) subjective and technical d) academic and disbelieving

The writer seems to be ..... the return of the old-fashioned cures.

a) categorically against *b) surprised by* c) disappointed with d) a proponent of

The writer is ..... the eradication of the common infectious diseases.

a) optimistic about b) indifferent to c) biased toward *d) uncertain about*

The author of this passage ..... cancer costs.

a) wants health authorities to reduce b) remains indifferent toward

c) has suggestions for reducing cancer costs d) wants people to avoid

In achieving the superordinate goal of improved health, the text ..... .

a) highlights the significance of joint work b) substitutes managerial skills

c) seeks advice from public health community d) largely remains indifferent

The author of the passage is most primarily a ..... .

a)physician b)physiatrist *c)psychologist* d)pharmacologist

The writer ..... the idea that mental disorders are difficult to diagnose.

a) clearly questions b) implicitly supports

c) takes a neutral view on d) takes a biased view regarding

The writer seems to be ..... alcohol-related problems in Britain.

a) content with b) a victim of c) confused by *d) worried about*

The writer ..... rough actions against nuisance drunks.

a) intentionally recommends b) remains indifferent toward

c) seems to be unaware of *d) openly stands against*

This paragraph is ..... sports and energy drinks for children.

a) critical of b) impartial to c) indifferent to d) in favor of

The author is apparently ..... the Research Assessment Exercise (RAE).

a) biased toward b) indifferent to c) in favor of *d) critical of*

The author of this paragraph is ..... the communication styles mentioned.

a) indifferent to b) in favor of c) impartial to *d) critical of*

The author of this article is ..... the priorities in the world.

a) unaware of b) indifferent to *c) critical of* d) in favor of

The writer is …… the current status of public health management.

a) dissatisfied with b) indifferent toward c) responsible for d) positive about

---

According to the passage, the writer has a ..... attitude towards treating cancers which are unresponsive to chemotherapy.

a) promising b) discouraging c) neutral d) conservative

It seems that the writer is ……. gene splicing.

a) critical of *b) in favor of* c) indifferent to d) skeptical about

In general, the writer has a ……. view about conducting health education programs.

a) negative b) neutral *c) positive* d) biased

The author's attitude toward telemedicine is ..... .

a) positive b) critical c) impersonal d) unsupportive

The author's attitude towards technology-based language teaching and learning seems to be …… .

a)promising b)disappointing c)pessimistic d)suspicious

The writer of the passage remains ..... the effect of music on brain activity and learning progress.

a) unaware of b) skeptical about *c) in favor of* d)clearly against

The text implies that the writer is ..... more investigations and studies on complementary and alternative medications.

a)in favor of b)opposed to c)uncertain about d)indifferent to

Among oncology patients, the quality of life in satisfaction with levels of functioning and control of the symptoms of both disease and treatment. Oncology nurses understand the value of the quality as well as the quantity of life; the former transcends physical health, clinical symptoms, and functional ability. Betty Ferrell has devised a model that incorporates the four dimensions of the quality of life: physical, psychological, social, and spiritual.

46.The underlined term “former” refers to ……. .

a)quality of life b)quantity of life c)oncology nurses d)physical health

---

Schizophrenia is often confused with multiple personality disorder, yet is quite distinct from it. Schizophrenia is one of the most common mental disorders, considerably more common than multiple personality disorder.

47.As to schizophrenia and multiple personality disorder, ……. .

a) they are relatively similar
b) the former is a psychological disorder but the latter is not
c) they can be mistaken for each other
d) the latter occurs more often than the former

Very often, however, we are overly harsh and unjust to ourselves in a way that we would never be with friends or co-workers. This, along with other negative thinking, can cause intense stress and unhappiness, which can severely undermine our self-confidence.

48.As to the feeling of stress and weakened self-confidence, ……. .

a) the former is the consequence of the latter
b) the latter can be the end result of the former
c) both are commonly concomitant
d) both are contradictory terms

The principal drugs misused by athletes are the psychomotor stimulants and the anabolic steroids. For the former, amphetamines and related drugs are taken to provide a sense of increased alertness and relief of fatigue; however, obscuring fatigue may permit participants to exceed their limits and precipitate a sudden collapse. These drugs can also make the users more aggressive, which can contribute to injuries to themselves and others. For the latter, drugs such as nandrolone phenpropionate are used. The user develops larger appearing muscles, increased body weight, and body water, but reports on the effectiveness in improving performance have been conflicting. Many valid studies have failed to demonstrate any improvement in performance.

49.As to anabolic steroids and psychomotor stimulants…… .

a)the former ……, the latter ……

Because= because I don't complain, people think I'm satisfied.
As= as you were out, I left a message.
Since= since it is your birthday, I'll buy you a bicycle.
For = we listened eagerly, for he brought news of our families.
If= if you eat healthy, you stay healthy.
Unless (if+not)= I sleep with the window open unless it is really cold.
Provided/providing= I'll go provided that the children can come with me.

So= the shop is closed so I can't buy any bread.
Therefore= Simon was busy and therefore could not come to the meeting.
Thus= they planned to reduce staff and thus to cut costs.
Hence= his mother was Italian, hence his name is Luca.
Consequently=he didn't do any work, consequently failed the exam.
As a result= I got up late, as a result I missed the train.
So that = speak louder, so that everybody can hear you.
In order that = in order that he could see the football game, Ali turned on the television.

As bacteria in our mouths feed on sugars, they Produce an acid that eats in to denting, eventually boring cavities which can cause a great deal of pain, and if left untreated can lead to serious infections and even death.

50.The direct cause of tooth caries is usually ..... .
a) sweets b) an acid c) boring cavities d) serious infection
51.Tooth caries, if not treated, may sometimes ..... .
a) kill the person b) heal themselves c) destroy bacteria d) be tooth repairing

---

Most antidepressants stimulate the flow of serotonin, which reduces the production of amyloid beta in the brain. This has prompted the researchers to investigate antidepressants as a tool to control amyloid beta production in Alzheimer's.

52.Based on the information in the passage, antidepressants are assumed to indirectly ..... In Alzheimer's patients.
a) break clumped proteins apart b) increase the disposal of amyloid beta
c) prevent proteins from clumping together d) decrease the production of amyloid beta

---

"You may look awful to *yourself*, but except for the first hour or so in the morning when you probably will be puffy-eyed due to depletion of a certain hormone that's the result of lack of sleep , you'll soon look like your usual self and perform normally. If you do feel worn, the cause is stress, not lack of sleep.

53.What happens to the hormone mentioned ..... lack of sleep.
a) is caused by b) results in c) has nothing to do with d) contributes to
54.Dr. Schwartz argues that the feeling of tiredness is due to ..... .
a) lack of sleep b) one's psychological tensions
c) depletion of a certain hormone d) the person's profession

Epidemiological trends show populations across Europe and beyond becoming less healthy as "diseases of comfort" (e.g. chronic diseases caused by an obesogenic environment) due to technological advance grow at an alarming rate, manifesting themselves as major public health problems in this century.

55.According to the passage, ... an obesogenic environment have worsened the health condition of European people.
a) scientific advances stemming from b) maladies induced by
c) epidemiological trends preceding d) health challenges leading to

---

Sometimes, death is preceded by violent convulsions related to brain damage.

56.According to the second paragraph, ...
a) death may be followed by brain damage
b) death may follow violent convulsions
c) violent convulsions can proceed from death
d) brain damage can proceed from death

Health problems associated with the consumption of sugar are numerous. One such risk to the consumption of sugar is obesity. In the Western world where the level of physical activity has reduced

and the level of sugar has increased, sugar is definitely a weapon that will result in excess weight. Weight gain from sugar is indicated in hardening of the arteries which directly contributes to heart disease. Furthermore, sugar definitely plays a role in developing some types of diabetes. Sugar, particularly sugar in fruit juice, is also known to cause tooth decay. Consumption of sugar may also make one more likely to suffer from gum disease. Moreover, sugar plays a role in how we behave as well. It has been suggested that excess sugar may cause depression. It may also result in hyperactivity or mood swings as one drops from sugar highs to sugar lows. Recent studies also suggest that too much sugar can lower the body's natural immune response. People who consume a lot of sugar are more likely to get bacterial infection than are people who avoid sugar. Sugar is also indicated in digestive problems, because too much sugar can cause higher acid amounts in the stomach. This can lead to diarrhea, particularly in those who suffer from irritable bowel syndrome.

57.According to this passage, …… .

a) Westerners' hyperactivity and mood swings have led to their obesity
b) arteriosclerosis might occur as the consequence of using too much sugar
c) gum diseases are certain to occur among those who overeat sugar
d) irritable bowel syndrome generally occurs whenever a person consumes acidic foods

58.According to the writer, …… .

a)the weight gained through consumption of sugar is inevitable
b)the excess consumption of sugar might give rise to both physical and mental disorders
c)refined sugar must be included in our diets to avoid obesity
d)over-consumption of sugar renders the individuals liable to unmanageable risks

59.It is implied in this paragraph that …… .

a) obesity is the sole result of excess consumption of sugar in any age group
b) excess use of sugar might bring about behavioral changes
c)sugar over-consumption definitely brings about acid over-secretion, resulting in diarrhea
d) gum diseases generally occur as the natural consequence of eating too much sugar

---

60.The results of this study showed that …… .

a) inflammation in the body may cause clogged arteries
b) people with poor oral hygiene have an increased risk of heart disease
c) there has been increased interest in the links between heart problems and gum disease
d) medical history and family history of heart disease correlate with hypertension

---

61.The study proved poor oral health behavior to be a(n) …… of cardiovascular disease.

a) cause b) associate c) risk factor d) investigation

A new study found that Americans who eat a diet low in potassium were about twice as likely to die from a heart attack, compared with those whose diets have high levels of the mineral. The study doesn't prove cause-and-effect, but it does suggest a role of potassium in health.

62.Having read the passage, we understand that a diet high in potassium …… .

a) causes heart attack b) might be healthier
c) is low in other minerals d) prevents myocardial infarction

---

•Although the association found in this study does not prove cause and effect, it indicates that obesity should be considered a factor for follow-ups after a benign prostate biopsy.

•The lead author, Dr. Ricardo S. Osorio, a research professor of psychiatry at NYU Medical Center, said the analysis is an observational study that does not prove cause and effect.

•This shows health and happiness are linked, although unhappiness does not necessarily cause more colds and flu.

During sleep hours, narcolepsy can also manifest itself in a variety of ways. During the transitional phase that precedes the onset of sleep, it is common for hallucinations to occur. These hallucinations known as hypnagogic phenomena consist of realistic perceptions of sights and sounds during the semi-conscious state between wakefulness and sleep, resulting in extremely fragmented and restless sleep. Then, upon waking, a narcoleptic may experience sleep paralysis, the inability to move, perhaps for several minutes, immediately after waking.

63.Hypnagagic phenomena most likely occur ……. .

a) before falling asleep b) in the middle of the night
c) soon after waking d) after getting up

64.Hypnologic phenomena most likely occur ……. .

a) after going to bed b) in the middle of the night
c) soon after waking d) a few hours after

65.Sleep paralysis is most likely to occur following ……. .

a) bouts of sleep b) restless sleep c) cataplexy d) REM

Negative traits included being tense, anxious, sad, depressed, angry, or hostile. With the participants' consent, the researchers exposed them to viruses that cause colds or flu. The participants were then quarantined for five to six days to see who got a cold or flu. People with high scores for positive emotional style were more likely to resist colds and flu and when they did get sick, their symptoms were reduced, the study shows.

66.Researchers quarantined the participants ……. .

a) with negative traits b) with high scores of positivity
c) who became tense and hostile d) following exposure to the viruses

The treatment times begin when the desired pressure is reached and they range from 30 minutes to 2 hours, depending on the patient’s condition and the indication for which it is being used. Most treatment times average one hour. Decompression, which takes another 10 minutes, is then accomplished and the patient is removed from the chamber.

67.Decompression (last sentence) follows the ……. .

a) desired pressure achievement b) patient treatment
c) tranquility achievement d) acetylpromazine application

Recognizing chronic pain as an ongoing problem is the first step to finding treatment. It's important to talk to your doctor about your symptoms in order to identify the source of the pain and to come up with a successful treatment plan.

68.Recognition of the source of chronic pain …… .

a) is an ongoing process b) follows the disappearance of symptoms
c) is limited to pain symptoms d) precedes the treatment plan

Hypovolemia is a low-volume state resulting from any condition in which body fluid is lost in sufficient amounts to reduce the circulating blood to a point at which some organs or cells are deprived of oxygen and essential nutrients. Burns and crushing injuries, as well as hemorrhage, can result in hypovolemic shock.

69.Hypovolemia would involve a fall in the circulating blood …… a loss in body fluid.

a) before b) simultaneously with c) following d) regardless of

It is known that two influenza viruses can recombine when both are present in an animal at the same time. The result of such recombination is a great variety of strains containing different H and N spikes. This raises the possibility that a human influenza virus can recombine with an influenza virus from a lower animal to produce an entirely new spike.

70.According to the passage, a great variety of influenza strains can appear after ……. .

a)H and N spikes are recombined b)diseased animal viruses are combined
c)dissimilar types of virus recombine d)two identical viruses are combined

The most commonly accepted definition of stress is that it occurs when a person believes that "demands exceed the personal and social resources the individual is able to mobilize". In short, it is when we feel out of control. Very often, however, we are overly harsh and unjust to ourselves in a way that we would never be with friends or co-workers. This, along with other negative thinking, can cause intense stress and unhappiness, which can severely undermine our self-confidence.

71.According to this passage, the feeling of stress usually follows …… .

a) the individual's control over a situation
b) the person's inability to confront a threatening situation
c) mobilization of one's personal and social resources
d) perception of the demands of a specific threat

72.According to the passage, stress occurs ……. .

a) after our self-confidence is undermined
b) when the demands of a situation are too much to handle
c) when situations are stressful in their own right
d) as mobilization of social resources exceeds demands

The study participants reported consuming about 1,963 kilocalories per day, with approximately half those calories coming from carbohydrates and nearly a third from fats.

73.The fat each individual used every day ..... .

a) was highest in winter b) contained 86 kilocalories

c) produced about 650 kilocalories d) varied with the weight of the person

Warren and his colleagues used jellybeans to assess flavor understanding in four dementia patients (three with semantic dementia and one with an Alzheimer's-like condition) and six healthy subjects. Participants were given two jelly bean flavors and had to determine whether the flavors were different or the same; whether the flavor combination would generally be thought of as odd; and what the identity of the second flavor was. The semantic dementia patients performed significantly worse on the latter two tasks than healthy individuals. "They had some basic aspects of their flavor processing still normal, still preserved, but they lost the types of information that relate to the meaning of food, the understandings of how foods go together."

74.How many subjects did not do well in the second task of the study?

a) 2 b) 3 c) 4 d) 6

Researchers have examined data from 500 men followed for 14 years after a prostate biopsy that was found to be benign. This is the first of a group of studies to be conducted in order to determine if there are subpopulations of men diagnosed with benign conditions that may be at a greater risk for developing prostate cancer. Prostate abnormalities were detected in 11 percent of the patients, and after considering factors including family history of prostate cancer, the researchers concluded that obesity at the time of the initial biopsy was associated with a 57 percent increased risk of developing prostate cancer during the 14 years of follow-up.

75.Based on the information presented in the passage, about ……. patients from the followed-up population proved to have prostate abnormalities after some years.

a)275 b)125 c) 55 d)445

Initially, results revealed that antidepressants successfully reduced amyloid beta production in the young mice without plaques by 25% after 24 hours. In the next phase, the researchers administered the antidepressant citalopram to older mice with plaques and found that citalopram halted the growth of the existing plaques, while formation of new plaques was reduced by 78% during 28 days. Subsequently, the samples from 23 cognitively unimpaired human subjects showed that amyloid beta production had dropped in the human participants by 37% over the 24 hours following the administration of the citalopram.

76.In the experiments, the most sustainable results were reported for …… .

a) mice with no plaques b) mice which already had plaques

c) cognitively impaired human beings d) normal human beings with no plaques

---

The global burden of these conditions amounts to over 70 % of the burden in low- and middle - income countries. These are the leading cause of disability adjusted life years (DALYS) and account for 9 million deaths per year.

77.According to the passage ……of the global burden of brain condition is imposed on high income countries.

a) almost all b) nearly half c)around tow third d)less than one third

---

It is common for the symptoms of schizophrenia to develop during the late teen years or early twenties, but the causes of schizophrenia are not well understood. It is believed that heredity may play a part in the onset of schizophrenia.

78.It can be inferred from the passage that it would be *less common* for schizophrenia to develop at the age of ……. .

a) nineteen b) twenty-three c) twenty-five d) thirty

It can consist of a sudden and uncontrollable bout of sleep during daylight hours and disturbed sleep during night-time hours. It commonly makes its appearance during adolescence or young adulthood.

79.Narcolepsy *is least likely* to be seen in a person at the age of ……. .

a) 11-15 b) 16-20 c) 21-25 d) 26-32

80.A person would be most likely to develop narcolepsy around the age of …… .

a) 5-10 b) 15-20 c) 35-40 d) 45-50

About 90 percent of women with stage one disease – the earliest stage – are reasonable candidate for lumpectomy, according to Morrow. Yet only 68 percent chose it in a 1998 survey by the American College of Surgeons.

81.The number of patients and surgeons who choose lumpectomy for stage one disease today is shown to be…… .

a) considerably lower than it should be

b) much below than that of 20 years ago

c) unexpectedly increasing regularly
d) about ninety percent of women with stage one disease

Out of the 335 family planning providers who used contraception, 42 percent used a long acting method of birth control, including IUDs and implants, whereas 6 percent of women in the general population used one of these methods.
The researchers found that 40 percent of family planning providers used IUDs, and 2 percent used implants, which are inserted in the arm and prevent pregnancy by releasing certain hormones. Just 12 percent of family providers used birth control pills, compared with 21 percent of women in the general population.

82.Compared to average women, the number of family providers who use pills is ..... .
a) much more b) almost half c) twice as many d) nearly the same

83.The study suggests that family planners are ..... women in the general population to use a long lasting method.
a) considerably fewer than b) nearly as many as
c) seven times more than d) almost the same in number as

About 60 percent played online games 2-4 hours a day and more than 15 percent played more than 4 hours a day. Research has also found that people meeting the criteria for Internet gaming disorder can experience symptoms similar to those with substance use disorders, such as building up a tolerance (needing more) and experiencing withdrawal symptoms when pulled away from gaming.

84.According to the research study on active games, conducted in 2016, ...
a) more than half of the subjects played 2-4 hours a day
b) less than 2 percent of the subjects played 2-4 hours a day
c) 14 percent of men were in their 20-30s
d) 14 percent of the women had full time jobs

Studies show that about 85% of people get at least some relief from immunotherapy, but some patients eventually relapse and others do not respond at all.

85.Which of the following is true after immunotherapy?
a) Around 85% of people are not responsive to it.
b) Majority of patients show some improvement.
c) About 85% of people ultimately relapse after it.
d) Few numbers of patients show some type of relief.

Globally, from 2000 to 2016 the probability of dying from cardiovascular disease, cancer, diabetes, and chronic lung diseases has declined from 22% to 18%. Additionally, there has been a roughly 2% decrease in both tobacco smoking and heavy episodic drinking among people 15 years of age or older, and a 1% reduction in the prevalence of high blood pressure. However, these changes fall short of global NCD targets. Physical inactivity in adults remains unchanged and the prevalence of diabetes and obesity in adults have increased.

86.The writer of the above passage believes the Global Action Plan has ……(02)
a)failed to reach the standards so far
b)been successful in combating alcohol abuse
c)helped 22% of smokers to prevent dementia
d)declined dementia in 18% of those drinking alcohol.

87.As mentioned in the passage, …… *in the early 21st century*.(02)
a)dying from chronic lung disease elevated
b)mortality due to diabetes decreased in adults
c)exercise and physical activity among adults increased

d)drinking alcohol decreased among those at fifteen or more

The final behavior is a reduction in alcohol abuse. Studies show that the misuse of alcohol can be responsible for up to 5% of hospital admissions and can impact significantly on heart disease, diabetes and liver failure

88.The reason for *one out of 20* admissions to hospital is ..... .

a) tobacco smoking b) heart disease c) lack of exercise d) alcohol abuse

Reportedly, men above 85 years of age have a suicide rate of 45.23 per 100,000, compared to an overall rate of 11.01 per 100,000 for all ages.

89.According to a report, ... commit suicide roughly *four times* more than that of the general population of the same gender.

a)men and women b)men aged above 85 years

c)people aged above 55 years d)the elderly without dementia

The dust in the air comprises coarse particles (between 2.5 and 10 micrometers) called PM10 (Particulate Matter up to 10 micrometers in size), fine particles smaller than 2.5 micrometers, and ultrafine particles which are smaller than 0.1 micrometers.

90.Based on the classification of the passage, a particle of around 1 micrometer would be considered as ..... .

a) small b) coarse c) fine d) ultrafine

Of 2000 patients on the practice list of the average general practitioner, about 100 will be heavy drinkers, 40 will be problem drinkers, and 10 will be physically dependent on alcohol.

91.Statistically speaking, physically dependent drinkers ..... than heavy or problem drinkers.

a) die sooner b) are fewer in number

c) face fewer health risks d) cause fewer social harms

According to a new study, mutations in genes that occur spontaneously may contribute to congenital heart disease in children. These mutations may contribute to about 10 percent of cases of congenital heart disease in children, which is the most common type of birth defect in the United States. About 40.000 babies are born each year with congenital heart disease.

92.According to the passage, every year spontaneous gene mutations in fetuses result in roughly ..... cases of congenital heart disease.

a) 4000 b) 362 c) 264 d) 40000

The body temperature is lowered in four to six hours to about 33 degrees Celsius, low enough to slow metabolism but not too slow to cause life threatening complications, like irregular heartbeat. Patients remain in this state for 24 or 48 hours. In a pilot study of 46 head-trauma victims, 52 percent of those given hypothermic therapy made a good recovery, compared with 36 percent treated with standard therapy at normal temperatures.

93.Head trauma patients are said to ..... .

a) always suffer from neurological disorders b) inevitably require cooling therapy care

c) suffer neurologically within 24-48 hours d) be likely to recover if hypothermically chilled

94.In the study conducted ..... .

a) 46 of 52 patients recovered fully

b) 36 patients responded only to standard treatment

c) the two types of treatment had similar results

d) the hypothermic patients responded better to treatment

Some people get along beautifully on four and a half hours, others sleep nine hours. Anywhere within that range is normal."

95.In order to maintain good health …… .

a) everybody should sleep about eight hours
b) stress should primarily be overlooked
c) people should sleep either 4 1/2 or 9 hours
d) one should meet his own sleep need

The intricate relationship between the nerves and the muscles was first shown nearly 1800 years ago by Galen, who proved by experiments that destruction of a nerve paralyzed the muscle it supplied.

96.Galen showed …… .

a)in 1800 that the nerves were intricately detached
b)muscle paralysis can be due to its nerve destruction
c)the relationship between nerves and muscles is very simple
d)that 1800 years ago the nerves were unusually separated

David Finkelstein of the National Institute of Aging says. "I suspect the life-span will increase due to the interventions we can make."

97.According to Mr. Finkelstein, it is …… we can lengthen life-span.

a) likely b) definite c) doubtful d) improbable

Prostate abnormalities were detected in 11 percent of the patients, and after considering factors including family history of prostate cancer, the researchers concluded that obesity at the time of the initial biopsy was associated with a 57 percent increased risk of developing prostate cancer during the 14 years of follow-up.

98.Based on the results of the present study, patients who …… at the time of initial examination were more likely to develop prostate cancer in the subsequent years.

a) underwent the needle biopsy technique
b) failed to follow prescriptions
c) had a family history of prostate cancer
d) suffered from obesity

A small percentage of these people will have unusually unstable blood pressure. HBP at altitude usually returns to the baseline blood pressure after 1-2 weeks at altitude.

99.It is stated that those whose blood pressure rises at high altitude …… .

a) should take it seriously and return to lowland places immediately
b) are likely to experience gradual normalization of blood pressure
c) may suffer hypertension perpetually as long as they are there
d) probably already have a family history of BHP

ARDS is serious, sometimes life-threatening, and get worse quickly. But it's generally treatable and most people can recover from it.

100.Although ARDS is a serious condition, it …… .

a) is life-threatening
b) may not aggravate over time
c) is likely to be cured
d) is not a diagnosable disease

But about 90 percent of ozone found in the stratosphere is "good" ozone which plays a beneficial role by absorbing dangerous ultraviolet (UV-B) radiation from the Sun. Without this beneficial ozone layer, humans would be more susceptible to certain diseases due to the increased incidence of ultra-violet rays from the Sun. In the last decades, the amount of ozone has decreased. In the last decades, the amount of ozone has decreased. Back in 1974, it was hypothesized that chlorofluorocarbons (CFCs) could be a cause for this. Until 1987, scientific assessment of the cause-effect relationship was not convincing enough to implicate the CFCs.

101.According to the passage, ……

a) before 1974, there was a consensus that CFCs would cause destruction of ozone layer

b) in the late 1980s, scientists agreed that CFCs could play a role in ozone depletion
c) ozone layer has made human more susceptible to certain diseases
d) most of the ozone existing in the atmosphere is dangerous for human health

The incidence of asthma has risen dramatically in the past 20 years - a period too short to reflect any significant changes in the gene pool.

102.The sharp rise in the occurrence of asthma in recent decades …… .

a) lacks any particular explanation
b) seems to have been inevitable
c) might have been environmentally triggered
d) should have been genetically interpreted

In 1963, The Developmental Disabilities Assistance and Bill of Rights was passed. Through this act, federal funds supported the development and operation of state councils, protection and advocacy systems, university centers, and projects of national significance. This act provided the structure to assist people with developmental disabilities pursue meaningful and productive lives. The institutions that housed these individuals gradually were closed or reduced in size. By 1975 these individuals were cared for at home, in schools or in small residential facilities. In 1975, Public Law (PL) 94-142 was passed, opening public schools too children with developmental disabilities.

103.Opening public schools to children with developmental disabilities ……. the Developmental Disabilities Assistance and Bill of Rights. (01)

a)proved to be redundant following b)happened nearly a decade after
c)well coincides with d)well preceded

Although changes are highly variable, in general, healthy aged persons experience an approximate 10% per decade decline in peak strength after 60 years of age, with a more rapid decline after 75 years of age.

104.According to the passage, a loss of about 10%, every ten years, happens in ..... of the body between the age 60-75.

a) general mobility b) maximum power c) general health d) the upper limbs

About half of people with hepatitis C don't know they have it because they don't experience symptoms (which can take decades to show up).

105.The symptoms of hepatitis may ..... .

a) take more than 10 years to appear b) appear 10 years after the infection
c) disappear in half of people within 10 years d) become inclusive within the first 10 years

Three types of human influenza viruses, A, B and C were discovered in 1933, 1940 and 1947, respectively. Only type A is associated with pandemics.

106.The influenza virus type that can involve the whole world …… .

a)was discovered in 1933 b)was found in 1947
c)is live and cold-adapted d)is inactivated and concentrated

Gene-sequence-based approaches have recently allowed complex microbial communities to be characterized more comprehensively and have removed the constraint of being able to identify only microorganisms that can be cultured, greatly increasing knowledge about commensal microorganisms and

mutualistic microorganisms of humans (that is, organisms in a relationship in which one partner benefits and the other is unharmed, and organisms in a relationship in which both partners benefit, respectively), as well as human pathogens.

107.It is said that mutualistic microorganisms …… .

a) usually lead to malfunctioning of some organs
b) are the same as commensal microorganisms
c) frequently evolve and go through mutation
d) are necessary for human body equilibrium

108.The words "epidemic" and "pandemic" in the first paragraph ……. .

a)refer to bird and human populations, respectively
b)refer to human and bird populations, respectively
c)both refer to the bird population
d)both refer to the human population

By the end of the 1980s the less-disfiguring procedure often called a lumpectomy (removal of the tumor) was widely accepted on an equal footing with mastectomy (removal of the breast) for cancer that has not **yet** spread.

About 90 percent of women with stage one disease – the earliest stage – are reasonable candidate for lumpectomy, according to Morrow. **Yet** only 68 percent chose it in a 1998 survey by the American College of Surgeons.

The genetics of autism are complex and it is generally unclear which genes are responsible for it. Autism affects many parts of the brain, but how this occurs is also poorly understood. Autism is strongly associated with agents that cause birth defects. Other proposed causes, such as childhood vaccines, are controversial and the vaccine hypotheses lack convincing scientific evidence.

109.One debatable cause of autism is said to be ....., which is yet to be substantiated.

a) complex genetic patterns b) impaired communication
c) childhood vaccines d) social problems

AD is a progressive and lethal dementia that mostly strikes the elderly. It affects memory, thinking and behavior. Estimates vary, but experts suggest that as many as 5.1 million Americans may have AD. Smith says decades of research have yet to lead to clear understanding of its causes or to successful treatments that stop progression.

110.The treatment targeting Alzheimer's so far ……. .

a) remains to be well settled b) substitutes Parkinson's remedy
c) is rather conclusive d) is quite optimal

111.The researchers are …… .

a) far from understanding what underpins Alzheimer's
b) still looking for a device stimulating the brain
c) estimating the exact number of Alzheimer's sufferers in the world
d) making progress toward what strikes the elderly

"This profession is very much like a small, quaint community that is well known among some circles, but is on the verge of being discovered by the rest of the world," says Janey Youngblom, associate director for the master's degree program in genetic counselling at California State University.

112.It is implied that genetic counselling is ……. .

a) popular worldwide b) yet to be known globally
c) thoroughly developed internationally d) less in demand

Unfortunately, the underlying mechanisms of neurodegeneration- and how they lead to disease- are not well understood. The complexity of these diseases makes it impossible for any single scientist to find the cause or cure.

113.The main cause of neurodegenerative disease is ……. .

a) recently understood b) not so significant
c) yet to be identified d) about to be declared

A variety of theorists, using case studies, experiments and a variety of research methods, have attempted to better understand the sources of creativity and innovation in individuals. While these efforts have contributed significantly to broadening our comprehension of the subject, there is nonetheless disagreement between theorists and many hypotheses that remain to be fully substantiated.

114.It is said that the hypotheses on the sources of creativity are …… .

a) quite comprehensive b) too general to prove
c) limited in most aspects d) yet to be verified

Some scientists believe that each person has a happiness set point influenced by both genetic and environmental factors. They also claim that a large part of a person's well-being is under his or her direct control and that happiness is a skill that can be learned. Through studying people who describe themselves as happy and engaged in life versus those who report feelings of depression and anxiety, neuroscientists have managed to pinpoint brain regions that exhibit corresponding activity.

115.According to the scientific studies on happiness, …… .

a)individuals fail to have any responsibility for their moods
b)a person's happiness is partly determined through nature
c)genetics has a more important role than environment in determining happiness
d)regions of the brain responsible for happiness and depression are yet to be discovered

Some of the leading causes of sight loss affect the part of the eye called the retina. Supplementation with a certain type of omega fatty acid known as docosahexaenoic acid, or DHA, can reduce the incidence of retinal disease; however, improving DHA levels in the retina is challenging due to the retina-blood barrier.

116.How can the omega fatty acid supplement influence humans? (02)

a)Its positive effect on vision has not yet been proven.
b)It puts the retina and underlying tissues at risk.
c)It can adversely affect the blood flow to the retina.
d)It can reduce the likelihood of retinal illnesses.

Because they see obesity as an illness, these authorities claim that treatment should involve not only diet and exercise but drugs as well. What they have in mind is not just a short course of medication to produce small degrees of weight loss. They want to prescribe long-term, perhaps lifetime, drug therapies, just as they might for high blood pressure or diabetes. Obesity's victims, these doctors hope, will not only be able to lose weight, but will also keep that weight off forever.

117.Diabetes and high blood pressure are compared with obesity because these disorders ….. .

a) are due to obesity b) need life-long use of drugs

c) are as prevalent as obesity d) require the same treatment as obesity

Much of clinical medicine relieves people's discomfort by blocking defenses like fever, pain, nausea and diarrhea. How can this be safe? Just as smoke detectors are designed to give many annoying but inexpensive false alarms so that they are sure to warn about any actual fire, the mechanisms that regulate the body's defenses have evolved to express defenses whenever they are possibly helpful, thus causing much unnecessary suffering.

118.Smoke detectors are compared with …… .

a) false alarms b) bodily discomforts

c) body's defenses d) bacterial infections

Remember, stigmas can be removed just as they are assigned.

However, a thin woman with a small neck can snore just as loudly.

Studies have shown that biofeedback can be just as effective as some of preventive medications we use.

Water and sanitation are just as important as food for children and families facing famine and food insecurity.

People with strong will-power can undoubtedly inhibit painful impressions, like those from a surgical operation, just as they can control irregular movements.

	نکته طلایی

Further, the study participants' body weight fluctuated by about one pound throughout the year-long study period, but was the highest during the winter season, when they also reported participating in the least amount of physical activity, the researchers note.

119.The participants' body weight seemed to ……. .

a) drastically fluctuate by season b) rise considerably in autumn
c) show little variation d) drop in winter

Allergy is a condition of sensitivity to substance, chemically a protein, which is called an allergen. The allergic person reacts in a way that others do not, when they eat, inhale or touch the allergen.

120.Allergens act …… in their victim's body.

a) categorically b) chemically c) randomly d) selectively

The principle of reciprocity or compensation calls for providing something in return for contributions that people have made, for example individuals who have participated in AIDS treatment trials, or compensation for a harm by the system, such as having been the recipient of unsafe blood transfusions. Finally, utilitarian theories require that overall societal benefits be maximized.

121.The victims of unsafe blood transfusion are expected to be ……. by the system.

a) duly accounted for b) partially compensated
c) essentially ignored d) paid more than they deserve

Heat exhaustion is generally characterized by clammy skin, fatigue, nausea, dizziness, plentiful sweating, and sometimes fainting, resulting from an inadequate intake of water and the loss of fluids.

122.Which of the following is a sign of heat exhaustion?(00)

a) long-term unconsciousness b) a lot of sweating c) hot and dry skin d) a weak pulse

It was back in 1959 when the first tele-psychiatry system was set in operation through a two-way closed circuit microwave television to transmit demonstration of neurologic patients from the State Mental Hospital to Nebraska Psychiatric Institute, 112 miles away in Omaha as part of the education of first year medical students.

123.The tele-psychiatry experience of 1959 was ……. .

a) first practiced to educate medical students in Nebraska Psychiatric Institute
b) approved for treating patients in Nebraska Psychiatric Institute
c) successful in microwave transmission to the Nebraska Mental Hospital
d) appropriate to educate medical students at the State Mental Hospital

In addition to simple pain or sprains which result from overtraining, a new research found that doing excessive endurance exercise- especially during middle-age and beyond- could theoretically lead to unhealthy structural changes in the chambers of the heart. More isn't always better when it comes to running and endurance training. It's also important to realize that what's "vigorous" for one runner is not going to be vigorous for another. For older people or those who haven't broken a sweat in a while, brisk walking might constitute a tough workout.

124.It is inferred from the passage that ……. .

a) following hard exercise, you should stop giving your body two days of rest
b) cases of change in the heart chambers due to overtraining have already been observed
c) even a simple exercise may be considered vigorous for some individuals
d) quick walking can be considered workout only for old people

125.According to the passage, life challenges ..... the individual.

a) are unlikely to cause harm to
b) could hardly be transformed into chances by
c) automatically bring about prosperity to
d) could be changed into opportunities by

Globally, from 2000 to 2016 the probability of dying from cardiovascular disease, cancer, diabetes, and chronic lung diseases has declined from 22% to 18%.

126.As mentioned in the passage, ... in the early 21st century.(02)

a)dying from chronic lung disease elevated
b)mortality due to diabetes decreased in adults
c)exercise and physical activity among adults increased
d)drinking alcohol decreased among those at fifteen or more

The work lends new insights into common ailments such as heart disease, osteoporosis, blood disorders and possibly sterility,

127.IRX5 seems to be critical for development in the womb as well as for the ..... .

a) framework of understanding
b) evolution of different ethnicities
c) function of many organs in our adult body
d) evolutionary questions embedded in genomes

The developing lungs of young children are severely affected by exposures to secondhand smoke for several reasons including that children are still developing physically, have higher breathing rates than adults, and have little control over their indoor environments. Children receiving high doses of secondhand smoke, such as those with smoking mothers, run the greatest risk of damaging health effects. These mothers are not to smoke in their home and car until they can quit, nor are they to allow family and visitors to do so.

128.One reason that adults are less susceptible to smoke than babies with smoking mothers is their ..... .

a) higher capacity b) breathing rates c) developing lungs d) indoor environment

The goal was to eliminate the disease in one decade. More than 700 physicians, nurses, scientists, and other personnel from WHO joined about 200,000 health workers in the infected nations to battle the disease. Because similar projects for malaria and yellow fever had failed, few believed that a disease as widespread as smallpox could actually be eradicated, but eleven years after the initial organization of the anti-smallpox campaign, no cases were reported in the field.

129.At the beginning of the campaign against smallpox, most expected that the project would ……. .

a) be as ineffective as the ones on malaria and yellow fever
b) be a total achievement in a short period of time
c) last more than the expected time period
d) demand little field work in the infected areas

Alternative medicine is, by definition, an alternative to something else: modern, Western medicine. But the term 'alternative' can be misleading, even off-putting for some people. Few practitioners of homeopathy, acupuncture, herbalist and the like regard their therapies as complete substitutes for modern medicine, rather, they consider their disciplines as supplementary to orthodox medicine.

130.Few practitioners of alternative medicine think their therapies should ..... .

a) be substituted for modern medicine
b) be a complement to modern medicine
c) be repeated by the medical establishments
d) be refused by modern health care systems

However, few developing countries have implemented primary prevention programs to encourage those healthy lifestyle choices that would mitigate chronic diseases or delay their onset. Rarely do developing countries have the appropriate medicines or adequate clinical care necessary to treat these diseases.

131.Many developing countries ..... to reduce chronic diseases.

a) have recently taken the necessary measures
b) have failed to provide continuing surveillance
c) adhere to suitable lifestyle choices
d) follow the long-term treatment regimens

The greater the resistance of tissues, the greater the heat generated. Although all tissues of the body are conductors of electricity, their resistance to flow varies inversely with their water content.

132.It is inferred from the first paragraph that tissues with less water …… those with more water.

a) are more resistant than b) have the same resistance as
c) are less resistant than d) have double resistance as

133.t is inferred from paragraph one that tissues which are more resistant to conductivity …… .

a) contain large amount of water b) are more prone to injury
c) can intensify the current d) diminish much of the heat

Numerous studies show that children who engage in regular physical activity do better in school than their sedentary classmates. Other studies have shown that sedentary adults, aged 63 to 82, improved their reaction times after 10-week water aerobics course. It's believed that young people stand to gain the most improvement in brain function from exercise.

134.Concerning the function of the brain, aerobic exercise seems to be most beneficial to the …… .

a) youth b) elderly c) middle age group d) kids

Since, at the molecular level, age is counted not as time but as the number of cell doublings, this effect of calorie reduction could be mediated by the slowing of cellular growth and, therefore, the lengthening of the time between cell divisions.

135.It is implied that the time between cell divisions …… .

a) is based on a fixed time interval b) can be shortened through malnutrition
c) is unaffected by caloric reduction d) slows down with overnutrition

Although the cause of obesity in children is similar to that of adults (i.e. more energy intake vs. energy utilized), emerging data suggest associations between the influence of maternal and fetal factors, during intrauterine growth and growth during the first year of life, on risk of later development of adult obesity and its complications.

136.The balance between received and consumed energy …… .
a) should be considered independently
b) has led to various illnesses, including obesity
c) shows priority of food quality over quantity
d) is a way of decreasing obesity

The participants were then quarantined for five to six days to see who got a cold or flu. People with high scores for positive emotional style were more likely to resist colds and flu and when they did get sick, their symptoms were reduced, the study shows.

137.Results of this study showed that …… .
a) patients with colds were not susceptible to the viruses
b) tense and angry participants could resist the infections
c) positive subjects were less susceptible to the viruses
d) the viruses had no effect on participants

Relatively small though they are, feet perform the work of giants. Next to the heart, the feet carry the greatest load of any part of the body. This fact is worth keeping in mind. No other structure could bear such a top-heavy burden for so long and without repairs as the delicate, ingeniously designed human foot. It is a wonder that things go wrong as rarely as they do, considering how poorly feet are understood or cared for.

138.It is implied that feet …… .
a) should be repaired regularly
b) are less vulnerable to injuries
c) are roughly designed
d) should be left unnoticed

Connecticut- based Cara Therapeutics recently released researches showing its opioid drug is far less likely to cause patients to feel high than a "control medicine" considered to have a low potential for abuse. Bob Twillman, deputy executive director of policy and advocacy for the American Academy of Pain Management, said he can envision Cara's drug eventually being prescribed instead of commonly abused painkillers.

139.Compared to the "control medicine", opioid drugs developed by Cara Therapeutics …… .
a) had greater potential for abuse
b) were less likely to cause addiction
c) could hardly affect patients
d) were less likely to reduce pain

Walking burns approximately the same amount of calories per mile as does running, a fact particularly appealing to those who find it difficult to sustain the jarring effects of long distance jogging. Brisk walking one mile in 15 minutes burns just about the same number of calories as jogging an equal distance in 81/2 minutes. In weight-bearing activities like walking, heavier individuals will burn more calories than lighter persons. For example, studies show that a 110-pound person burns about half as many calories as a 216 pound person walking at the same pace for the same distance.

140.It is implied that …… .
a) jogging is a better exercise than walking
b) brisk walking causes fewer hazards than jogging
c) running burns more calories than walking
d) walking gives people less pleasure than running

141.It is understood from the passage that …… .
a) heavier people get more injuries
b) running is not good for heavier individuals
c) jogging is harmful for heavier individuals

d) heavier people benefit more from walking

Those rising costs are an important reason why the number of uninsured keeps going up. Business finds it harder and harder to pay for employer health benefits, and only 61% of employers even provide them now (from a high a decade ago of close to 70%); and the employers who do provide benefits are cutting them and forcing the employees to pay more themselves in the form of copayments and deductibles.

142.With the rising costs of health care, business ..... the uninsured.

a) could afford for fewer number of
b) has updated new ways to pay for
c) currently pays for 70% of
d) has more obligations to pay for

Schizophrenia is often confused with multiple personality disorder, yet is quite distinct from it. Schizophrenia is one of the most common mental disorders, considerably more common than multiple personality disorder.

143.According to the information in the passage, schizophrenia is ..... than multiple personality disorder.

a) less common b) more prevalent c) more latent d) less distinct

This idea- that longer activity spans would be followed by longer sleeps and vice versa- does not find experimental support. The reverse is seen: long "daytimes" tend to be followed by shorter sleeps and vice versa.

144.Experiments have indicated that fewer work hours more likely result in ..... .

a) shorter sleep duration b) more sleep hours
c) sleeping deeply d) going to be late

145.After long durations of activity, contrary to our expectation, some people ..... .

a) may have shorter sleep duration b) are observed to need longer sleep
c) fall asleep sooner d) work less accurately

If a way could be found to "test" routinely the genes of prospective married couples-much as the couples now take Wasseremann tests to detect syphilis-the *toll* might be reduced drastically. This is the goal of genetic counseling. And while it is still far off, testing is expensive and elaborate, genetic counseling centers in hospitals and clinics across the United States are already helping parents.

146.Detecting syphilis is said to be ..... .

a) as complicated and expensive as testing genes
b) more significant and essential than testing genes
c) less complex and cheaper than gene testing
d) carried out less frequently than gene testing

Many people will have some problem with allergies or allergic reactions at some point in their lives. Allergic reactions can range from mild and annoying to sudden and life-threatening. An allergic reaction is more serious when severe allergic reaction occurs, when allergies cause other problems (such as nosebleeds, ear problems, wheezing, or coughing), or when home treatment doesn't help.

147.It is understood that certain types of allergies are ..... .

a)mild such as a runny nose and nausea
b)relieved by home treatment
c)server derived from trouble breathing and diarrhea
d)common when elicited by life threatening substances

Poorer people eat more refined foods and less fresh ones than those who are better off.

148.It is implied from the information in the paragraph that the foods taken by the rich people ..... .(00)

a)are less likely to cause obesity b)are full of junk particles
c)fail to support intense physical activity d)provide better psychosocial support

149.It is implied in this paragraph that ……. .

a) obesity is the sole result of excess consumption of sugar in any age group
b) excess use of sugar might bring about behavioral changes
c)sugar over-consumption definitely brings about acid over-secretion, resulting in diarrhea
d) gum diseases generally occur as the natural consequence of eating too much sugar

While some chromosomal abnormalities (such as Down syndrome) and infections during pregnancy are known to cause congenital heart disease, the new study shows that spontaneous gene mutations during fetal development affect the development of brain and heart, and may lead to congenital heart disease in children with healthy parents.

150.Down syndrome is mentioned as an example of ……. .

a) chromosomal defects b) pregnancy infections
c) congenital heart diseases d) inborn heart defects

In addition, infectious diseases have not disappeared and pandemics such as Avian bird flu threaten to occur at any time.

151.Avian bird flu mentioned in the passage is an example of …… .

a) regional diseases b) epidemiological trends
c) global diseases d) diseases of comfort

Young children can increase their muscular strength and endurance by using their own body weight. Push-ups, wall-sits and hanging from the monkey bars are a few examples.

152.Wall-sit is an example suggested for body strengthening, using ……. .

a) one's body weight b) external weight
c) one's bicep curls and body image d) fitness industry trainers

Treatment approaches to chronic pain include pharmacological measures, such as analgesics, antidepressants and anticonvulsants, interventional procedures, physical therapy, physical exercise, application of ice and/or heat, and psychological measures, such as biofeedback and cognitive behavioral therapy.

153.According to the passage, cognitive behavioral therapy is considered a kind of ……. for controlling pain.

a) physical therapy b) treatment approach
c) pharmacological measures d) occupational therapy

“People with astonishing memory for pictures, musical scores, chess positions, business transactions, dramatic scripts, or faces are by no means unique,” wrote Cornell psychologist Ulric Neisser in Memory Observed (1981). “They may not even be very rare.” Some university researchers including Polson and Ericsson, go a step further than Neisser. They believe that there are no physiological differences at all between the memory of Shereshevskii or Toscanini and that of the average person. The only real difference, they believe, is that Toscanini trained his memory, exercised it regularly, and wanted to improve it.

154.Shershvskii and Toscanini are mentioned as examples of……. .

a) the common people with ordinary memory
b) those who were born with unique memories
c) those exploiting their memories quite effectively
d) the pioneers advocating memory trainings

155.Ulric Neisser …… the idea that good memory is an exception.

a) clearly opposes b) ironically denies c) eagerly adopts d) cautiously advocates

156.According to such researchers as Polson and Ericsson, …… account for people's high levels of memory.

a) physiological differences b) regularly mental trainings
c) routinely performed physical exercises d) unique features of individuals

---

The goal of sport is triumph, whereas the goal of medicine is well-being and the pursuit of victory can threaten health. Two physicians commonly referred to as fathers of sports medicine- Galen, who started clinical practice as a physician for gladiators, and Hippocrates- were both critical of the lifestyle of professional athletes.

157.According to physicians, athletes’ obsessive desire to win the game …… .

a) is their ultimate goal b) may put their health at risk
c) is of prime importance d) may be health supporting

158.Galen and Hippocrates were two physicians who …… the lifestyle of professional athletes.

a) disfavored b) approved c) established d) neglected

نظرات	
نحوه پاسخ	ترجمه جمله

159.Ulric Neisser …… the idea that good memory is an exception.
a) clearly opposes b) ironically denies c) eagerly adopts d) cautiously advocates

160.The idea on lack of sleep expressed in this reading selection ……. what most people believe.
a) contrasts with b) approves of c) corresponds with d) incorporates in

161.It is stated that Donald's father's attitude toward male nurses …… .
a) is still basically negative b) is a sort of indifference
c) has become more strict d) has completely changed

162.The message conveyed in this text…… .
a) supports the traditional view on memories
b) integrates the new and the previous theories
c) favors the theory supported by new psychologists
d) remains neutral to the proposed theories

Contrary to popular belief, some research has shown that it is easier for people to make a comprehensive change in diet and lifestyle than to make only a moderate change.

163.According to this reading selection, the popular belief holds that a comprehensive change in diet and lifestyle …… .
a) establishes self-image drastically b) is difficult to achieve
c) can be made more easily d) makes us feel deprived

As a woman poet I disagree with the consensus that mental illness and creativity are linked.

164.The author claims there is a general view that creative people ……. .
a) reveal their inventiveness in writing poetry
b) disagree with what ordinary people believe or say
c) deny the link between creativity and mental illness
d) suffer from a kind of mental disorder

165.The stereotype relating creativity with mental illness is …….. by the author.
a) objected to b) approved of c) documented d) highlighted

Studies have shown that biofeedback can be just as effective as some of preventive medications we use. About 85 percent to 90 percent of patients with chronic headaches respond positively to biofeedback. Biofeedback also serves as an excellent bridge in assisting patients wean off medications.

166.Patients with lasting headaches …… biofeedback.

a) are more likely to benefit from b) are at a disadvantage regarding

c) should prefer preventive medications to d) would seldom receive training before they use

In a pilot study of 46 head-trauma victims, 52 percent of those given hypothermic therapy made a good recovery, compared with 36 percent treated with standard therapy at normal temperatures.

167.Head trauma patients are said to …… .

a) always suffer from neurological disorders b) inevitably require cooling therapy care

c) suffer neurologically within 24-48 hours d) be likely to recover if hypothermically chilled

168.Victims suffering head injuries are found to …… .

a) lack normal metabolism

b) have very irregular heartbeats

c) require traditional long-term treatments for complete recovery

d) have a better prognosis if their metabolic rate is reduced

169.In the study conducted …… .

a) 46 of 52 patients recovered fully

b) 36 patients responded only to standard treatment

c) the two types of treatment had similar results

d) the hypothermic patients responded better to treatment

In the third test of short-term memory, non-smokers made the fewest errors, but deprived smokers committed fewer errors than active smokers. In the fourth test, non-smokers were the best and deprived smokers bested those who had smoked a cigarette just before testing. As the tests became more complex, non-smokers performed better than smokers by wider and wider margins.

170.As the findings of this study showed, …… .

a) non-smokers outperformed the other groups in all tests

b) smokers performed weaker than the other groups in all tests

c) the deprived group performed better than the smokers in the last two tests

d) smokers functioned worse than the other groups in all tests

Once the data were adjusted for established cardio risk factors such as social class, obesity, smoking and family history of heart disease, the researchers found that participants who reported less frequent tooth brushing had a 70% extra risk of heart disease compared to individuals who brushed their teeth twice a day, although the overall risk remained quite low.

171.The results of this study showed that ..... .

a) inflammation in the body may cause clogged arteries
b)people with poor oral hygiene have an increased risk of heart disease
c) there has been increased interest in the links between heart problems and gum disease
d) medical history and family history of heart disease correlate with hypertension

172.The study proved poor oral health behavior to be a(n) ..... of cardiovascular disease.

a) cause b) associate c) risk factor d) investigation

What role then does genetics (heredity) play in asthma? A genetic link in asthma has long been suspected primarily due to "clustering" of cases within families and in identical twins. This does not prove a genetic cause, since it may also reflect shared environmental exposures. "Several studies" conclude that heredity increases your chances of developing asthma, particularly if allergies or other allergic conditions are present. Moreover, you may pass this tendency to asthma to the next generation. So, what are the chances that your child will develop asthma?

173.According to conclusions obtained from "several studies", heredity ..... in developing asthma.

a) proves ineffective b) has a blocking role
c) has a definite role d) plays a contributory role

A new study found that Americans who eat a diet low in potassium were about twice as likely to die from a heart attack, compared with those whose diets have high levels of the mineral. The study doesn't prove cause-and-effect, but it does suggest a role of potassium in health.
People who reduce their sodium consumption and increase their potassium intake benefit from improved blood pressure, and reduce their risk for developing other serious health problems.

174.Having read the passage, we understand that a diet high in potassium ..... .

a) causes heart attack b) might be healthier
c) is low in other minerals d) prevents myocardial infarction

---

High in toxic chemicals, secondhand smoke causes or contributes to a number of health problems, from cardiovascular disease to cancer. The Surgeon General reported in 2006 that scientific evidence shows there is no safe level of exposure to secondhand smoke. Breathing in the dangerous particles in secondhand smoke, which linger for hours, even for 20 or 30 minutes can harm you in a variety of ways, while over years it can be much more dangerous.

175.According to the text, documented data reveals ..... .

a) evidence confirming secondhand smoke causes cancer
b) toxic chemicals breathed in over years cause passive smoking
c) children breathe in less secondhand smoke than adults
d) any level of secondhand smoke could be unsafe

The participants were then quarantined for five to six days to see who got a cold or flu. People with high scores for positive emotional style were more likely to resist colds and flu and when they did get sick, their symptoms were reduced, the study shows. But people with high scores for negativity weren't especially vulnerable. This shows health and happiness are linked, although unhappiness does not necessarily cause more colds and flu.

176.In this study, health and unhappiness ..... .

a) affected both groups equally
b) were found to be directly associated

c) were found to have no relationship whatsoever in the pessimists
d) despite the inverse association, did not always cause more colds and flu

177.The participants with negative outlooks …… .
a) were highly sensitive to the cold and flu virus
b) had reduced symptoms following exposure
c) despite their attitude, were not highly vulnerable
d) resisted being exposed to the viruses

178.This study showed that …… .
d) atypical protein synthesis is linked to behavior inflexibility

179.We can conclude from the first part of the new study that …… .
b) there is a link between early-life antibiotics use and subsequent asthma

180.Many scientists …… links between sleep and hypnosis.
a) acknowledge the existence of numerous

181.It is implied that ……. .
b) the relationship between the body and mind has not been established well
d) the human physical and mental aspects are closely related

182.Experiments with placebos have ……. .
a) indicated the interaction between body and mind

183.The writer of this passage suggests that …… .
c) aging is somehow related to the cell damage caused by free radicals

184.McMahon hopes to find a relationship between …… .
c) winter light and the biological clock

185.The findings of the Caltech's study demonstrate that …… the performance of the employees.
b)excessive financial incentives can improperly influence
d)lucrative rewards are proved to potentially promote

186.In the experiment described in the passage, it is reported that …… .
c) sticking to an exercise program has been conducive to improvement of life quality

187.According to the information in the passage, the new research mentioned has led to …… the changes in tumor cells.
b) some insights into the origin of

188.The difference found in the study at the University of Pittsburgh supported the…… .
c) finding of the European Institute of Oncology

189.The research conducted by the researchers in the University of Zurich …… .
d) supported the finding of German researchers

190.Changes resulting from regular physical activity, once thought be due to increased self-confidence, are now claimed by some to be of a(n) ……. nature.
a) inappropriate b) static c) physiological d) psychological

191.The research conducted at Lund University …… .
a) confirmed the prevalent theory of genetic changes of tumor cells
b) discounted the already existing theory on the origin of genetic changes

---

پرتکرارترین مفهوم کنکوری

Much research has been carried out in recent years into sleep. We know a great deal about the mechanics of sleep and we are beginning to know about the biochemical changes involved. However, we are still a long way from finding out answers to such questions as how much sleep a person needs.
While the physiological bases of sleep remain very much a matter for conjecture, we do nevertheless have considerable evidence on how much sleep people do in fact obtain. We still need to know more about the kinds of effects that sleep deprivation causes. In spite of the considerable effort devoted to investigating why we sleep, there is still disagreement in this area.
The fact that sleep deprivation causes numerous harmful effects suggests that the body requires sleep to restore itself. However, more research is needed to determine whether this is so or whether sleep is the result of adaptation to the environment. There is also the possibility that two alternatives may not be incompatible.

192.Of the different dimensions of sleep, researchers have found more information on the …… .
a) physiological bases of sleep b) amount of sleep people need
c) functional aspects of sleep d) biochemical changes during sleep

193.In this text, the writer ……
a) calls for further research on sleep
b) compares and contrasts different theories of sleep
c) enumerates the shortcomings of the research done
d) presents new insights while standing against past studies

194.It is said that there is …… over why we sleep.
a) controversy b) consensus c) hard evidence d) no reference

195.Regarding the effects of sleep deprivation the writer …… .
a) favors the restoration theory b) defends the adaptation theory
c) tends to reject both theories d) argues that both theories may come true

196.The text implies that ……. .
a) in near future many mysteries over sleep will be detected
b) it is very improbable to find out the true nature of sleep
c) despite much research on sleep, there are many unresolved questions
d) scientists should ignore their disagreement to be able to reach a new

---

It is not clear how the duration of sleep could be controlled as regularly as is observed to be the case. Even though it might be argued that a regular life-style implies a regular degree of fatigue and so will require a regular amount of sleep, in practice, such a degree of regularity is not achieved.

197.Sleep experts have …… patterns of sleep duration.
a) only recently explored b) failed to control
c) lost hope for discovering d) successfully manipulated

There is little information on whether patients who already have developed cancer do or do not benefit from physical activity.

198.The relationship between post-cancer state and exercise is ……. .
a) vague b) definite c) mutual d) distant

Allergy is a condition of sensitivity to substance, chemically a protein, which is called an allergen. The allergic person reacts in a way that others do not, when they eat, inhale or touch the allergen. Allergy is a normal protective mechanism that has gone off the rails. It is a useful defense for the nose to pour forth its watery secretion to wash out a harmful irritant or bacterial toxin, but plain maddening if it does the same thing for a grain of Timothy grass pollen.
Why some and not others should react in this violent way is still a mystery. Hereditary disposition is of indisputable importance in many cases, but the form the allergy takes may vary from parent to child, e.g.,

an asthmatic father may have a daughter who is allergic to bee stings. A common story in an allergic person is of eczema in infancy, hay fever or rhinorrhea in later childhood, and asthma as an adult.

199.Factors accounting for allergy are …… .

a) left to the reader to identify
b) far from being resolved
c) reportedly confined to heredity
d) enumerated in the text

In this disease, fluid leaks from small blood vessels and accumulates in the tiny air sacs in your lungs. Your lungs are then unable to fill up with enough air. Because of this, the blood traveling to your lungs can't pick up the amount of oxygen it needs to carry to the rest of your body. That can lead to organs such as your kidneys or brain not working as they should or shutting down. Doctors are still trying to learn more about this condition and why it happens. It's not always clear what triggers a case.

200.The passage concludes that the underlying cause of ARDS is ..... .

a) still a mystery b) a respiratory failure c) easily detectable d) highly preventable

What role then does genetics (heredity) play in asthma? A genetic link in asthma has long been suspected primarily due to "clustering" of cases within families and in identical twins. This does not prove a genetic cause, since it may also reflect shared environmental exposures. "Several studies" conclude that heredity increases your chances of developing asthma, particularly if allergies or other allergic conditions are present. Moreover, you may pass this tendency to asthma to the next generation. So, what are the chances that your child will develop asthma?

201.Familial cases of asthma are among the examples …… genetic predisposition.

a) indicating the improbability of
b) failing to conclusively support
c) confirming superiority of environment over
d) rejecting both environmental influence and

However, we are only beginning to understand what elements of health education programs make those programs successful, and as yet, we have little understanding of the mechanisms by which interventions effect behavior and health status.

202.According to this paragraph, …… .

a) so far, the influences of health education on behavior seem doubtful
b) our knowledge about the kinds of interventions promoting health status is very limited
c) behavior and health status can be affected by health education only if we have a healthy life
d) interventions fail to affect behaviors and health status unless they are easily understandable

Schizophrenics often live in a fantasy world where they hear voices that others cannot hear, often voices of famous people. Schizophrenics tend to withdraw from families and friends and communicate mainly with the "voices" that they hear in their minds.

It is common for the symptoms of schizophrenia to develop during the late teen years or early twenties, but the causes of schizophrenia are not well understood. It is believed that heredity may play a part in the onset of schizophrenia. In addition, abnormal brain chemistry also seems to have a role; certain brain chemicals, called neurotransmitters, have been found to be at abnormal levels in some schizophrenics.

203.It is said that the medical profession is still unsure about the ……. of schizophrenia.

a) approximate onset time
b) signs and symptoms
c) exact etiology
d) prevalence

In fact, one study demonstrated an increased risk of lung cancer in male smokers who took antioxidants vs. male smokers who did not supplement. Whether this effect was from the antioxidants is unknown but it does raise the issue that antioxidants may be harmful under certain conditions.

Antioxidants are also thought to have a role in slowing the aging process and preventing heart disease and strokes, but the data is still inconclusive. Therefore, from a public health perspective it is premature to make recommendations regarding antioxidant supplements and disease prevention. New data from

ongoing studies will be available in the next few years and will shed more light on this constantly evolving area.

204.The writer recommends further research into ……. .

a)cancer prevention b)fruits and vegetables
c)antioxidant properties d)food supplements

Results of the study using deep brain stimulation, a therapy already used in some patients with Parkinson's disease and depression, may offer hope for some with AD, an intractable disease with no cure.
AD is a progressive and lethal dementia that mostly strikes the elderly. It affects memory, thinking and behavior. Estimates vary, but experts suggest that as many as 5.1 million Americans may have AD. Smith says decades of research have yet to lead to clear understanding of its causes or to successful treatments that stop progression.

205.The treatment targeting Alzheimer's so far ……. .

a) remains to be well settled b) substitutes Parkinson's remedy
c) is rather conclusive d) is quite optimal

206.The researchers are ……. .

a) far from understanding what underpins Alzheimer's
b) still looking for a device stimulating the brain
c) estimating the exact number of Alzheimer's sufferers in the world
d) making progress toward what strikes the elderly

Not everyone in the medical community is satisfied with the new therapies. Conservatives are seriously worried that the new drugs are, in fact, merely placebos or worse, are actually detrimental to patients' health. Their concerns are understandable.

207.Regarding the use of drugs for weight loss, ……. .

a) there is controversy among authorities
b) conservatives advocate the prolonged use of them
c) most doctors prefer them with diet and exercise
d) most officials have come to an agreement on their use

So, the hunt is on for the cause of the decline in literacy. The search so far has focused on socioeconomic factors, or the effectiveness of 'traditional' versus 'modern' teaching techniques.
The fruitless search for the cause of the increase in illiteracy is a tragic example of the saying "They can't see the wood for the trees".

208.The author believes that researchers have ……. .

a) failed to detect the main cause of illiteracy
b) recommended the use of fewer picture books
c) supported the use of more texts in school books
d) come to an agreement on causes of illiteracy

The steady increase in childhood poverty and the growing number of children in single-mother households make it urgent to inquire into the complex relationships of children's health with family structure, social class, and race. Higher rates of mortality, morbidity, and disability are known to be associated with lower income, less education, lower occupational level, racial or ethnic minority status, and other social class variables.

209.The writer mainly calls for ……. .

a)interviews and examination of children with low income and low education
b)investigation on the interrelation between poverty and health issues in children
c)studies on the socioeconomic burden on children's life and future
d)research on single mother households with problems in relationship with their children

The musculoskeletal system is made up of bones, muscles, joints, tendons, and connective tissue which work together and enable the body to full range motion. “Most clinicians are unaware that the sex differences associated with the problems in this system are the result of inherent differences in biology at the cellular and molecular level,” said Dr. Tosi, an orthopedic surgeon.
According to her research article, these differences are not solely due to hormones. Dr. Tosi said, “There is a biological basis for the differences in injury mechanism, pain sensation, healing response, etc. that cannot be explained simply by hormone levels. Responses to therapy, for example, surgery, anesthesia, rehabilitation, etc. also differ with sex. “Despite the fact that studies have confirmed the higher prevalence of chronic MS disorders in females, little is known about why this is the case. According to Dr. Tosi and her colleagues, more research is required to explore these important issues.

210.What is still unclear concerning MS disorder is the relationship between …….. .

a) sex and incidence b) motion and hormones c) sensation and sex d) hormones and biology

211.According to Dr. Tosi, attributing gender differences in musculoskeletal health to hormones …….. .

a) is quite convincing b) is in its infancy
c) has been established d) has been acknowledged

212.The author of this article calls for further …….. .

a) bone health programs to be held b) research to be conducted in the field
c) retention of higher prevalence of MS in women d) conventions to be held on this issue

---

Approximately one in four Americans will suffer from a neurodegenerative disease, and virtually all Americans will have a family member with one of these conditions.
Unfortunately, the underlying mechanisms of neurodegeneration- and how they lead to disease- are not well understood.

213.The main cause of neurodegenerative disease is ……. .

a) recently understood b) not so significant
c) yet to be identified d) about to be declared

Natasha Stewart, the charity's senior cardiac nurse, said: “This research indicates that there may be an increased risk of having a heart attack for people who take calcium supplements. However, this does not mean that these supplements cause heart attacks. Further research is needed to shed light on the relationship between calcium supplements and heart health.”

214.Natasha Stewart in her statement …….. .

a)points to other research supporting the new finding on calcium supplements
b) calls for more investigations on the issue under discussion
c) refers to another finding which is in contrast with that of German researchers
d) reviews the literature of the studies on calcium supplements

---

Face-to-face training in PPE use is recommended as the most effective strategy to reduce errors. But to find out which combinations of PPE protect best, we still need further research findings, simulation studies with more participants, and more real-life evidence.

215.The author of the passage ..... the best combinations of PPE protection.

a)approves health workers' suggestions on b)calls for more studies and evidence for
c)provides more satisfaction with d)wants infected patients to avoid

---

There is still much uncertainty and disagreement among experts about overuse of the internet, the symptoms, how to measure it and even the language used to describe it. Yet many people are experiencing problems and many parents are concerned about their children. As technology continues to evolve, further research may help clarify these questions and identify tools to help families.

216.It is understood from the passage that ..... the Internet gaming disorder.

a) the findings are conclusive on
b) parents are hopeful as the results are promising on
c) there is a controversy on the concept of
d) technology will help find a reliable definition for

Other researchers reasoned that the weak to modest link between negative events and health outcomes was because there were important types of stressful experiences that were not captured by checklists of life changes. More comprehensive measurement of stressors might help to explain the higher rates of illness, injury, disability, mortality, psychological distress, and psychiatric disorder found in lower status and disadvantaged social groups in the population.

217.Further research is recommended to understand the reasons behind ..... .
a) the presence of psychological distress among different social classes
b) the high frequency of illnesses and disabilities among patients
c) important types of stressful experiences though life change checklists
d) the presence of illness among certain types of people

The user develops larger appearing muscles, increased body weight, and body water, but reports on the effectiveness in improving performance have been conflicting. Many valid studies have failed to demonstrate any improvement in performance.

218.Based on the writer's concluding remarks, ...
a) ergogenic substances can be harmlessly used by athletes
b) ergogenic substances lead to substantial improvement in performance
c) there is controversy on the possible impact of ergogenic substances
d) athletes' performance can be definitely attributed to the use of ergogenic substances

However, the availability of HGH and other products of biotechnology raises an ethical question.

219.The writer states that cloning the gene for HGH is..... .
a) quite detrimental b) categorically beneficial
c) abnormally problematic d) ethically controversial

While these efforts have contributed significantly to broadening our comprehension of the subject, there is nonetheless disagreement between theorists and many hypotheses that remain to be fully substantiated.

220.Regarding the sources of creativity, the current view is that ..... .
a) one's individual characteristics are the most important factors
b) the social environment where one is brought up is more significant
c) cognitive processes are the underlying source
d) we have failed to definitely determine them

221.One problem regarding identifying the sources of creativity is the ..... .
a) compromise achieved in forming theorists
b) ambiguity of creativity definition
c) existence of hard and fast rules
d) limited variables affecting creativity

222.It is said that the hypotheses on the sources of creativity are ..... .
a) quite comprehensive b) too general to prove
c) limited in most aspects d) yet to be verified

There is considerable disagreement in the scientific community about whether adverse health effects are actually caused by indoor mold, though most seem to agree that spending time in damp/moist environments can contribute to such respiratory illnesses as allergy, asthma, cough, runny nose, and sinus

conditions. Whether these illnesses are caused by mold, mold by-products, dust mites, chemicals emitted from deteriorating surfaces, or indoor air pollution, remains a subject for further research.

223.Scientists ..... indoor mold's adverse health effect.

a) remain confident about b) remain silent on
c) disagree about d) fully approve

Influenza is as unpredictable as its pandemics. We know nothing about the pathogenic potential of the next pandemic type. We do not know if the next pandemic will be caused by the current disease, HSN I, or by another influenza type. We are unaware of how the next pandemic will evolve over time, how rapidly it will spread around the world, and in how many waves. We do not know which age groups are at the highest risk of severe outcomes. We have no idea whether the next pandemic will kill 2, 20, or 200 million people.

224.The second paragraph mainly deals with ……

a)The serious outcomes of influenza b)pandemic in previous years
c)the time and magnitude of the next pandemic d)lack of information about future pandemics

The exact causes of mental disorders are unknown, but an explosive growth of research has brought us closer to the answers. We can say that certain inherited dispositions interact with triggering environmental factors. Poverty and stress are well-known to be bad for your health- this is true for mental health and physical health. In fact, the distinction between "mental" illness and "physical" illness can be misleading. Like physical illnesses, mental disorders can have a biological nature. Many physical illnesses can also have a strong emotional component.

225.The second paragraph deals mainly with the ……of mental disorders.

a)etiology b)complications c)prevention d)treatment

226.It is stated that researchers ..... the causes of mental illnesses.

a) have been confused on b) have documented
c) are optimistic about finding out d) are going to rule out genetic factors as

227.This passage mainly deals with the ..... .

a) controversies over the use of cloning b) future of medical advances, especially cloning
c) complementary effects of medical advances d) appropriate and inappropriate use of HGH

228.The text is mostly about ……. intelligence.

a) subparts of b) ways to enhance c) controversy over d) ways to measure

"If we can effectively replace these drugs", he said", that would be a game- changer".
Gavril Pasternak, an opioid researcher, said about a dozen drugs are being developed with the same goal of being non-addictive or vastly less addictive- although more research is needed.
The question of whether fiber protects against colon cancer in people has been controversial; some studies suggest a link between a high-fiber diet and a reduced risk of the disease, while others show no such link.

به جزء	
The passage discusses all of the following EXCEPT……. Which of the following is NOT mentioned as……..? According to the passage, excessive exposure to UV is unlikely to cause ..... . The writer fails to include ..... in the environmental movement.	صورت سوال
ترجمه جملات	نحوه پاسخ
	نکته طلایی

Growing evidence suggests an interrelationship between dementia on one side and Non-Communicable Diseases (NCDs) and behavioral risk factors- such as physical inactivity, unhealthy diets, tobacco use and the harmful use of alcohol- on the other.

229.All of the following are among the behavioral risk factors EXCEPT……(02)

a)harmful nutrition b)the use of tobacco
c)physical activity d)alcohol abuse

کلمات تاکیدی	
	نکته
	نکته طلایی

230.Based on the writer's concluding remarks, …… .

a) ergogenic substances can be harmlessly used by athletes
b) ergogenic substances lead to substantial improvement in performance
c) there is controversy on the possible impact of ergogenic substances
d) athletes' performance can be definitely attributed to the use of ergogenic substances

231.It is implied in the passage that cloning …… .

a) is going to be dismissed because of ethical questions
b) will definitely overcome the ethical questions
c) has resulted in some new physical and psychological problems
d) can be used to overcome some medical conditions

232.The death rate following Ebola disease …… .

a) is definitely predictable depending on the affected area
b) is highly increased in the first few days of contraction
c) fails to be controlled under the current circumstances
d) could be controlled through proper care and therapy

233.It is understood from this paragraph that the studies of human evolution…… .

a) should be based on historical records entirely
b) were static in the past rather than dynamic
c) must focus on archives while forming preconceptions
d) have mostly improved through archeological findings

234.It can be implied from the passage that …… .

a)the more one eats, the more he/she is liable to obesity
b)parents must avoid giving sugary foods to their children
c)solid foods, especially cereals, are the main cause of obesity
d)obesity can begin from the childhood period

235.According to the writer, …… .

a)the weight gained through consumption of sugar is inevitable
b)the excess consumption of sugar might give rise to both physical and mental disorders
c)refined sugar must be included in our diets to avoid obesity
d)over-consumption of sugar renders the individuals liable to unmanageable risks

236.According to the text, for treating breathing-related sleep disorder, one …… .

a) should merely resort to physical treatments b) can also consider psychological approaches

c) must consult a psychologist first d) should ignore alternative lifestyles

237.It is implied that ……. .

a) placebos are more effective than true medicine in most cases
b) the relationship between the body and mind has not been established well
c) placebos must be prescribed to avoid side-effects of the drugs
d) the human physical and mental aspects are closely related

238.It is stated that consumers ……. .

a) should trust the information provided by the manufacturers
- b) must be cautious about the labels when buying a product

c) are in favor of misleading labels on their desired products
d) usually misuse the information on the labels of most products

239.If we intend to have a movement, ……..

a)all muscles must become relaxed in the area to be moved
b)chemicals should be diminished in nerve endings
- c)tension must be increased in some muscles and decreased in others

d)a local reflex action is influenced and supported by muscles

---

240.The text implies that biofeedback ……. some preventive medications.

a) should take the place of b) should be used in the absence of
c) can be an alternative to d) can hardly be as effective as

241.Changes in the environment can ……. the human's exposure to pathogens

a) either increase or decrease b) both neutralize and diminish
c) have allegedly little impact on d) hardly maximize the rate of

242.Based on the text, old adults with depressive disorder would ……..

a)experience complicated chronic diseases b)have a desirable course of aging
c)rarely be admitted as an outpatient d)hardly suffer impaired social performance

243.Alcohol-related problems ……. .

a) affect men and women similarly
b) may have some beneficial effects on women
c) hardly affect women with heavy alcohol consumption
d) have involved males more than females

244.A fortunate and healthy person is someone who ……. .

a) can manage life issues successfully b) is lucky enough not to face problems
c) is unwilling to exploit good times d) hardly faces or copes with the bad

245.Emotional tolls on those involved in traumatizing events ……. .

a)can never return to a state of equilibrium
b)can hardly ever be resolved
c)have their roots in common events in life
d)necessarily lead to physical and mental damages

246.The findings of the study revealed that ……. .

a) the quality of events in more effective than their quantity
b) the quantity of events affects people differently
c) people facing high numbers of events are hardly affected
d) people exhibit strong reaction to the events

247.According to the passage, scientists have discovered that influenza viruses ……. .

a) cause ill health in wild birds

b) do not necessarily cause symptoms in birds
c) are rarely present in wild birds
d) weaken when transferred from animals to man

248.According to this reading selection, the body chemistry …… .
a) is rarely affected by one's belief in what the drug does
b) may undergo change when one thinks it does
c) affects people's attitude towards drugs and placebos
d) produces necessary changes in the drug taken

249.Health insurance companies ..... all cancer costs.
- can hardly afford

b) would highly benefit from
c) would normally cover
d) seem to be unaware of

250.Chronic pain is ..... .
a) severe or mild based on the duration of its symptoms
b) a subcategory of pain based on its clinical context
- c) a discomfort that rarely heals in the expected period

d) limited in duration and comes after serious injuries

251.Patients with lasting headaches …… biofeedback.
a) are more likely to benefit from
b) are at a disadvantage regarding
c) should prefer preventive medications to
d) would seldom receive training before they use

252.According to the passage, ……. .
a)in cancer both the disease and its treatment symptoms need to be control
b)oncology patients are all satisfied with the level of functioning when they are under treatment
c)cancer patients can be satisfied with their quality of life merely when they can function well
d)cancer patients enjoy a good quality of life if oncology nurses understand them

253.Antigen and antibody detection methods for mpox is not preferred because in these methods ……
a) polymerase chain reaction is merely used for bacterial diseases
b) orthopoxviruses cannot be differentiated from each other
c) taking diagnostic specimens from the rash is not effective
d) it is not feasible to obtain specimens

254.The writer's purpose by mentioning the spread of AIDS in 1981 was to indicate that .....
a)hepatitis C virus was a more dangerous disease than AIDS at that time
b)there were other viruses that human beings had to overcome as well
c)the rise of AIDS accelerated the process of declining infectious diseases
d) having defeated infectious diseases, scientists merely focused on AIDS

255.The writer of this paragraph mostly supports ……. in the study of human origin.
a) the use of historical records
b) speculating merely on the basis of preconceptions
c) interpreting older data and forming assumptions
d) the application of molecular genetics

256.The example of bacitracin indicates that ……. .

a) in some cases a new discovery may be due to chance
b) discovering a new drug requires persistence and hard work
c) the body can protect itself in any type of infection
d) designing a new drug is most frequently limited to medical schools

257.It is understood from this paragraph that studies of human evolution ..... .
a) are limited to historical records
b) tend to be dynamic nowadays
c) should be based on archives
d) should be based on archeological findings

258.As the first paragraph indicates, the health of different age groups seems to be ..... .
a) a multifactorial phenomenon
b) mainly determined by therapeutic factors
c) a therapeutic care issue
d) limited to economic condition

259.According to egalitarian theories, health services should be ..... .
a) distributed differently from other resources
b) evenly available to different individuals
c) limited to the most vulnerable groups
d) accessible to similar groups of people

260.The employment of skilled and enthusiastic personnel ..... .
a) is a challenge in developed and developing countries
b) has already been resolved in developed countries
c) is limited to the Middle Eastern countries
d) has limited financial costs

261.The author suggests that physicians ..... .
a) should prescribe inexpensive medicines
b) should not undervalue new medications
c) must be limited to laboratory- approved drugs
d) must not prescribe calcium channel blockers

262.According to the passage, which of the following is true?
a)NCDs are limited to behavioral risk factors
b)formal education contributes to NCDs development
c)air pollution can contribute to dementia development
d)depression is a behavioral risk factor of NCDs

263.In the production of influenza vaccines we have to change the strains almost every year as these viruses .....
a)escape haemagglutinin
b)neutralize neuraminidase
c)undergo a number of degenerations immediately
d)remain hidden from the antibodies present in blood

264.It is stated that those whose blood pressure rises at high altitude ..... .
a) should take it seriously and return to lowland places immediately
b) are likely to experience gradual normalization of blood pressure
c) may suffer hypertension perpetually as long as they are there
d) probably already have a family history of BHP

265.Smoking mothers are recommended to ..... .
a) quit their children
b) move to another room
c) stop smoking immediately
d) stop smoking indoors

266.The individual suffering from TGA …… .
a)will suffer amnesia in the long run
b)can retain things in his/ her mind temporarily
c)immediately recalls what happens after the attack
d)ultimately recovers his/ her memory

267.Symptoms such as nausea and dizziness in a heat exhaustion victim indicate that the person most likely needs to ..... .
a) be immediately taken to a hospital. b) be given more salt water.
c) be immersed in a tub of water. d) sweat more and more.

268.According to the passage, chronic long-term pain …… .
a) needs cooperation of the team members of pain management
b) resolves immediately after treating the underlying trauma
c) is an interdisciplinary branch of science
d) persists after the injury or pathology has healed

269.The writer believes that, in the field of health education, pain …… .
a) must be eliminated immediately b) is discouraging and embarrassing
c) has been inadequately considered d) might be an enhancing factor

---

Despite its popular acceptance, the theory that lack of exercise causes obesity lacks evidence.

270.The author ..... the theory that overnutrition and lack of physical activity are the main causes of obesity.
a)puts doubt on b)partly agrees with c)provides evidence for d)clearly opposes

---

Another myth is that the vagueness of psychiatric features make diagnosis impossible. In fact, psychiatric diagnoses based on current classification systems are highly reliable.

271.The writer …… the idea that mental disorders are difficult to diagnose.
a) clearly questions b) implicitly supports
c) takes a neutral view on d) takes a biased view regarding

“People with astonishing memory for pictures, musical scores, chess positions, business transactions, dramatic scripts, or faces are by no means unique,” wrote Cornell psychologist Ulric Neisser in Memory Observed (1981).

272.Ulric Neisser …… the idea that good memory is an exception.
a) clearly opposes b) ironically denies
c) eagerly adopts d) cautiously advocates

273.Health professionals …… of pain mechanism.
a) have already identified the secrets b) still lack a clear knowledge
c) are no longer interested in the study d) clearly challenge modern theories

---

274.The writer of the passage remains ..... the effect of music on brain activity and learning progress.
a) unaware of b) skeptical about c) in favor of d)clearly against

---

تئوری ها	
	نکته طلایی

In the years since it was first proposed, the free radical theory of aging has gained wide acceptance. But hypotheses that attempt to explain exactly how free radicals are involved in the aging process are muddled by the lack of a clear definition of aging.

275.According to this passage, free radical theory of aging is ..... .

a) rejected by some scientists due to confusions as to its definition
b) accepted by some scientists but some aspects of it should be clarified
c) questioned by some scientific communities due to its drawbacks
d) mainly accepted by those who consider aging as a programmed process

---

The fact that sleep deprivation causes numerous harmful effects suggests that the body requires sleep to restore itself. However, more research is needed to determine whether this is so or whether sleep is the result of adaptation to the environment. There is also the possibility that two alternatives may not be incompatible.

276.Regarding the effects of sleep deprivation the writer ..... .

a) favors the restoration theory b) defends the adaptation theory
c) tends to reject both theories d) argues that both theories may come true

---

277.The pattern theory is a/an ..... the gate control theory.

a) duplicate of b) modified version of c) alternative to d) substitute for

SHAHREZA

تمرینات تکمیلی

In addition to genetic ties to lifespan, diet has been shown to substantially affect lifespan in many animals. Specifically, caloric restriction (that is, restricting calories to 30-50% less than an *ad libitum* animal would consume, while still maintaining proper nutrient intake), has been shown to increase lifespan in mice up to 50%.

278.It is understood that the paragraph preceding this text discussed the effects of……. .

a) nutritional factors on life expectancy b) environmental factors on health issues
c) heredity on longevity d) lifestyle on people's health

Narcissistic Personality Disorder (NPD) is a mental disorder in which people have an inflated sense of their own importance and a deep need for admiration. Those with narcissistic personality disorder believe that they're superior to others and have little regard for other people's feelings.

279.The two characteristics mentioned in the first sentence are …… .

a) key features of Narcissistic Personality Disorder
b) needed for an understanding of other mental disorders
c) issues suppressed by those having a sense of specialness
d) the reasons why such people are deeply admired

As the COVID-19 pandemic spreads to the world's poorest regions, the weakest countries will be affected the hardest by adding a serious health and economic crisis to existing poverty and climate crises.

280.The first sentence of the passage mainly deals with ..... in the poorest countries.

a)climate change caused by Covid-19 b)treatment difficulties of Covid-19
c)serious consequences ofCovid-19 d)rapid spread of Covid-19

If stress is inevitable, and if too much stress is a threat to our psychological and physical well-being, then coping well with stress is of paramount importance. A healthy and happy person is someone who can enjoy the good times and cope with the bad.

281.The first sentence ……. successful management of stress.

a) discusses the risks involved b) serves as a threat to
c) underestimates the significance of d) acknowledges the need for

---

In the developed world, targeting three disease-linked behaviors could provide huge benefits in human and financial terms. The first of these is tobacco smoking, causing death through lung cancer and vascular disease as well as chronic obstructive pulmonary diseases.

282.The first sentence implies ..... unhealthy habits.

a) the necessity of change in people's b) minimizing the huge benefits of
c) discovering three diseases leading to d) the provision of three behaviors causing

---

Nurses must be alert in transcribing the physicians' telephone orders because there are periodic contradictions between what physicians claim they ordered and what nurses allege they ordered. Orders should be repeated, once transcribed, for verification purposes.

283.The first sentence focuses on ..... .

a) physician's role in taking correct telephone orders
b) significance of taking telephone orders accurately
c) reasons why orders may be misinterpreted
d) difference between physicians and nurses

The EMT must be on guard and not make assumptions about the patient merely by his appearance or where he is found. A carefully taken history and a thorough physical assessment are vital to identification of serious alcohol-related problems.

284.The last sentence mainly deals with ways of ……. .

a) obtaining a life history b) achieving proper diagnosis
c) removing alcoholic problems d) performing physical assessment

---

This can lead to diarrhea, particularly in those who suffer from irritable bowel syndrome. Given the risks involved in consuming sugar, it would make sense to try to keep sugar intake to a minimum.

285.The last sentence means ……. .

a)recommendations related to consumption of sugar should be given to everybody
b)we should make everybody sensible about the risks involved in consuming sugar
c)considering the dangers of using too much sugar, one had better lower his/ her sugar consumption
d)consuming sugar gives people the rationale to minimize its use

---

She argues that, "Not infrequently, medically defined notions of optimal female health, have justified the practice of viewing female physiological functions as requiring prescribed and/ or delimited levels of physical activity and restricted sporting opportunities.

286.The last sentence mainly focuses on …… women's participation in sports.

a) medical profession's role in providing opportunities for
b) proof of better physiological functions due to
c) optimal female health virtually obtained following
d) medical profession's role legitimizing restrictions on

But of all these marvels, it is gene splicing that scientists consider the most exciting. Says the university of Zurich's Charles Weissman, 50, who in 1980 became the first scientist to make bacteria produce a facsimile of human interferon (a possible weapon with which to attack cancer): "Biology has become as unthinkable without gene splicing techniques as sending an explorer into the jungle without a compass."

287.The last sentence by Prof. Weissman means ……. .

a) the jungle is as important to an explorer as biology to genetic engineers
b) interferon is as vital to biology as a compass to an explorer in a jungle
c) gene splicing henceforth will be a fundamental part of biology
d) an explorer should not enter a jungle without a compass

Despite the large burden, only 28 % of low - income countries have a dedicated policy for neurological diseases in comparison with 64 % of high - income countries, originating from insufficient resources with unacceptably high treatment gaps for neurological conditions. For example, in low- and middle - income countries, there are only three adult neurologists per 10 million people, while high - income countries have approximately 160 times more. Countries, therefore, should develop strategies to reduce associated mortality, morbidity and disability.

288.The writer closes the passage by ..... (02)

a) reminding governments of their roles in reducing the disease burden
b) comparing the situations in low - income and high - income countries
c) providing practical solutions to reduce mortality and morbidity
d) complaining about lack of resources in low - income countries

---

Despite multiple tests showing that the one test was a false positive, she's still on the Do not Donate list for blood. Imagine that, instead, one of the overseas date entry people confused your records for someone with the same name who has a terminal disease. How many times will you get rejected for insurance because the company database shows you have a pre-existing condition?

289.The last sentence ..... the way people's insurance data is handled.

a) criticizes b) supports c) ignores d) favors

When teachers use picture books, they are simply continuing a long-established tradition that is accepted without question. And for the past two decades, illustrations in reading primers have become increasingly detailed and obtrusive, while language has become impoverished - sometimes to the point of extinction.

290.The last sentence of this reading selection indicates that the writer ……. .

a) is in favor of illustrations in reading primers
b) supports continuing traditional approaches
c) supports the use of modern teaching techniques
d) is critical of the contents of reading books

It is estimated that annual investment in malaria control and elimination will need to increase to 6.4 billion US dollars per year by 2020 to meet the first milestone of 40% reduction in malaria incidence and mortality rates. Annual investment should then further increase to 7.7 billion US dollars by 2025 to meet the second milestone of a 75% reduction. To achieve 90% reduction goal, annual malaria spending will need to reach an estimated 8.7 billion US dollars by 2030.

291.The last sentence ..... in achieving the intended goals. (00)

a) rules out 2030 as the intended time b) highlights the importance of investment
c) refers to the writer's lack of hope d) shows the funds already available

The crucial step which gave 'life' to these chemical factories was the evolution of mechanisms for self-replication accompanied by information transfer. Once the cell could divide, and pass on information so that products of the division would also behave like the parent, the basic features of life had been achieved.

292.The last sentence implies that life began ……. .

a) when most cells achieved some common features
b) once the cells were able to divide themselves
c) as cells learned to like parents
d) after cell division and information transfer occurred

This may not be too surprising, but health education practices by physicians also tend to be associated with such background characteristics as specialty and type of practice. In general, more prevention activities are carried out by non-surgeons, non-fee-for-service physicians, and women physicians.

293.The information in the last sentence of this reading selection ……. the information in the preceding sentence.

a) contradicts b) illustrates c) questions d) criticizes

Public expenditure on weapons research approaches billions of dollars a year and occupies more than a million scientists and engineers throughout the world. This is a greater research effort than on anything else on Earth, and is more than **that** on the problems of energy, health, education, and food combined.

294.The underlined word "that" refers to ..... .

a) anything else b) research effort c) public expenditure d) main priority

As we understand the brain in greater detail, we are able to develop drugs that stimulate it. This has proven a life-saver for the millions of people with attention deficit disorder, and could be a tremendous breakthrough for those suffering from Alzheimer's disease.

It could also be of great use to normal people. If a pill could improve your memory, focus and concentration - why not take it? This also leads to a slippery slope. You can imagine a workforce where it is the culture to take performance enhancers routinely, and your boss yelled at you if you didn't do so as well.

295.The underlined word "It" directly refers to …… .

a) developing new drugs b) understanding the brain better
c) stimulating the brain d) suffering from Alzheimer's

Among numerous care facilities, home health care is one of the fastest growing segments of the healthcare industry. Alternatives for home care can meet both the medical and non-medical needs of a patients. **These services** are provided to patients and their families at home or place of residence.

296.The underlined phrase "These services" refers to …… (01)

a)care facilities b)growing segments
c)medical and non-medical needs d)alternatives for home care

In health forums, one frequently hears government authorities stating that "Brazil is not a poor country, it is an unjust one". Although **this acknowledgement** is a positive fact, dealing with this situation is still far from satisfactory.

297.The underlined term "this acknowledgement" refers to …….. . (01)

a)positive fact
b)what one learns
c)Brazil, an example of a poor but a just country
d)Brazil being a rich but an unjust country

A jet fighter for $40 million is the equivalent of 50,000 pharmacies in poor countries. Public expenditure on weapons research approaches billions of dollars a year and occupies more than a million scientists and engineers throughout the world. This is a greater research effort than on anything else on Earth, and is more than **that** on the problems of energy, health, education, and food combined.

298.The underlined word "that" refers to …… . (00)

a) anything else b) research effort
c) public expenditure d) main priority

In the present busy world, doctors do not always take the time to explain illnesses and possible remedies to their patients; they may not give scientific details in simple words, either. Accordingly, many people use Internet resources to find what they need to know for better medical decisions. But are the recommendations of "experts" on the Net always accurate and reliable? Are **they** helpful to everyone that needs advice on a specific medical condition?

299.The word they in paragraph 1 refers to …… . (00)

a) some medical decisions made by the doctors who use the Internet
b) medical suggestions of the experts on the Internet
c) some experts on the Internet
d) the online health products

So by simply "doing their thing" in nature they frequently can render our food supply unfit for consumption. To prevent **this** we minimize the contact between microorganisms and our food (i.e. prevent contamination) and also eliminate microorganisms from our foods or at least adjust conditions of storage to prevent their growth (preservation).

300.The word "this" in the last sentence refers to……. .

a) doing their thing in nature b) supplying unhealthy food
c) rendering our food supply unfit d) consuming unfit food

It is not hard to understand why the principle of confidentiality is important to both doctor and patient. The doctor must depend on the frankness and openness of the patient in order to make an accurate diagnosis. **This** often requires that the patient reveal embarrassing facts about himself.

301.The word "This" (line 3) refers to …… .

a) revelation of the diagnosis b) patient's frankness and openness

c) principle of confidentiality d) doctor's frankness

Many people fear that the joining of databases will lead to insurance providers barring from coverage people with certain genetic predispositions, or massively increasing their premium. **This** can be exacerbated by the fact that the mechanism of the genes isn't always well understood, even by the doctors and the medical experts hired by the insurance companies, let alone chief executive officers who just read something in Time magazine about one gene determining whether you get cancer.

302.The underlined "This" refers to ..... .

a) joining of databases
b) unauthorized access
c) barring people from coverage or increasing their premium
d) people with certain genetic predispositions or their premium

Nowhere in the study of human biology are basic concepts changing more rapidly than with respect to the human microbiota. Micro-organisms were first shown to cause disease in humans in the 1800s, and after this finding, the popular and scientific views of the microbial world became dominated by the quest to understand, prevent and cure microbial disease.

303.In the second line "this finding" refers to ..... .

a) scientific views of the microbial world
b) the quest to learn about the nature of disease
c) the discovery of the human microbiota
d) the fact that microorganisms cause disease in humans

It is not uncommon for lowland visitors with a history of High Blood Pressure (HBP) to experience temporarily high blood pressure at high altitude. This occurs even if they are on blood pressure medication and have well controlled blood pressure at sea level. A small percentage of **these people** will have unusually unstable blood pressure. HBP at altitude usually returns to the baseline blood pressure after 1-2 weeks at altitude.

304.The phrase "these people" (line 4) refers to ..... .

a) patients with a history of high blood pressure
b) high blood pressure patients living at high altitude
c) lowland visitors controlling their blood pressure
d) people going to high altitude to control their hypertension

It is a somewhat unexpected conclusion. After all, you would think that the more people are paid, the harder they will work, and the better they will do their jobs—until they reach the limits of their skills. **That notion** tends to hold true when the stakes are low, says Vikram Chib, a postdoctoral at Caltech.

305.The phrase "that notion" refers to the..... .

a)relationship between the paycheck and the performance quality
b)unexpected conclusion introduced in the preceding paragraph
c)limitation one faces with regards to his/her skills
d)job satisfaction the skilled people acquire

When rats are fed a fat-free diet, their growth eventually ceases, their skin becomes inflamed and scaly, and their reproductive systems are damaged. Two fatty acids, linoleic and arachidonic acids prevent these abnormalities and hence are called essential fatty acids. They also are required by a number of other animals, but their roles in human beings are debatable.

306.The phrase "these abnormalities" (in line 15) refers to ..... .

a) well-located fat deposits b) consequences of fried foods
c) curves on the human female body d) problems due to fat-free diets

For example, an individual might go to bed later than usual on one occasion because a piece of work or some leisure time activity took longer than normal. It is likely that this will make him more tired than usual and so we might guess that he will sleep longer. This would result in **his rhythms** running more slowly when he was interested and more quickly when he was bored (because he would go to bed earlier due to the lack of something to do and so require less sleep).

307.The underlined phrase his rhythms refers to an individual's …….. .

a) speech rhythm b) work rhythm c) sleep rhythm d) normal rhythm

In transient global amnesia (TGA), the individual does not lose consciousness but does lose the ability to form new lasting memories. The individual may be disoriented to place and time, may recognize that something is wrong, and may become distressed at **this realization**. In TGA, however, motor function is not affected.

308.The phrase "this realization" refers to the understanding that …… .

a) there is something wrong with him/ her
b) (s)he is suffering from mobility disorder
c) (s)he is under extreme stress
d) time/ place disorientation is the real cause

The United States has a scandalously large number of people who lack health insurance, now up to 46 million and growing. That number is vivid and evocative. But it has overshadowed another, more serious issue- **that** of the steady escalation of health care costs.

309.The underlined pronoun "that" refers to ……. .

a) insurance b) number c) issue d) rate

Once kids demonstrate enough body awareness to understand the concept of proper form, external weight can be added. Proper form is the fundamental first step of weight training for both kids and adults. **It** prevents injuries and ensures that you get the most out of the exercise.

310.The underlined It (paragraph 3, line 5) refers to ……. .

a) proper form b) first step c) external weight d) weight training

No completely acceptable, all-inclusive concept exists for physical health or physical illness, and, likewise, none exists for mental health or mental illness. A national program against mental illness and for mental health does not depend on acceptance of a single definition and need not await **it.**

311.What does "it" (the last word) refer to?

a) national program b) single definition c) mental illness d) mental health

The mandate to assure and protect the health of the public is an inherently moral one. It carries with it an obligation to care for the well-being of others and it implies the possession of an element of power in order to carry out the mandate.

312.The underlined it (line 2) refers to ……. .

a) mandate b) obligation c) well-being d) public health

This hypothesis proposes that depression results from a deficiency in these monoamines at critical synapses in the brain. It is supported by the action of antidepressant drugs, which relieve depression by increasing the turnover of monoamine neurotransmitters, but **it** cannot explain the delayed action of these antidepressant drugs.

313.It (line 7) refers to ……. .

a) action of antidepressant drugs b) turnover of monoamine
c) hypothesis d) depression

The situation is identical to the assessment of pain: a doctor cannot experience a patient's pain nor measure it objectively but is still able to assess its significance. A pattern can be built up by comparing

the patient's reported pain-its intensity, quality and location-with observation of the patient's behavior and disability associated with **it.**

314.What does "it" (line 5) refers to?

a) intensity b) behavior c) observation d) disability

The art of medicine deals with the whole gamut of doctor-patient relationship. Most patients think that high-tech medicine can do wonders for suffering humanity. While **it** can do a lot in social situations like emergency care, in all other areas, the art of medicine rules the roost.

315.In line 2, "it" refers to ..... .

a) the art of medicine b) doctor-patient relationship

c) high tech medicine d) the whole gamut

A quick look at the history of medicine and medical sciences would have sufficed to understand that infectious diseases have accompanied humans ever since they opted for a sedentary lifestyle. While today we are better prepared to prevent and fight off infectious diseases, we are nonetheless condemned to coexist with **them**.

316.The underlined word "them" paragraph 2 refers to .....(PhD-00)

a)pathogens b)Humans c)viruses d)diseases

The amount of UV radiation from the Sun that hits the Earth's surface depends on several factors, including the Sun's height in the sky, latitude, cloud cover, altitude, the thickness of the ozone layer and ground reflection. Reductions in the ozone layer due to human-created pollution increase the amount of UVA and UVB that reaches the surface. **This** can impact human health, animals, marine organisms and plant life.

317.The underlined word "this" refers to ..... .(00)

a) the amount of UV radiation

b) Ozone layer

c) an increase in the amount of UVA and UVB

d) an increase in the amount of human-related pollution

Among the specific symptoms are preoccupation with Internet games, unsuccessful attempts to limit participation, loss of interest in other activities, deceiving others about the amount of time spent on games, and problems in relationships, school or work because of Internet games. While research is limited, a 2016 study looking at adults who participated in Internet gaming found that almost 14 percent were identified as at risk of internet gaming disorder. Among **those** identified as at risk, most were men in their 20 and 30s, the rest were women, and most had full time jobs.

318.The underlined word "those" (line 7) refers to ..... .

a) full time jobs b) disorders c) games d) adult participants

---

In a purely rational world, vaccination rates would fluctuate constantly depending on how much people fear getting sick. **That's** why attempts have been made to model vaccination rates mathematically. But now, scientists have found the missing puzzle piece that explains why vaccination rates stay high in the real world or, in some cases, low. The reason, it turns out, is peer pressure.

319.The underlined "that" (line 2) refers to ..... .

a) change in the level of vaccination

b) vaccination in a purely rational world

c) mathematical modeling of vaccination rates

d) people's fear of becoming sick if vaccinated

However, Dr Sharon, a professor at Harvard Medical School, points out that immobility can also be "tremendously hazardous to the health and postoperative recovery of older patients." For this reason, "enhanced recovery after surgery" (ERAS) guidelines suggest that post operation patients who are able to

be active, do more standing and walking around after surgery as soon as they can. **This** is particularly helpful for older patients, who can sometimes develop pneumonia after surgery, because standing and walking helps them to use their lungs more.

320.The underlined "This" refers to …… .

a) postoperative recovery b) enhanced recovery
c) standing and walking d) immobility

Today, the level of healthcare has improved a lot. Presently, the goal of health care is to have a continuum of care for patient; one which in integrated at all levels. Many hospitals offer a referral service or discharge plan to patients who are being discharged. Plans for the patients are discussed with a discharge planner, a person who is trained in assessing what the patients' requirements for healthcare will be after discharged from the hospital. **This** enables the patients to continue their care at a level which is most appropriate for them.

321.The underlined word "this" refers to ……. .(01)

a)a post-recovery discharge from the hospital
b)assessing the patients' post-discharge needs
c)a trained person's ability to assess the needs
d)a discharge planner's healthcare assessment

COVID-19 has highlighted the importance for countries to invest in civil registration and vital statistics systems to allow daily counting of deaths, and direct prevention and treatment efforts. It has also revealed inherent fragmentation in data collection systems in most low-income countries, where policy-makers still do not know with confidence how many people die and of what causes. To address **this** critical gap, WHO has partnered with global actors to launch "Revealing the Toll of COVID-19: Technical Package for Rapid Mortality Surveillance and Epidemic Response".

322.The underlined word "this" refers to the problems with …… . (01)

a)prevention and treatment efforts b)fragmented low-income countries
c)health statistics systems d)policy makers' confidence

Patients usually report stress management strategies along three lines. First, they may identify behavioral approaches, ranging from fleeing the situation (for example, a crowded shopping mall) to problem solving (for example, "I wait for an elevator that is not full"). Second, they may use a variety of cognitive approaches. A patient frightened of flying may tell himself or say out loud, "This plane has been flying safely for years. My mother flies out to see me twice a year. This year I can make it once to see her. "Another may try strategies that help him "not think about it." On an airplane, **this** may involve watching the movie.

323.The underlined 'this" (line 6) refers to …… .

a) the mother's safe flight
b) the safe flight of the plane
c) avoiding thinking about the flight's dangers
d) starting watching the movie and having fun

Consider the case of caring for a patient dying of painful intestinal carcinoma who chooses to avoid painful life-sustaining procedures (e.g., CPR in the event of a cardiac or respiratory arrest) which is meant to prolong his/her life. The reason for such a choice is the patient's belief that undergoing a painful procedure is worse than death, which is a greater harm itself, although **it** might prolong his/her life.

324.The underlined word "it" refers to the …… . (01)

a)patient's death b)painful procedure c)patient's choice d)patient's belief

---

New progress has been made on the road to understanding the origins of genetic changes in tumor cells. The prevalent theory has been that genetic changes in tumor cells come about in multiple stages over a long time. However, a recent study by researchers at Lund University shows that **this** does not have to be

the case at all, but that cancer cells instead can be subject to several major chromosomal changes at the same time.

325."This" in paragraph 1, line 4 refers to ……. .

a) the appearance of genetic changes in tumor cells in several stages
b) the simultaneous occurrence of tumor cells alterations
c) new progresses in the understanding of tumor cell modifications
d) the fact that tumor cell changes fail to occur at all

Occasionally, up to 2-3 mg will be required. The treatment times begin when the desired pressure is reached and **they** range from 30 minutes to 2 hours, depending on the patient's condition and the indication for which it is being used.

326.The pronoun "they" (line 15) refers to …… .

a) treatment times b) desired pressures
c) patient's conditions d) the indications

The robotic arms carry out those movements using end-effectors and manipulators to perform the actual surgery. In computer- controlled systems, the surgeon uses a computer to control the robotic arms and its end-effectors though these systems can also still use tele-manipulators for **their** input.

327.The underlined word "their" refers to …… . (01)

a)robotic arms b)computer-controlled systems
c)end-effectors of the systems d)tele-manipulators

Due to the nature of a chronic disease, many women may have already tried complementary and alternative medications (CAM), perhaps feeling that modern medicine has disappointed them. A woman may be self-administering CAM when she first consults the midwife, in the mistaken belief that because **they** are natural, they are safe.

328.The underlined pronoun "they" in the second sentence refers to …….

a)some interventions
b)conventional medications and interventions
c)complementary and alternative medications
d)the mistaken beliefs

Developments in nanotechnology have enormous potentials to revolutionize **drug delivery systems.** The overall aim is to allow drugs to be delivered to the areas within the body which **they** are targeting. The active ingredients of the drugs are placed inside a wrapper that is genetically designed to locate a particular part of the body.

329.What does the underlined "they" (line 2) refer to?

a) delivery systems b) body areas c) developments d) drugs

Healthcare workers treating patients with infections are at risk of infection themselves. To protect themselves against droplets from coughs, sneezes or body fluids from infected patients and contaminated surfaces, **they** use personal protective equipment (PPE), e.g., aprons, gowns or coveralls, gloves, masks and breathing equipment (respirators), and goggles.

330.In the first paragraph, the underlined pronoun 'they' refers to …….

a)infected patients b)droplets from coughs and sneezes
c)healthcare workers d)bodily fluids

The Clean Air Act of 1970 also encouraged the consumption of fuels that are in limited supply, by causing industrial and power plant operators to switch from coal to natural gas and oil to meet air pollution standards. Nor has the government done anything to require changes in the rate structures for natural gas and electricity, **which** promoted higher consumption by offering a large number of users a lower price unit.

331.The word "which" in the last sentence refers to …… . (01)

a)what the government has done to preserve energy
b)lack of change in the gas and electricity rate structure
c)the decline in the consumption of gas and electricity
d)the users' observance of air pollution standards

Just a few years ago, scientists did not know phytochemicals existed. But today they are the new frontier in cancer-prevention research. This **pioneering science** couldn't have hit at a better time.

332.It can be inferred from the paragraph that the pioneering science (line 2) refers to the ..... .

a) discovery of vitamins b) discovery of phytochemicals
c) link between diet and health d) new knowledge about antioxidants

"We should have a moratorium on unsubstantiated health claims for antioxidants and cancer," says Dr. Julie Buring of Brigham and Women's Hospital in Boston. Amid all the debate, phytochemicals offer the next great hope for a magic pill, one that would go beyond vitamins.

333.The underlined word ("one") in the last sentence refers to ..... .

a) antioxidant pill b) hot debate c) phytochemical pill d) great hope

If one merely induces deep hypnosis and leaves the patient alone, the resemblance of hypnosis to normal sleep is very close. He then lies inert in a condition distinguishable from sleep only in one way, namely, in that he continues for some time to be responsive to the operator in a quite peculiar manner, indicated by the word rapport.

334.The word "rapport" (line 8) describes the state in which the patient is ..... .

a) strangely distinguishable b) peculiarly responsive
c) lively and observant d) in deep sleep

Adults of different ages encounter different sets of life changes as they move through the normal role acquisitions and losses of adulthood. But at every age, high levels of life change are linked to higher rates of physical illness and emotional disturbances such as depression. However, there are personal and social resources that may buffer the individual from the potential impact of stress. Such resources may be collectively called resistance resources. Central among these is the availability of social support.

335."Resistance resources" refers to the means that ..... .

a) protect the individual from many life ills
b) disturb the individual and lead to depression
c) increase the individual's subjective perception
d) somehow enhance the potential impact of stress

Providers of "education for health" are not solely people formally trained as health educators. People in a variety of professions and organizations have opportunities to offer education for health, and physicians are certainly no exception. The key is to find those target groups that are best served by any profession whose members provide health education.

336."target groups" refers to ..... .

a) providers of education for health education
b) physicians and patients
c) those in need of health education
d) people in a variety of professions and organizations

Many forms of avian flu virus cause only insignificant symptoms in the birds or no symptoms at all. However, some of the viruses generate a highly contagious and rapidly fatal disease, leading to a severe epidemic, and thereby devastate poultry business. On the other hand, the very atypical ability of avian flu viruses to contaminate humans, known as 'species jumping', throws up a distressing possibility. In such a

case, a highly pathogenic avian flu virus merges with a human flu virus and creates a new virus that is easily passed along and gets rapidly fatal. If this happens, the result could be a flu pandemic.

337.The words "epidemic" and "pandemic" in the first paragraph ……. .

a) refer to bird and human populations, respectively
b) refer to human and bird populations, respectively
c) both refer to the bird population
d) both refer to the human population

Nanoparticles have a number of properties that distinguish them from bulk materials simply by virtue of their size, such as chemical reactivity, energy absorption, and biological mobility.

338.“such as” in line 5 refers to ……. .

a) size of materials b) bulk materials c) nanoparticles d) properties

---

In the countries that have been affected by avian flu, governments have begun, as a remedy, to cull affected poultry stocks. By removing the potential for the virus to spread through the countries' chicken populations, it is hoped that the virus is contained and removed from circulation.

339.The word "cull" in last paragraph most probably means ……. .

a) study b) limit c) treat d) kill

Another critical factor that plays a part in susceptibility to colds is age. A study done in the University of Michigan, School of Public Health, revealed particulars that seem to hold true for the general population.

340.The word “particulars” in paragraph 1 line 2 is closest in meaning to ……. .

a) minor errors b) specific facts
c) small distinctions d) experienced individuals

Nurses must be alert in transcribing the physicians’ telephone orders because there are periodic contradictions between what physicians claim they ordered and what nurses allege they ordered. Orders should be repeated, once transcribed, for verification purposes. Verification of an order by another nurse on a second telephone is helpful, especially if an order is questionable.

341.“Verification” is referred to as a means of ……. .

a) asking another nurse to take the order
b) ensuring the accuracy of the orders transcribed
c) taking questionable orders to the initiating physician
d) asking physicians to issue their orders correctly

When people are sick they feel like people reject them and don't want to associate with them. This is where the health care provides are expected to go an extra mile. Sit by the patient's bedside, assess how he/she feels to offer reassurance and comfort, touch the patient and smile. Be sure to first consult with the patient because in some cultures touch is considered inappropriate, but a smile is always helpful.

342."Touch" is referred to as ……. developing affection and kindness between the patient and health care providers.

a) an end in b) a treatment for c) a barrier in d) a means of

---

Moisture is required for indoor mold to grow. Indoor mold damages or destroys whatever substances it grows on. That, plus associated odors, causes diminished quality of life in people who spend time in such spaces. There is considerable disagreement in the scientific community about whether adverse health effects are actually caused by indoor mold, though most seem to agree that spending time in damp/moist environments can contribute to such respiratory illnesses as allergy, asthma, cough, runny nose, and sinus conditions. Whether these illnesses are caused by mold, mold by-products, dust mites, chemicals emitted from deteriorating surfaces, or indoor air pollution, remains a subject for further research.

This may seem like "scientific hair-splitting" to an average person who simply wants to live and work in nuisance-free environments.

343.By the term "scientific hair-splitting" (paragraph 2), the writer means ..... involved in the process of solving the problem.

a) deteriorating surfaces b) air pollution c) chemical emissions d) irrelevant points

---

Is aging a programmed stage of cellular differentiation, or is it the result of physiological processes impaired by free radical or other damages to cells? Despite the want of a clear definition, few question that free radical damages to cell nucleic acids and lipids are an important factor in aging. A recent study shows that oxygen free radicals cause approximately 10,000 DNA base modifications per cell per day.

344.The underlined phrase "want of" (line 5) is closest in meaning to ..... .

a) consequence of b) absence of c) need for d) request for

More isn't always better when it comes to running and endurance training. It's also important to realize that what's "vigorous" for one runner is not going to be vigorous for another. For older people or those who haven't broken a sweat in a while, brisk walking might constitute a tough workout. **(97-98)**

345.By the expression "those who have not broken a sweat in a while", the author probably means persons who ..... .

a) are at an old age b) have failed to do exercise for some time
c) have done sports professionally d) easily sweat during exercise

---

Some ways that health care providers can use to promote that friendliness and warmth includes touch. When people are sick they feel like people reject them and don't want to associate with them. This is where the health care provides are expected to go an extra mile. Sit by the patient's bedside, assess how he/she feels to offer reassurance and comfort, touch the patient and smile. Be sure to first consult with the patient because in some cultures touch is considered inappropriate, but a smile is always helpful.

346.The underlined expression "to go an extra mile" in the second paragraph means to ..... .

a) cover more distance b) pay more attention
c) seek more help d) have more rest

Accordingly, many people use Internet resources to find what they need to know for better medical decisions. But are the recommendations of "experts" on the Net always accurate and reliable? Are **they** helpful to everyone that needs advice on a specific medical condition? The online health products or information that seem most wonderful are often the most **fraudulent**.

347.The word fraudulent in paragraph 1 is closest in meaning to ..... .

a) available b) dishonest c) significant d) attractive

People vary markedly in their interpretations of reality." As a consequence, it has been pointed out that effective health education can be achieved only by linking what is taught to the **endogenous** motivation of the individual or group addressed.

348.The underlined word endogenous in the last sentence is closest in meaning to ..... .

a) external b) inhibited c) internal d) determined

Some people wonder if it is bad to exercise daily. The answer is yes and no, it depends on how you define working out. It is generally advisable to **move** every single day. When we move our bodies, oxygen and nutrients are delivered to tissues and the cardiovascular system works more efficiently during daily tasks.

349.The underlined word " move " is closest in meaning to .....

a) do some heavy exercise everyday
b) work out after daily tasks regularly
c) take action when things are out of control
d) do basic daily tasks with a continuous motion

In contrast, low-density lipoprotein (LDL) contains less protein and a higher proportion of cholesterol. LDLs carry cholesterol from the liver to the tissues, making it available for membrane or hormone synthesis. However, excess LDLs can **deposit** cholesterol along the lining of the arterial walls. Thus, high levels of HDLs indicate efficient removal of arterial plaques, whereas high levels of LDLs suggest that arteries will become clogged.

350.The word deposit in line 11 is closest in meaning to ..... .

a) stimulate b) assimilate c) accumulate d) postulate

Although cholesterol has **received a lot of bad press** in recent years, it is a necessary substance in the body. It is found in bile salts needed for digestion of fats, in hormones, and in the cell's plasma membrane. However, high levels of cholesterol in the blood have been associated with atherosclerosis and heart disease.

351.The phrase "received a lot of bad press" in the first line means to ..... .

a) be criticized in mass media
b) present unwelcome consequences
c) include pressure over time
d) indicate undesirable effects

If you are concerned whether you need to do a sweat - inducing workout every single day, then the answer is no. People are often intimidated by committing to a healthy lifestyle because they think that means intense exercise every day, but your workout plan may also include 20 minutes of walking, stretching, foam rolling or gentle yoga.

352." If you are concerned whether you need to do a sweat - inducing workout every single day " means that you are ..... .

a) certain that a sweat - inducing workout is required
b) at a dilemma to think of workouts as regular activities
c) told that a sweat - inducing workout should be truly employed
d) recommended to do a sweat - inducing workout every single day

---

However, pH alone is not the only factor affecting how erosive a food or beverage may be. The pH and buffering capacity collectively determine how erosive a food or beverage is. Yogurt, for example, has a pH of about 4.0, but is not considered erosive due to its high calcium content, which acts as a buffer. Dental erosion may also be caused by intrinsic factors, such as stomach acid in those with reflux disease or individuals who vomit frequently. Compared to erosion caused by extrinsic factors which commonly affect the facial an occlusal surface of teeth, erosion caused by gastric acid primarily occurs on the palatal and occlusal surfaces of the anterior maxillary teeth.

353.Regarding the intrinsic and extrinsic factors, it is inferred that ..... .

a)the latter can be grouped under the heading of diet and lifestyle
b)the former is more problematic than the latter due to its internal nature
c)intrinsic factors can lead to erosion of the facial surfaces of teeth
d)both intrinsic and extrinsic factors equally cause erosive tooth wear

---

The body can start generating ketones even in a relatively short duration of insufficient calories or restricted carbohydrates. A ketogenic diet works in many ways, on many different cellular processes, and tissues in the body. And that makes it difficult to study and nail down what the mechanism is; however, this makes it very powerful in that it has a number of different mechanisms.

354.The writer believes ketogenic diet is .....due to its multiple mechanisms. (02)

a)frequently taken b)inadequately generated
c)effective d)restrictive

Although the cause of obesity in children is similar to that of adults (i.e. more energy intake vs. energy utilized), emerging data suggest associations between the influence of maternal and fetal factors, during intrauterine growth and growth during the first year of life, on risk of later development of adult obesity and its complications.

355.Obesity later in life …… fetal growth and early infancy.

a) may be accounted for by
b) remains independent of
c) can evidently result in
d) is encouraged during

Unlike most attributes, defining physical fitness is not a subjective matter; in fact, determining what it means to be physically fit can be a matter of life and death.

356.Misinterpretation of physical fitness …… .

a) is too innocent to cause any serious discomfort
b) can result in a fatal lifestyle
c) is of little significance to the writer
d) is inevitable in a healthy lifestyle

Naturopathy, also called nature care, prescribes the "return to nature" formula to all physical ills. The main philosophy working behind this medical system is that, left to herself, nature can take care of herself.

357.According to the information in this passage, …… .

a) all diseases can result from "return to nature"
b) self-cure and self-prevention are mostly done through prescriptions
c) lack of harmony with nature can lead to physical illnesses
d) nature care philosophy acts as a rival to pro-nature fads

A stress response that fails to return to a state of equilibrium becomes unresolved psychological/emotional trauma.

358.According to the writer, in case stress response remains unresolved for some time, it will lead to …… .

a)break up of significant relationships in life
b)disablement and threatening diseases
c)unavoidable emotional or psychological trauma
d)most likely humiliating experiences

Influenza virus has been with mankind for at least 300 years, causing epidemics every few years and pandemics every few decades. They result in 250,000 to 500,000 deaths, and 3-5 million cases of severe illnesses each year worldwide, with 5-15% of the total population becoming infected.

359.Influenza viruses can ..... .

a) lead to high morbidity rate worldwide
b)make the flu vaccine ineffective for some people
c)equally affect all age groups
d)last for three hundred years

More than 10 million individuals were disfigured. However, a little more than a decade later, the smallpox program had met its goal; the last case of this terrible illness occurred in Somalia in 1977. Following this important achievement, the World Health Organization tried to recreate its success.

360.It is said that smallpox ..... .

a) killed most of its victims around the world
b) could lead to changes in victims' appearance
c) is still problematic in some parts of the world
d) is more difficult to overcome than some other infections

In animal experiments, investigators found that among tumor-bearing rats that were allowed to feed freely, those rats allowed to exercise spontaneously experienced delayed onset of appetite loss when compared with non-exercised rats.

361.Physical activity in animals with cancer caused …… .

a) immediate loss of appetite b) spontaneous onset of appetite loss
c) later start of appetite loss d) intensified loss of appetite

---

This idea- that longer activity spans would be followed by longer sleeps and vice versa- does not find experimental support. The reverse is seen: long "daytimes" tend to be followed by shorter sleeps and vice versa.

362.Experiments have indicated that fewer work hours more likely result in ……. .

a) shorter sleep duration b) more sleep hours
c) sleeping deeply d) going to be late

Vitamin K deficiency may manifest itself as a bleeding diathesis due to the role of vitamin K in the formation of prothrombin and clotting factors VII, IX, and X.

363.Lack of vitamin K may result in ..... .

a) neuromuscular symptoms b) non-stop hemorrhage
c) cement substance alteration d) clotting factors formation

New research provides the strongest evidence to date that psychopathy is linked to specific structural abnormalities in the brain.

We now know that this behavioral difference corresponds to very specific structural brain abnormalities which underpin psychopathic behavior, such as profound deficits in empathizing with the distress of others.

364.The specific structural brain abnormalities ……. .

a) account for showing empathy with distressed people
b) typically influence mood more than behavior
c) underlie the excessive aggressive behavior
d) profoundly lead to opposing empathic people

Snoring is a sound resulting from turbulent airflow that causes tissues to vibrate during sleep. When we exercise, the air moves more quickly and produces some sounds as we breathe. This happens because air is moving in and out of the nose and mouth more quickly and this results in more turbulence to the airflow and some vibration of the tissues in the nose and mouth.

365.Strong current of air and vibration of mouth and nasal tissues …… snoring.

a) are able to block b) are caused by c) can account for d) can overshadow

---

When we are asleep, the area at the back of the throat sometimes narrows. The same amount of air passing through this smaller opening can cause the tissues surrounding the opening to vibrate, which in turn can cause the sounds of snoring.

366.When narrowed, the area at the back of the throat would …… .

a)effectively block snoring b)prevent vibration
c)initiate snoring d)facilitate breathing

First, diabetes tends to be hereditary. Second, people often don't realize that although it often causes youngsters to lose weight, later on in life may bring about a filling out of the waistline although on the subject of weight, eating to excess can trigger of diabetes.

367.According to the text, one factor that may cause diabetes to initiate is ..... .

a) itching b) overeating c) inordinate thirst d) failed pregnancies

---

Learning a new dance step may boost the brain in the same way that learning a language can. If the dance is aerobic, then the benefits double.

368.A more effective way to boost brain function is claimed to result from …… .

a) more nutrients b) aerobics dancing
c) traditional exercise d) increased concentration

Breathing secondhand smoke can be harmful to children's health including asthma, Sudden Infant Death Syndrome (SIDS), bronchitis and pneumonia and ear infections. Children's exposure to secondhand smoke is responsible for: (1) increase in the number of asthma attacks and severity of symptoms in 200,000 to 1 million children with asthma;

The developing lungs of young children are severely affected by exposures to secondhand smoke for several reasons including that children are still developing physically, have higher breathing rates than adults, and have little control over their indoor environments

369.Asthmatic attack is referred to as one of the ……. of exposure to secondhand smoke.

a) responsibilities b) complications c) severities d) deficiencies

370.In the passage, we read that ear infections in children may be …… .

a) the result of their living habits b) a sever threat to the child's life
c) due to exposure to secondhand smoke d) treated by exposing ear to cigarette smoke

371.One reason that adults are less susceptible to smoke than babies with smoking mothers is their ……. .

a) higher capacity b) breathing rates c) developing lungs d) indoor environment

372.Babies and toddlers are especially vulnerable to the health risks from secondhand smoke as they ……. .

a) are still being breast-fed b) start smoking at very young age
c) can hardly change the environment d) are independent of their surroundings

But now, the National Health Service is sick. Government cutbacks and underfunding are getting longer. Under such circumstances, it is no surprise that more people are turning to private but expensive healthcare.

373.Some hospitals failed to fulfill their objectives properly mainly due to …… .

a) skilled staff limitations b) serious financial problems
c) limited patient referrals d) lack of public demand

During the early phases of body fluid loss, the body makes adjustments to compensate for the state of lowered fluid volume. The urine output is reduced and vasoconstrictor substances (epinephrine) and norepinephrine are released into the bloodstream to create an increase in peripheral resistance.

374.A decrease in urine output is due to ……. .

a) vasoconstrictor substances b) defective urethral structure
c) peripheral resistance against hypovolemia d) body's adjustment to hypovolemia

Evolution of cells is closely linked to the evolution of life. Evolution of life was probably preceded by a chemical evolution.

375.About 4 billion years ago, a chemical evolution ……. the formation of cells.

a) resulted from b) led to c) was preceded by d) followed from

Despite the large burden, only 28 % of low - income countries have a dedicated policy for neurological diseases in comparison with 64 % of high - income countries, originating from insufficient resources with unacceptably high treatment gaps for neurological conditions. For example, in low- and middle - income countries, there are only three adult neurologists per 10 million people, while high - income countries have approximately 160 times more.

376.According to the passage, inadequate policies for neurological diseases in some countries are the result of .....(02)

a) unavailability of funds
b) existence of disabilities
c) reduced mortality and morbidity
d) large number of treatment options

WHO estimates that today 2.5 billion people need one or more assistive products such as wheelchairs, hearing aids, or apps that support communication and cognition, with a global aging population and a rise in non-communicable diseases, this number will rise beyond 3.5 billion by 2050, with many older people needing two or more products as they age.

377.According to the passage, the demand for assistive products will increase due to an increase in the number of ..... . (02)

a)educated people b)amputated individuals
c)labor markets d)the elderly

The frequently unrealistic presentation of one's physical appearance and life achievement on social media often cause strong feelings of dissatisfaction, low self-confidence, and decreased self-worth.

378.The author believes that fake self- manifestations on social media could ..... .

a)have a positive outcome
b)result in displeasure and worthlessness
c)enhance the youth self-esteem
d)cause satisfaction and self-worth

For individuals experiencing cognitive changes, it can become increasingly difficult to communicate unmet needs. If these needs remain unaddressed, it is common for them to be expressed through different aggressive behaviors such as spitting, hitting or engaging in sexually inappropriate behavior.

379.According to the passage, the main reason for individuals' aggressiveness is ..... .(02)

a)anxiety and stress b)impaired social skills
c)traumatic experiences d)unfulfilled demands

After the World War II, however, naturopathy took a backseat with the onslaught of antibiotic science. Later, with the discovery of unsuspected side effects from DDT, thalidomide, and other high-tech wonders, people once again began to lean on the comforts of the time-tested practices of naturopathy.

380.The discovery of antibiotics ..... .

a) led to the arousal of public attention to naturopathy
b) caused the public to pay attention to health food and diet
c) increased the number of health food fads after World War II
d) led to the flourish of mainstream medicine for some time

For example, an individual might go to bed later than usual on one occasion because a piece of work or some leisure time activity took longer than normal.

381.Going to bed later than usual can be due to one's ..... .

a) enthusiasm for the work he is involved in
b) boredom caused by sleeping too much
c) tendency to sleep sooner than usual
d) chronic sleep deprivation

One explanation for this is due to the higher levels of adrenaline or stress hormones in your body due to lower oxygen levels. The effects of altitude on blood pressure are variable. Some persons with HBP, for instance, develop lower blood pressure on ascent to high altitude

382.The underlying cause of HBP at high altitude as provided by the paragraph can be ..... .
a) the absence of pure oxygen
b) undersecretion of adrenaline
c) oversecretion of stress hormones
d) development of poor immune system

Increasingly, however, society is demanding explicit attention to ethics. This demand arises from: technological advances that create new possibilities, and with them, new ethical dilemmas; new challenges to health such as the advent of human immunodeficiency virus; abuses of power, such as the Tuskegee study of syphilis; and an increasingly pluralistic society in which we can no longer simply adopt the values from a single culture or religion, but we must work out our common values in the midst of diversity.

383.It is stated that new ethical dilemmas ..... .
a) have resulted in the abuse of power
b) are consequences of technological advances
c) have led to new challenges in health issues
d) are creating new possibilities in health strategies

384.The new technological advances ..... .
a) necessitate direct attention to ethics
b) have given rise to pluralistic societies
c) assist man to overcome new challenges to health
d) have contributed to ethical nature of public health

Semantic dementia patients start to lose their understanding of words, and often develop changes in their eating habits, such as going through different food fads.

385.Patients with semantic dementia may change their diets impulsively because ..... .
a) they like to change eating habits
b) some parts of the cerebral cortex do not function
c) some areas on the back of their brains are decaying
d) they cannot relate information to the meaning of food

Alternative therapies are often dismissed by orthodox medicine because they are sometimes administered by people with no formal medical training. But, in comparison with many traditional therapies, Western medicine as we know it today is a very recent phenomenon.

386.According to the passage, conventional doctors reject alternative therapy since ..... .
a) patients have not been satisfied with it
b) its practitioners are sometimes not academically qualified
c) it is rather off-putting and sometimes misleading
d) it has failed to be beneficial

In the United States, the number of overweight children and adolescents has doubled in the last two to three decades, and similar doubling rates are being observed worldwide, including in developing countries and regions where an increase in westernization of behavioral and dietary lifestyles is evident.

387.Obesity is becoming a concern in developing countries partly due to ..... .
a) a high blood pressure among ethnic groups
b) their traditional way of life
c) the change to a westernized manner of life
d) their highly active lifestyle

Although the cause of obesity in children is similar to that of adults (i.e. more energy intake vs. energy utilized), emerging data suggest associations between the influence of maternal and fetal factors, during

intrauterine growth and growth during the first year of life, on risk of later development of adult obesity and its complications.

388.Obesity later in life …… fetal growth and early infancy.

a) may be accounted for by b) remains independent of
c) can evidently result in d) is encouraged during

They thus escape the neutralizing antibodies that we have developed through previous infections or vaccinations and that ought to protect us. That is why the strains of viruses used for the production of influenza vaccines have to be changed every one or two years.

389.In the production of influenza vaccines we have to change the strains almost every year as these viruses ……

a) escape haemagglutinin
b) neutralize neuraminidase
c) undergo a number of degenerations immediately
d) remain hidden from the antibodies present in blood

Emotional or psychotic trauma can result from such common occurrences as an auto accident, the break up of a significant relationship, a humiliating or deeply disappointing experience, the discovery of a life-threatening illness or disabling condition, or other similar situations. Traumatizing events can take a serious emotional toll on those involved, even if the event did not cause physical damage.

390.Emotional tolls on those involved in traumatizing events …… .

a) can never return to a state of equilibrium
b) can hardly ever be resolved
c) have their roots in common events in life
d) necessarily lead to physical and mental damages

Niacin deficiency, also known as pellagra, is associated with dermatitis, diarrhea, and dementia.

391.Mental deterioration may result from the deficiency of ..... .

a) Niacin b) vitamin A c) vitamin K d) vitamin C

Cognitive problems caused by Alzheimer's are strongly influenced by a build-up of plaques in the brain. The plaques consist of amyloid beta- a protein that is produced as part of normal brain activity. Alzheimer's patients, however, have elevated levels of amyloid beta, which results in the protein clumping together as plaques.

392.The cause of cognitive problems in the brains of Alzheimer's patients basically the ..... .

a) excessive production of a protein b) insufficient supply of serotonin
c) existence of depression traits d) inability to absorb citalopram

---

The fight-or-flight reaction- chronically elicited in response to threats such as income, housing, and food insecurity, among others weakens the immune system, leads to increased insulin resistance, greater incidence of lipid and clotting disorders, and other biomedical insults that are precursors to adult disease.

393.It is understood that certain adult ailments, namely insulin resistance, may result from some ..... .

a) immune system deficiency b) lipid or clotting problems
c) biomedical disturbances d) limited lifespan

The history of mortality reduction is spoken of in terms of three phases. In the first phase, from the mid-18th century to the mid-19th century improved agricultural techniques played a large role. These techniques resulted in increased food supply, better nutrition, and economic growth. Emerging public health measures also played a role at this stage.

394.Economic growth partly resulted from ..... .

a) researches to improve public health
b) improvements in agricultural methods
c) better nutrition of all groups of people
d) an increase in different kinds of food

Breathing problems during sleep may be linked to early mental decline and Alzheimer's disease, a new study suggests.

395.According to the passage, there is a cause and effect relationship between ..... .

a) Alzheimer's age of onset and the use of C.P.A.P.
b) lack of sleep and onset of Alzheimer's
c) lack of sleep and C.P.A.P.
d) sleep apnea and cognitive impairment

Largely due to the use of medical technology, those costs are now increasing at an annual rate of 7% a year.

396.The rise in medical costs these days is mainly rooted in ..... .

a) those without health care insurance
b) growing number of insurance seekers
c) the application of medical technology
d) bankruptcy of the Medicare program

For some single-child parents, particularly those with busy careers, the pressure of devoting time and energy to a second child can seem too overwhelming, resulting in them electing to have no more children.

397.An important factor contributing to the increase of single-child families is claimed to be .....

a) population explosion
b) child-raising challenges
c) increasing number of the elderly
d) high rate of unemployment

When rats are fed a fat-free diet, their growth eventually ceases, their skin becomes inflamed and scaly, and their reproductive systems are damaged.

398.If rats are nourished with diets without fat, they ..... .

a) stop growing
b) become more reproductive
c) lose body hair
d) increase body curve

According to a new study, mutations in genes that occur spontaneously may contribute to congenital heart diseases in children. These mutations may contribute to about 10 percent of cases of congenial heart disease in children, which is the most common type of birth defect in the United States, the study said. About 40,000 babies are born each year with congenital heart disease.

399.Reading the passage, we understand that congenital heart diseases ..... .

a) are caused by gene mutations
b) must be inherited from a parent
c) arise due to conception
d) mostly result from chromosomal abnormalities

Folk or traditional medicine originated from primitive man's reactions or attitudes to natural events. Magic and witchcraft played an important role here. In these societies, where witchcraft and religious beliefs were of great importance, disease and health were explained by external factors penetrating and harming the body. People's efforts to find solutions to these diseases set up the basis of folk medicine.

400.According to the first paragraph, magic and witchcraft ..... folk or traditional medicine.

a) have contributed to the development of
b) have served as substitutes for
c) developed soon after the emergence of

d) are claimed to be synonymous with

401.In folk medicine, disease was supposed to be due to ..... the sick body.

a) people's efforts to recover
b) witchcraft's intervention to heal
c) the entrance of foreign elements into
d) the departure of certain factors from

During this time, females tend to struggle more than males with body images and self-esteem issues which can lead to dangerous eating disorders and even death.

402.Eating disorders among females at puberty usually ..... self-esteem and body image issues common in this period.

a) lead to b) contribute to c) result from d) differ from

Virtual reality therapy has several advantages over recreating experience in real life, including the ability to control the environment, to schedule treatment, to repeat scenarios, and to adjust scenarios to improve treatment. Also, it may have insurance benefits as some insurance will not cover the extended time needed for exposure therapy in person-virtual reality therapy often requires much less time.

403.The success of VRT with phobic patients is mainly due to ..... .

a) repeating real scenarios
b) more interaction with the therapist
c) recreating real life experience of fear virtually
d) generation of three-dimensional image visually

Also, it may have insurance benefits as some insurance will not cover the extended time needed for exposure therapy in person-virtual reality therapy often requires much less time.

404.As VRT ..... for exposure, insurance companies may pay the treatment cost.

a) decreases the time needed
b) can adjust scenarios
c) extends the time required
d) can control the virtual experience

More people need to realize that going against the grain is not always a bad thing. Refusing to use synthetic drugs is indeed a healthy choice. Being aware of the benefits of natural medicine might cause an increasing number of people to use these resources.

405.The passage implies that people will choose to use natural medication if they ..... .

a) get informed about its benefits
b) start using healthy synthetic drugs
c) read the findings of research studies
d) consult with health care providers

The thermal effects of the passage of the electric current depend on its intensity. High-intensity current, such as lightning coursing along the skin, produces linear arborizing burns known as *lightning marks*. Sometimes intense current is conducted around the victim (so-called *flashover*), blasting and disrupting the clothing but doing little injury. When lightning is transmitted internally, focal hemorrhages from ruptures of small vessels may be seen in the brain. Sometimes, death is preceded by violent convulsions related to brain damage.

406.As to lighting coursing along the skin and flashover ..... .

a) the former is usually less damaging than the latter
b) the latter passes rapidly along the skin
c) both operate in the same manner

d) none is caused by low-intensity currents

The word trauma brings to mind the effects of such major events as war, kidnapping, abuse, or similar assaults. The emotional aftermath of such events, recognized by the medical and psychological communities, and increasingly by the general public, is known as Post-Traumatic Stress Disorder (PTSD). But traumatic stress has a broader definition than (PTSD) alone provides. Traumatic stress leads to lifelong chronic physical disabilities and emotional disorders such as anxiety and depression and can be caused by seemingly benign experiences in infancy or childhood. This new field, early life relational or developmental trauma, is less familiar to professionals, but offers a new approach to healing a wide range of lifelong mental, emotional and physical disorders.

407.As to traumatic and post- traumatic stress, the …… .

a) latter might have life- long effects as opposed the former
b) latter involves those occurrences having permanent effect during life
c) former can encompass a smaller scope than the latter
d) former can be rooted in childhood experiences while the latter might not

Until recently, the study of human evolution was based entirely on the historical record of fossils and archeological findings. Understanding history by examining the available archives is infinitely better than speculating on the basis of preconceptions, but historical records, as we have already noted, are never complete. Furthermore, to paraphrase one of the advocates of molecular genetic techniques, a fossil may or may not have left descendants, but all our molecules had ancestors. Consequently, the recent use of molecular genetics to study human origins opens an exciting new window on the subject. In science, new and different perspectives frequently initiate the questioning of assumptions and the reinterpretation of older data, but a richer and more accurate understanding generally emerges. Study of the last several hundred thousand years of evolution of Homo sapiens is currently in such a dynamic state.

408.As to the study of human evolution <u>today and in the past</u>, it is stated that ……. .

a) the former is unidimensional
b) the latter is less exciting than the former
c) both are not multidimensional and precise
d) both are dynamic, exciting and reliable

409.As to the study of human evolution in the past and at present, it is stated that …… .

a) the former is more one-dimensional than the latter
b) the latter is less exciting than the former
c) neither is multidimensional and precise
d) both are dynamic, exciting and reliable

So, lifestyles that induce better health behavior should improve health status. However, we are only beginning to understand what elements of health education programs make those programs successful, and as yet, we have little understanding of the mechanisms by which interventions effect behavior and health status.

410.As to the mechanisms and elements of health education, …… .

a) the former are unknown but the latter are not
b) the latter are unknown while the former are not
c) both have extensively flourished
d) both are far from being completely understood

The most striking example is the comparison between the United States and Cuba. Though life expectancy in both is virtually identical, the former spends less than $200 per person on healthcare while the latter spends almost $4,400 per person. Cooper R et al. (2006) state that much of this is due to relatively small amounts invested in infrastructure combined with a well-developed public health strategy.

411.The comparison between the United States and Cuba reveals that …… .

a) the former spends more on life expectancy b) the latter has a better healthcare system
c) the average longevity in both is the same d) life expectancy in the former is higher

---

Some believe that the primary focus of schools should be academic preparation of students, and that classroom teachers are primarily responsible for student academic achievement, and that schools should efficiently and effectively organize themselves toward that task. These efforts to improve schooling might be labeled school reform in that they accept that the desired outcome of schooling is academic achievement as measured by standardized tests of basic skills and that the focus of change should be on the practice of classroom teachers and school administrators.

Others believe a more holistic approach should prevail and that efforts of schools should be integrated with other social institutions such as family and community towards these more holistic ends. Efforts along these lines might be labeled 'school revisioning' in that there is an advocacy that schools focus on much wider range of desired outcomes (cognitive processing skills, emotional and social awareness and skills, moral character development). These approaches state that intellectual ability and academic achievement account for only about one-third of the variance related to adult success.

412.School reform and school revisioning approaches differ in that …… .

a) the former is more scientific-based
b) the latter is more academic-based
c) the former puts less importance on social institutions
d) the latter considers a less important role for school systems

---

Here, stress and emotion are part of the early warning system that alerts us to a threat. Very often, however, we are overly harsh and unjust to ourselves in a way that we would never be with friends or co-workers. This, along with other negative thinking, can cause intense stress and unhappiness, which can severely undermine our self-confidence.

413.As to the feeling of stress and weakened self-confidence, …… .

a) the former is the consequence of the latter
b) the latter can be the end result of the former
c) both are commonly concomitant
d) both are contradictory terms

From this perspective, the average person has different but "normal" amounts of each type of intelligence, while a genius is a person with an outstanding brilliance in at least one kind of intelligence.

414.According to the passage, regarding an average person and a genius, …… .(00)

a)the former has at least one type of intelligence more than the latter
b)the latter is exceptionally notable in at least one kind of intelligence
c)the average person is remarkably more brilliant at scientific intelligence
d)both persons have all types of intelligence to a literally remarkable degree

---

Micronutrient deficiencies can cause visible and dangerous health conditions, but they can also lead to less clinically notable reductions in energy level, overall capacity, and mental clarity. **The latter** can lead to reduced educational outcomes and reduced work productivity.

415.The expression the latter in the second paragraph refers to one's lowered …… .

a)mental clarity b)total energy level of the body
c)overall body capacity d)work productivity

In science, new and different perspectives frequently initiate the questioning of assumptions and the reinterpretation of older data, but a richer and more accurate understanding generally emerges. Study of the last several hundred thousand years of evolution of Homo sapiens is currently in such a dynamic state.

416."Such a dynamic state" (the last line) refers to …… .

a) rejecting the assumptions based on older data
b) using new perspectives while investigating older data
c) the comparison and contrast of new and old records
d) the emergence of questions about human evolution

So by simply "doing their thing" in nature they frequently can render our food supply unfit for consumption. To prevent this we minimize the contact between microorganisms and our food (i.e. prevent contamination) and also eliminate microorganisms from our foods or at least adjust conditions of storage to prevent their growth (preservation).

417.The writer concludes the paragraph with the…… .

a) way(s) of getting rid of microorganisms
b) superiority of micro-organic methods
c) inadequacies of the existing strategies
d) methods of safeguarding foodstuff

The medical profession has been aware for long time that population health is improved by prevention. With a rapidly aging population, it is important that a similar conclusion is reached by governments in the developed world.

418.“Similar conclusion” in the last sentence refers to …… .

a) role of preventive medicine in health promotion
b) responsibility of governments in reducing hospital admissions
c) impact of preventive medicine in slowing people’s rapid aging
d) role of governments in taking care of the ageing population

---

The problem of “helping self-help” is not some minor difficulty in educational practice; it is a fundamental conundrum or problem common to all helper-doer relationships, the teacher-student relationship being only one example. In education, this helping conundrum occurs in various forms as the “learning paradox.”

419.The “learning paradox” mentioned in the last sentence refers to the …… .

a) teacher’s help which may hinder autonomous learning
b) students’ acquisition of knowledge on their own
c) development of self-reliance on behalf of the students
d) accumulated learning of the past by the students

After adjusting for other factors that could affect the results, such as age and cigarette smoking, researchers found a strong association between alcohol (more than the equivalent of seven cans of beer a week) and infertility due to ovulation problems. The **inability to conceive** was about 30 percent more likely to occur in women who drank moderately and about 60 percent more likely in women who drank heavily.

420.The underlined phrase “the inability to conceive” refers to …… .

a) alcohol consumption b) heavy drinking c) misconception d) infertility

---

The atmosphere is an ocean of air and a precious natural resource for sustaining life on the Earth. Unfortunately, human activities based on national or personal interests are causing harm to this common resource, notably by depleting the fragile ozone layer, which acts as a protective shield for life on the Earth.

421.The underlying phrase "this common resource" refers to ….

a) atmosphere b) ozone layer c) the Earth d) life

Although most people survive a heart attack initially, the risk of death significantly increases over the following years. In fact, 65% of people who have a heart attack over the age of 65 die within eight years of the initial incident. This is at least partially because while a person may survive an initial heart attack,

the heart attack itself, which leads to the heart tissue being deprived of oxygen and then dying, does not regenerate in adult humans.

422.According to the passage .....(02)

a) more than half of people instantly die after initial heart attack
b) people over 65 are more likely to die within 8 years after the attack
c) 65% of patients with heart attack survive only for 8 years
d) experiencing heart attack in patients in their late 60's is more than 65%

Many forms of avian flu virus cause only insignificant symptoms in the birds or no symptoms at all. However, some of the viruses generate a highly contagious and rapidly fatal disease, leading to a severe epidemic, and thereby devastate poultry business. On the other hand, the very atypical ability of avian flu viruses to contaminate humans, known as 'species jumping', throws up a distressing possibility. In such a case, a highly pathogenic avian flu virus merges with a human flu virus and creates a new virus that is easily passed along and gets rapidly fatal. If this happens, the result could be a flu pandemic.

One means of species jumping is when a person carrying flu comes into close contact with birds having highly pathogenic avian flu. Here, there is a tiny chance that the person could become infected with the avian flu virus and start carrying both the human and the avian flu virus, which could meet in the person's body and swap genes with each other and result in a flu pandemic.

423.We can infer from the passage that a pandemic is ..... .

a)more common than the epidemic but less common than the usual avian flu
b)less common than the epidemic but more common than the usual avian flu
c)as common as the usual avian flu and the epidemic
d)less common than both the avian flu and the epidemic

The 'cold-hearted' psychopathic group begin offending earlier, engage in a broader range and greater density of offending behavior and respond less well to treatment programs in adulthood, compared to the 'hot-headed' group. We now know that this behavioral difference corresponds to very specific structural brain abnormalities which underpin psychopathic behavior, such as profound deficits in empathizing with the distress of others.

424.It is implied that the 'cold-hearted' patients ..... .

a)would show more offensive behavior to the treatment conducted before their adulthood
b)would respond more positively to the treatment if treated during childhood or adolescence
c)tend to exhibit less offensive behavior following the transition to adulthood
d)can be treated satisfactorily provided a definite program is already designed

---

Studies show that certain styles of interpersonal communication are less effective than others. Which styles are the ones to avoid? These same studies indicate that the two least effective styles are aggressive and passive communication.

425.It is implied that an effective communication involves ..... .

a) aggression by both sides b) passiveness by both sides
c) either passiveness or aggression d) neither passiveness nor aggression

---

In other countries, such as France, the demographic pyramid long ago evolved into a cylinder, with fewer young people supporting an aging population; this phenomenon is becoming more prevalent in emerging economies such as the Republic of Korea.

426.South Korea is mentioned as an example of the countries ..... .

a) with a decreasing number of multi-children families
b) which have intentionally adopted the policy of one-child families
c) which are seriously concerned about the new trend on one-child families
d) with a definite family-planning policy

This definition arises from the fact that all of their dimensions are in the nanoscale, as opposed to one-dimensional nanomaterials, which have one dimension larger than the nanoscale (such as nanowires and nanotubes), and two-dimensional nanomaterials, which have two dimensions larger than the nanoscale (such as self-assembled monolayer films).

427.Nanowires are examples of ..... .

a) zero-dimensional nanomaterials b) one-dimensional nanomaterials
c) nanotubes d) nanoscales

The creative part was and is a separate entity. I am not writing poems about the loss of a loved one unless that person has had an enormous impact on my life or perhaps the life of others in a way that one or a multitude of people were touched to some degree. I am researching Plath and Sexton. Wow! These women had problems that in that era was frowned upon and proper resources were not available to adequately help them overcome the feeling of worthlessness. In my opinion, they turned to poetry to help them to sort out their entanglement of emotions.

428.It is understood that Plath and Sexton ..... .

a) challenged common views on creativity
b) suffered from mental disturbance
c) were the most creative people of their time
d) had the same perspectives as the author's

سوالات سال ۱۴۰۳– پنجشنبه صبح

Research has suggested there is a link between an acute episode of anger and an increase risk of heart attack. Researchers from Columbia University and other institutions wanted to tease out why. The investigators recruited 280 healthy young adults and randomized them into four groups: a control group that cried out loud for eight minutes and maintained a neutral emotional state, and groups who recalled events that made them angry, sad or anxious. Before they began, and at intervals for 100 minutes afterwards, the researchers took blood samples and measurements of blood flow and pressure. The findings showed that anger may indeed affect the heart because of how **it** impairs blood vessel function. The researchers found blood vessels' ability to dilate was significantly reduced among people in the angry group compared with these in the control group. Blood vessel dilation was not affected in the sadness and anxiety groups. Dilation can be regulated by endothelial cells, which line the insides of blood vessels. By dilating and contracting, blood vessels slow down or increase the flow of blood to the parts of the body that need it. Further tests revealed that there was no damage to the endothelial cells or to the body's ability to repair any endothelial cell damage. The only issue was the dilation, the study found. Impairment of how blood vessels dilate is an early marker to atherosclerosis, which is the buildup of fats and cholesterol, called plaques, on artery walls that make the arteries stiff. Atherosclerosis can lead to coronary heart disease, heart attack, stroke and kidney disorders.

429.A significant reduction was observed in blood vessel dilation in the .....group compared to the control group.

a)sadness b)anxiety c)anger d)emotion

430.According to the results of the investigation, ...

a)managing anger may be crucial for healthy blood vessel function and reduction of the risk of heart-related issues

b)anger management techniques are less effective in preventing heart attack compared to other interventions

c)sadness and anxiety are more closely linked to heart health and anger, calling for immediate management
d)compared to the effects of the genetic factors, the impact of anger on heart health is negligible

431.The primary objective of the research by Columbia University and other institutions was to …… .
a)investigate the effects of various emotions on the heart rate
b)determine whether heart attack risk can stem from anger
c)study the impact of blood vessel dilation on blood pressure
d)examine the relationship between sadness and atherosclerosis

432.What does the underlined pronoun "it" refer to?
a)heart b)blood flow c)blood pressure d)anger

433.Impaired blood vessel dilation and the subsequent atherosclerosis …… .
a)can directly and immediately lead to heart attack and stroke
b)are both early markers for coronary heart disease and stroke
c)are unrelated to the risk of coronary heart disease and stroke
d)increase the risk of kidney disorders, leading to heart attack

---

"Vaccine hesitancy" is a relatively new term used in research over the past few years to describe anyone who is doubtful about vaccinations or who chooses to delay or refuse immunizations even when they are readily available. Although there are no federal laws in America regarding vaccine administration, each state has laws in place dictating which vaccines are required for children prior to entering schools. All 50 states allow medical exemptions for certain patients, such as those who are immune compromised or allergic to various vaccine components. Additionally, there are 30 states that allow exemptions for children whose parents cite religious reasons and 18 states that make special accommodations for those expressing philosophical reasons. States that have more lenient laws on vaccination requirements also have an increased rate of exemptions granted; **this** can lead to greater vulnerability in the population in terms of contracting preventable diseases. There have been a number of studies examining the reasons why parents refuse, delay, or are hesitant to vaccinate their children. In one such study, 77% of parents polled reported having concerns about one or more childhood vaccinations. Reasons expressed by parents vary widely but can be classified into 4 overarching categories. These categories are religious reasons, personal beliefs or philosophical reasons, safety concerns, and a desire for more information from healthcare providers. To equip pharmacists and other healthcare providers with an understanding of the most heavily cited reasons that influence parents not to vaccinate their children is crucial. This will better enable healthcare personnel to provide the education and awareness that patients' families need to make responsible immunization choices.

434.What does "Vaccine hesitancy" refer to?
a)Postponing or denying vaccines despite their availability
b)Observing federal laws regarding vaccine administration
c)Supporting mandatory vaccinations for children
d)Being allergic to various vaccine components

435.According to the text, medical exemptions are considered throughout the states for …… .
a)children whose parents are allergic to vaccines
b)patients with weakened immune system
c)philosophers with special ideology
d)religious people with beliefs against immunization

436.What does the underlined word "this" refer to?
a)decreased number of vaccination

b)enactment of strict laws
c)increased susceptibility to diseases
d)contracting preventable disease

437.All of the following are mentioned as reasons for vaccine hesitancy EXCEPT ……. .
a)religious reason
b)philosophical ideology
c)healthcare cost
d)insufficient information

438.What is the target of awareness raising program?
a)pharmacists
b)healthcare providers
c)healthcare personnel
d)families with safety concerns

"Living donation" is a complex therapeutic procedure, the responsibility for which is not only held by the patient requesting the transplantation, but is shared with the professionals performing the intervention. The professionals must assess whether the necessary technical and ethical requirements are met, and whether their participation in the intervention can be morally justified. The main ethical problem is to make sure whether it is morally justifiable to subject a health patient to a high- risk process so as to save a life or improve another patient's health. The main opposing argument is that the "non-maleficence" principle is violated even with the donor's consent. It is almost impossible to rule out a risk-free medical intervention, meaning that donor risks should be minimized so that the donor-recipient benefits overcome the risks. The donor's health status, the recipient's clinical situation, the surgical technique employed, and the surgical team's experience have an influence on transplant success probability; these are the factors for assessing the procedure's risk-benefit ratio and whether it can be ethically justified. Open nephrectomy donor mortality rate, as a case where the aforementioned factors are duly considered, is less than 0.03%, and the outcome and expected quality of life are similar to those of the general public. Furthermore, the introduction of minimally invasive surgical techniques (e.g. laparoscopic nephrectomy) has reduced post-operative morbidity, improving aesthetic results and shortening the time it takes for the donor to resume everyday activities. Nevertheless, the risks that the donor is subject to should be accepted by the scientific community, independently of the donor-recipient relation.

439.According to the passage, the ……..before performing a transplantation procedure.
a)risks should outweigh the benefits
b)patients should assess technical requirements
c)medical team should assess the ethical issues
d)the principle of non-maleficence should be violated

440.The donor's consent for living donation ……..the "non-maleficence" principle.
a)does not necessarily meet the requirements of
b)constitutes the main opposing argument against
c)eliminates the need for the observation of
d)violates the donor's ethical adherence to

441.Which of the following is in line with the author's view?
a)donation becomes morally justified only if an informed consent is obtained.
b)it is ethically justified to put a healthy patient at risk to save another's life.
c)an invasive technical procedure can determine the ethical issues.
d)the donor's and the recipient's health risks should be minimized.

442.All of the following has a role in minimizing the risks of living donation, EXCEPT for the …….
a)adopting minimally invasive surgical techniques
b)assessing the benefit-risk ratio
c)relying on the surgical team's experience
d)stressing the donor's moral beliefs
443.The author has mentioned "laparoscopic nephrectomy" to emphasize that ……. .
a)this surgical technique has enhanced the outcome of the surgery
b)it is ethically reasonable to adopt this technique for living donation
c)despite its minimal risk, the donor is highly affected by the procedure
d)if the donor and recipient are relatives, it is justifiable to use this procedure

---

Nanomedicine represents a growing field at the intersection of nanotechnology and medicine. One of the key applications of nanomedicine is in integrated drug delivery. Conventional drug delivery methods often suffer from limitations such as non-specific distribution, low bioavailability, and off-target effects. Nanoparticle-based drug delivery systems, however, can overcome these challenges by encapsulating drugs within biocompatible nanoparticles and guiding them to specific sites within the body. These nanoparticles can be engineered to target diseased tissues or cells, thereby enhancing therapeutic efficacy while minimizing systemic toxicity. Moreover, nanomedicine holds promise for improving imaging techniques in medicine. Nanoparticles with imaging agents attached can serve as contrast agents for various imaging modalities such as magnetic resonance imaging (MRI), computer tomography (CT), and fluorescence imaging. These nanoparticles enable high-resolution imaging of the biological structures and pathological changes, facilitating early detection and accurate diagnosis of diseases. Furthermore, nanomedicine offers opportunities for personalized medicine by tailoring treatments to individual patients based on their genetic makeup, physiological parameters, and disease characteristics. Nanoparticle-based diagnostics and therapeutics can be customized to target specific molecular signatures associated with particular diseases, enabling precise and effective interventions.

444.According to the passage, which of the following is NOT correct?
a) conventional drug delivery methods are often affected by imposed restrictions
b) nanoparticles can be modified to target diseased tissues or cells
c)one can treat individual patients through changing their genetic makeup
d)High-resolution imaging of biological structures is achieved through nanoparticles
445.According to the text, the future of imaging modalities is promising since …… .
a) the use of nanoparticles leads to high-resolution imaging
b) nanoparticles attach contrast agents to serve as imaging modalities
c)nanoparticles customize molecular signatures to effective interventions
d)therapeutic efficacy together with systemic toxicity are minimized
446.MRI, CT and fluorescence imaging are mentioned in the text as …… .
a) examples of imaging modalities in which nanoparticles induce better results
b) instances of high-resolution biological structures and pathological changes
c)means of facilitating pathological changes in the personalized medicine
d)cases of specific molecular signatures and drugs within biocompatible nanoparticles
447.According to the passage, nanomedicine contributes to personalizing medicine through …… .
a) standardizing treatment protocols for all patients
b) minimizing patient involvement in treatment decision
c) reducing the use of diagnostic imaging techniques
d)treating individuals with due consideration to human and disease

448.All of the following items can be used by nanomedicine to tailor treatments to individual patients <u>EXCEPT</u>…… .

a) physiological parameters
b) distribution of drugs
c) features of the disease
d) genetic structure

پنجشنبه عصر

Immunization is a paramount triumph in the realm of public health. It has been instrumental in preserving innumerable lives and substantially diminishing the impact of infectious maladies. The premise of immunization is straightforward: it entails introducing a debilitated or inactivated variant of a pathogen into the body to incite an immune response. This reaction subsequently leads to the production of antibodies, which can combat future infections by the same pathogen. Edward Jenner, a British physician, is often praised for developing the inaugural vaccine. In 1796, he discerned that milkmaids who had contracted cowpox were immune to smallpox, a lethal disease prevalent at the time. He postulated that the cowpox virus could confer immunity against smallpox. To corroborate his theory, Jenner inoculated a boy with cowpox pus and later exposed him to smallpox. The boy remained healthy, validating Jenner's hypothesis and paving the way for contemporary immunization. Vaccines have since been pivotal in controlling, and in some instances eradicating, numerous infectious diseases, for instance, extensive immunization campaigns culminated in the global eradication of smallpox in 1980. Similarly, polio, once a significant cause of disability and mortality. is now on the edge of eradication as a result of efficacious vaccines. Nonetheless, despite their proven efficacy, vaccines have been the subject of controversy and misinformation, Vaccine hesitancy, largely fueled by unfounded apprehensions and misconceptions, poses a significant threat to public health. It is imperative to remember that the benefits of immunization far outweigh the risks. Vaccines safeguard not only individuals but also communities by preventing the spread of infectious diseases.

449.According to the passage, Edward Jenner is often praised for……

a) eradicating smallpox
b) discovering the cowpox virus
c) developing the first vaccine
d) introducing the concept of immunization

450.According to the text, Jenner inoculated the boy to ……

a) validate his theory
b) pave the way for modern immunization
c) help him recover from cowpox
d) help milkmaids with cowpox

451.According to the passage, ……. is NOT a result of immunization.

a) preventing infectious diseases
b) eradicating certain diseases
c) propagating vaccine hesitancy
d) safeguarding against infectious pathogens

452.According to the passage, a special explanation of vaccine hesitancy is needed because it……

a) is a recent phenomenon that has not been thoroughly studied
b) acts as a complex issue that cannot be easily comprehended
c) is a contentious topic that converges public opinion
d) presents a substantial risk to public health

453.Why does the author mention the expression 'unfounded apprehensions and misconceptions' in the passage?

a) To highlight the public understanding of vaccines
b) To criticize the reasons for vaccine hesitancy

c) To discuss the side effects of vaccines
d) To argue against the use of some vaccines

Most chemotherapy treatments are given systematically, meaning they impact the entire body. Antibody-drug conjugates deliver high doses of medicine directly to cancerous cells, which can help protect other cells in the body from the effects of chemotherapy. This, in turn, can reduce drug side effects and result in potentially more effective treatment. Funda Meric-Bernstam, MD, chair of the Department of Investigational Cancer Therapeutics at the MD Anderson Cancer Center at the University of Texas, told us that antibody-drug conjugates essentially work like this: An antibody that targets cancer cells is connected via a "linker" protein to a cancer-killing drug such as chemotherapy. When the medication is administered to a patient intravenously, **it** goes to the targeted cancer site, killing the cancerous cells without harming the non-cancerous ones. "Because this is more targeted therapy, we can give higher amounts of chemotherapy to the cancer cells," Meric-Bernstam said. "And, what's really exciting is that the new chemotherapy classes that are being developed are a lot more potent. Thus, with antibody-drug conjugates, we can give a lot higher concentrations of chemotherapy to the cancer cells than we would be able to if we delivered it through conventional chemotherapy IV, where all cells would see the same amount of the toxic agent." What's more, Meric-Bernstam said that newer generations of antibody- drug conjugates were also able to affect the neighboring cancer cells around a targeted tumor. This creates a "bystander effect that can make the drugs more impactful.

454.The main idea of the passage could be …… .
a)implementing systemic treatments in cancer therapy
b)promoting antibody- drug conjugates as a promising advancement
c)discussing various chemotherapy treatments and their effectiveness
d)showing the superiority of chemotherapy treatments over targeted therapies

455.As to antibody-drug conjugates, linker protein …….. .
a)directly kills cancer cells
b)enhances the side effects of chemotherapy
c)connects the antibody to the cancer-killing drug
d)delivers the chemotherapy agent to non-cancerous cells

456. About the potential impact of antibody-drug conjugates on future cancer treatments, it can be inferred that they …… .
a)may be effective for just few types of cancer
b)might result in decreased survival rates for cancer patients
c)could improve cancer therapy by reducing side effects
d)may lead to an increase in the use of conventional chemotherapy

457.The underlined pronoun "it" refers to ……. .
a)linker b)antibody c)cancer d)protein

458.When antibody-drug conjugates are used, the ……. allows for the delivery of higher concentrations of chemotherapy?
a)use of a different administration route
b)inclusion of fewer drugs in the treatment
c)reduction of chemotherapy concentrations
d)development of stronger chemotherapy classes

Public health, an interdisciplinary field dedicated to enhancing the health status and well-being of communities, is profoundly influenced by lifestyle determinants which encompass dietary habits, physical activity levels, and personal habits such as tobacco use and alcohol consumption. Each of these factors

can either bolster health or precipitate diseases. A balanced diet replete with fruits, vegetables, lean proteins, and whole grains can mitigate the risk of chronic diseases such as cardiovascular disease and diabetes. Regular physical activity not only contributes to maintaining a healthy weight but also reduces the risk of various health conditions, including hypertension and osteoporosis. Conversely, detrimental habits such as smoking and excessive alcohol consumption can endanger a range of health problems, including respiratory diseases and hepatic damage. Despite the clear link between lifestyle and health, implementing changes on a large scale can be challenging due to factors such as socioeconomic disparities, cultural differences, and lack of access to health-promoting resources. Therefore, public health professionals must employ a multifaceted approach, addressing these barriers and tailoring interventions to the specific needs of different communities. Public health initiatives often focus on promoting healthy lifestyle choices to improve population health. However, the success of these initiatives is contingent upon their ability to effectively address the complex interplay of factors that influence lifestyle choices. This underscores the need for comprehensive, context- specific strategies to promote health and prevent disease in diverse populations.

459.The passage mainly.....

a) discusses the impact of lifestyle on health and maintaining healthy choices
b) criticizes public health initiatives for excessive focus on lifestyle determinants
c) argues against the importance of some lifestyle determinants in public health
d) elucidates the etiologies of hypertension and osteoporosis

460.The challenges related to promoting healthy lifestyle choices are best described by the .....

a) lack of public health initiatives
b)economic inequity and cultural diversity
c) differences in dietary habits and physical activity levels
d) lack of professional interventions in public health

461.The author mentions 'context-specific strategies' in the passage to suggest that .....

a) all communities face the same. Barriers to implementing healthy lifestyle choices
b) health strategies should be customized for each community's unique needs
c) public health initiatives should have the same strategies for all communities
d) lifestyle determinants totally overlap in various communities

462.The passage implies that a multifaceted approach is needed in public health because.....

a) chronic diseases such as heart disease and diabetes are becoming more prevalent
b)respiratory diseases and liver damage are common health problems in many communities
c) lifestyle determinants alone are not enough to improve the health status and well-being of communities
d) economic situations, culture, and health resources hindering lifestyle adoption are different in various societies

463.According to this passage,.....

a) public health initiatives should employ professionals developing multifaceted strategies worldwide.
b) having a healthy diet and physical activity as well as avoiding alcohol and tobacco all promote health status.
c) a one-dimensional measure addressing specific features of a community should be developed
d) strategies to remove cultural and social variations is the best approach to promote health status of societies.

With the never-ending debate over whether adults should be consuming milk at all, the question remains: Are adults shifting their drinking habits or sticking with traditional milk? According to a new poll of 1,746 US adults, 15.52% of respondents said they still tended to drink some type of milk at least occasionally. Yet, 31% rarely or never drank any type of milk. Interestingly, whole milk and 2% cow's milk emerged as

the top choices preferred by 32% and 22% of respondents, respectively. On the other end of the spectrum, only 9% of the respondents opted for plant-based milk, with 54% favoring almond milk, followed by 24% choosing oat milk. Although milk offers nutritional and health benefits, there exist a variety of reasons why some adults do not drink any type of milk. The respondents who do not drink milk, express they do not like the taste of milk, and have allergy or digestive issues, such as lactose intolerance, when consuming milk. As for the taste of regular milk, even though the flavor is very mild, some people might find it unappealing. This dislike is related to the consistency, which is generally creamier than other beverages like water, tea or coffee. Additionally, given that as most people age they have a harder time digesting dairy products, this number appears lower than expected. In fact, about 36% of Americans and 68% of people in the world experience lactose intolerance. While milk is not considered essential for a well-Balanced diet, all milk variations offer valuable nutrients.

464.What portion of adults in the US occasionally drink some kind of milk?

a) Less than one-tenth b) Nearly half

c)Less than one-fourth d) Almost two-thirds

465.Which of the following is true?

a) Type of milk matters to grownups.

b) Milk is necessary for a well-balanced diet.

c) Hot milk does not cause enjoyment.

d) Drinking milk treats lactose intolerance

466.Among those who prefer non-dairy milk, what's the most favored kind?

a) Oat milk b) Almond milk

c) traditional milk d) mixed plant-based milk

467.What is a common reason why some adults do not drink any milk?

a)They're allergic to plants like oat.

b) the smell of milk.

c) Milk upsets their stomach.

d) Other beverages are more nutritious.

468.Roughly what percentage of Americans suffer from lactose intolerance?

a) About 5% b) Around 20% c) Nearly 40% d) Over 60%

جمعه صبح

I certainly think artificial intelligence (AI) will have an impact by shifting how editors work. I suspect there will be a natural migration away from the less judgment-based work of “error checking” towards the more nuanced, involved work of refining and enhancing text. Yet, this doesn’t necessarily mean that traditional proofreaders will be out of their profession. Proofreading is about much more than “error checking” and requires intensely refined judgment at a point in the editorial workflow where the scope for changes is often very limited. Overall, AI will have a positive effect in the long term on our work by allowing us to be more efficient and thereby freeing us up to provide more of the gloriously messy human mix of spontaneity and personal experience that leads to great creative collaborations. It is noteworthy that AI tools, such as ChatGPT, cannot truly create but just *predict* based on what they have learned from available text. The most important thing for us to do as editors is to educate ourselves about AI; however, reading about its new and ever-increasing capabilities involves a lot of mental flinching. But it’s important to set aside this fear and learn how to work with AI. If we ignore its possibilities, we only increase our chances of being replaced. In contrast, if we make it a part of our team, we might be able to focus more on the meaningful editing we love, supported by our very own AI- powered editorial assistant. Most of all, in quintessentially human activity of communication, humans always prefer to work with other humans.

469.What does the writer imply by "natural migration"?
a) Moving gradually from traditional proof reading to AI proof reader technologies
b) Putting away traditional AI proof readers and replacing them by AI technologies
c) Shifting fast from judgment-free proof reading to AI powered technologies
d)Shifting from a demanding job to one with a glorious free time

470.Why does the writer use "refined judgment"?
a)To emphasize the creativity of human proofreaders
b)to justify the use of AI proofreading technologies
c)To indicate AI cannot judge appropriately when facing errors
d)Judgment is required to see whether the articles are within the scope of journal

471.Creative collaboration refers to co-working between ……. .
a)authors and proofreaders
b)human proofreaders
c)AI and human proofreaders
d)editors and authors

472.What is the main reason for the fear of AI technology?
a)it is not creative
b)it replaces humans
c)it does not have refined judgment
d)it can predict the future with data

473.What does the author suggest editors should do in response to the emergence of AI?
a)provide AI with more glorious and human-like experience
b)accept its possibilities and integrate it into their workflow
c)ignore its capabilities and continue working hard as usual
d)set AI aside in order to avoid being replaced by it

There are some downsides to early screenings. Patients in their 40s who elect to get a screening mammogram have a higher rate of false positives, says Klar. "In other words, a finding that leads to further workup, such as additional imaging and potential biopsy, that ends up being benign- meaning noncancerous. These false positive findings can be stressful and anxiety-provoking for patients." Overdiagnosis- also referred to as overdetection and defined as the detection of tumors that would not become symptomatic or life-threatening- is another possible risk, says Shepherd. A systematic review and meta-analysis of 30 studies published in the Journal of Personalized Medicine found that overdiagnosis due to screening mammography for breast cancer occurred in 12.6% of women aged 40 and older. However, researchers from Yale School of Medicine's Copper Center point out that older women in particular- aged 70 and above- are more likely to be at risk of overdiagnosis with **it**. "The risks of screening are nonlethal and manageable for most women," Dr. Debra L. Monticciolo, professor of radiology at Dartmouth Geisel School of Medicine in Hanover, N.H., stated in a press release on Feb 20. "But advanced breast cancer is often lethal. Breast cancer is easier to treat if it's found earlier; we're able to spare women extra surgeries and chemotherapy. It's just a better idea to shift to early detection, and that's what screening does."

474.Which of the following questions does the text mainly deal with?
a)What does recent research say about screenings?
b)Why should women get screening mammograms?
c)Are the benefits of early screenings greater than the risks?
d)Do individuals aged 70 are mostly at risk of overdiagnosis?

475.What does the underlined pronoun "it" refer to?

a)Breast cancer b)Screening mammogram
c)COPPER Center d)Potential biopsy

476.Older women, particularly those aged 70 and above, are more susceptible to overdiagnosis because …… .
a)their anxiety and stress lead to false positives
b)they have a higher prevalence of cancerous tumors
c)screening methods are less effective in this age group
d)non-symptomatic tumors are more likely to be detected

477.As to early detection of breast cancer, Dr. Monticciolo's statement implicitly ……. .
a)warns against the potential harm of screening mammography
b)expresses doubts about the effectiveness of early detection methods
c)suggests that advanced breast cancer is easier to treat than early-stage cancer
d)reinforces the shift of focus to early detection despite potential risks

478.The text implicitly ……regarding early breast cancer detection.
a)emphasizes the need for better management of false positives
b)advocates a shift towards more aggressive screening methods
b)suggests avoiding early detection methods due to potential risks
d)suggest that early detection should be abandoned in favor of other approaches

---

Nutrition-related risk factors are linked to both acute and chronic diseases, contributing significantly to a large burden of preventable non-comminicable diseasesand increasing the risk of premature death. Within healthcare, we are facing the triple burden of malnutrition, comprising three overlapping themes of overnutrition, undernutrition, and micronutrient deficiencies. In 2019, the UK's National Health Service (NHS) published a "long-term-plan" which calls for a greater focus on prevention of disease and public health. As such there is commitment to improving obesity and diabetes prevention services, alongside reducing health inequalities. Clause 2.19 explicitly states "frontline staff need to feel equipped to talk about nutrition and maintaining weight in an informed and sensitive way", yet some medical schools have at most **eight hours of nutrition training**. Around 10% of adults visiting their general practitioners and a third of patients on admission to hospital or care homes are undernourished or at risk of undernurishment, but this remains poorly recognized and addressed within primary or secondary care settings. Further to this, the latest UK National Diet and Nutrition Survey reveals deficiencies across all age groups in iron, vitamin D, and folate, increasing popultion risks of anemia, osteoporosis and neural tube defects in pregnancy. The economic consequence of undernutrition was estimated to cost UK £19.6 billion in 2011-2012. This equates to 15% of the total expenditure on health and social care, meaningthat a 1% reduction in expenses corresponds to a saving of £196 million. Conversely, NHS England spent £6.1 billion for obesity-related issues from 2014 to 2015.

479.The plan recently published by the NHS ……. .
a)gives priority to disease prevention measures
b)minimizes population risks of anemia
c)is to foster health inequalities
d)is to invest more on treatment

480.The triple burden of malnutrition …….. the healthcare system.
a)is already managed successfully by
b)would impose significant pressure on
c)could hardly affect the resources from
d)finds its root inn communicable diseases

481.The writer has mentioned the expression "eight hours of nutrition" to suggest that …… .

a)the issue of nutrition has been well addressed by medical schools
b)future doctors are not well informed about the issue of nutrition
c)academic programs have been revised to focus on nutrition
d)Britian's long term plan on nutrition has been successful

482.The burden of those suffering from undernourishment is ……. .
a)totally reported by general practitioners and hospitals
b)always acknowledged within care homes
c)less recognized within the healthcare settings
d)rejected by hospitals and care homes

483.The latest survey conducted in the UK has reported all of the following defects during pregnancy Except for ……..
a)osteoporesis b)anemia c)bronchitis d)neral tube

Mental health and well-being of employees have become an increasing concern among employers, especially during the COVID-19 pandemic when the results of a survey highlighted poor mental health symptoms among workers, including heightened feelings of guilt (24%), insomnia (38%), irritability (50%), sadness (53%), and emotional exhaustion (54%). The direct and indirect impacts of such conditions may be worth considering. For instance, depression was estimated to cost the US economy $210 billion, with about half that sum paid for employers. Around 60% of the cost of depression is directed at treating comorbid conditions like cardiovascular diseases and diabetes. On the other hand, indirect costs add to lost productivity, for instance through absenteeism (when employees have an unscheduled absence) and presenteeism (when they are at work, but they aren't actually working). In 2010, the indirect annual costs of poor mental health due to these effects was estimated to be $1.7 trillion; also, the direct costs added an additional $0.8 trillion, both expected to double by 2030. Employers feel debilitated in encouraging their employees to benefit counselling services due to the predominant stigma related to mental health conditions, which hampers sufferers from seeking help of employee assistance programs which are still underutilized. Coworkers' discriminatory behavior and fear of social exclusion add to the severity of the condition, and leads to undesirable impacts on employee performance and interpersonal relationships at workplace.

484.According to the passage, the highest and lowest rate of mental health symptoms belonged to ……., respectively.
a)emotional exhaustion and feelings of guilt
b)insomnia and irritability
c)sadness and feelings of guilt
d)emotional exhaustion and irritability

485.American employers are estimated to have spent around 105 billion USD to ……. .
a)benefit counseling services b)address employee depression
c)manage the employee program d)cure insomnia, sadness and irritability

486.According to the passage, both direct and indirect costs …….. .
a)were considerably decreased during the COVID-19 pandemic
b)were reduced by half by the employers
c)will increase twofold by the end of the present decade
d)were directly targeted to the employees

487.According to the passage, total cost of poor mental health was estimated to reach ……in 2010.
a)0.8 trillion USD b)1.7 trillion USD
c)2.5 trillion USD d)210 billion USD

488.What prevents employees from seeking help through employee assistance programs?

a)Fear of losing their jobs
b)Absence of financial resources
c)Lack of employee counseling services
d)Feeling embarrassed about their mental health status

جمعه عصر

Cancer, a group of diseases characterized by the uncontrolled growth and spread of abnormal cells, has been a persistent global health challenge. Despite advancements in medical technology and treatment methods, the incidence of cancer continues to escalate worldwide. This rise can be attributed to various factors, including lifestyle changes, environmental factors, and genetic mutations. The proliferation of unhealthy lifestyles, such as tobacco use, unhealthy diets, and physical inactivity, has contributed significantly to the global cancer burden. These lifestyle factors can lead to the accumulation of genetic mutations in cells, eventually triggering the development of cancer. The rise in sedentary lifestyles and consumption of processed foods has further exacerbated **this issue**, leading to an increase in obesity-related cancers. Environmental factors, including exposure to harmful chemicals and radiation, also play a pivotal role in the rise of cancer cases. Prolonged exposure to these harmful elements can significantly damage the DNA in cells and lead to mutations that cause cancer. Industrialization and urbanization have led to increased exposure to environmental pollutants, contributing to the small increase in cancer cases, Genetic mutations, both inherited and acquired, are at the core of cancer development. While inherited genetic mutations play a significant role in certain types of cancer, acquired mutations due to exposure to carcinogens or lifestyle factors are far more common. Despite these challenges, advancements in medical research and technology have led to improved cancer detection and treatment methods. However, the accessibility and affordability of these treatment remain a significant barrier, particularly in low and middle-income countries. The disparity in access cancer care between developed and developing countries further compounds this problem.

489.Which of the following best describes the main idea of the passage?
a)Cancer is primarily caused by inherited genetic mutations.
b)The accessibility and affordability of cancer treatments are not a significant issue.
c)The global cancer burden is decreasing due to the medical technology advancements.
d)Global cancer increase is due to lifestyle, environmental, and genetic changes.

490.As to the role of genetic mutations in the development of cancer, the author suggests that ……
a)Genetic mutations are the sole cause of all types of cancer
b)Both inherited and acquired genetic mutations are at the core of cancer development
c)acquired genetic mutations are the sole contributors to the development of cancer
d)Genetic mutations play a minor role in the development of cancer

491.Cancer detection and treatment are…….
a)Accessible and affordable to all countries worldwide
b)Limited to underdeveloped and developed countries
c)Not a significant issue in the fight against cancer
d)Viewed as significant obstacles in low- and middle-income countries

492.According to the passage, the increase in cancer cases is significantly impacted by……
a)Lifestyle changes specific to industrialized countries
b)genetic mutations rooted in environmental pollutants
c)Prolonged exposure to harmful chemicals and radiation
d)Advancements in medical research and technology

493.The expression ‘this issue’ refers to….

a) sedentary life
b) eating fast foods
c) cancer development
d) genetic mutation

Every year, medical schools globally face the challenge of selecting a handful of candidates from a large pool of eligible applicants, a process crucial and consequential for public health. Thus, apart from cognitive ability, selection criteria include character attributes, such as altruism, empathy, reliability, communication skills, etc. Validating the selection process involves a lengthy follow-up as graduates integrate into the medical workforce and practice over subsequent years. Attempts to validate the admission process are presented extensively in the literature that focuses on students' achievements in admission tests, through their years of study, and in their final examinations, evidencing a direct correlation between admission scores and academic achievements in the following years. In contrast, evidence for the reliability of interviews and other humanistic models is limited, with their ability to examine personal qualities or predict academic achievements and clinical performance not firmly established.

To address limitations in medical school admission processes, some institutions integrate pre-medical studies, which are an educational, academic track that qualifies students and facilitates their subsequent selection into a medical school. The pre-medical track offers courses on core subjects that prepare students for medical studies. **These** include topics for allied health professions, community involvement, clinical experience, and research experience. Some pre-medical programs provide broad-based preparation for professional tracks and can prepare students for entry into a variety of primary professional programs or graduate degrees with similar prerequisites (including schools of medicine, veterinary medicine, and pharmacy.) Most studies show a positive correlation between student achievement in pre-medical programs and their achievements through their years in medical school.

494.The reliability of students' admission interviews ……. .

a) has been well established
b) needs to be further investigated
c)is already used to monitor students' success
d)highlights the importance of clinical performance

495.The text mainly discusses the relationship between admission scores and the quality of students'…….

a) academic performance
b) community involvement
c)clinical experience
d)research experience.

496.The text ……. link between students' pre-medical studies and their upcoming performance in medical schools.

a) refers to a satisfactory
b) challenges any meaningful
c) fails to address the existing
d)is critical of studies investigating the

497.Pre-medical studies can be integrated into the medical school admission process to…….

a)get rid of admission tests
b)conduct clinical performance.
c)elevate pre-medicine education
d)improve admission processes

498.The underlined word "These' refers to……

a)Pre-medical studies
b)Institutions
c)Courses
d)Medical studies

While most people know that the flu virus can lead to other health complications, such as pneumonia, recent research reveals that the flu, a common contagious respiratory illness caused by influenza viruses, can also increase the risk of heart attack and stroke. According to a study in 2023, adults aged 50 and older who had even a mild case of **that** were shown to have double risk of suffering a heart attack or ischemic stroke within two weeks after catching the virus. This likelihood quadrupled in adults with

preexisting health conditions who dealt with a severe case of the flu, with their risk lasting up to two months post-infection. Likewise, a 2020 study conducted by the Centers for Disease Control and Prevention (CDC), which involved more than 80,000 adults hospitalized with the flu, reported that I in 8 patients had an acute cardiac event, such as acute heart failure or acute ischemic heart disease. Also, another study in 2018 found a significant association between the flu and acute myocardial infarction, otherwise known as a heart attack, where adults were six times more likely to have a heart attack within one week after catching the flu. According to the CDC, there were an estimated 25 million to 46 million cases of the flu between October 2023 and February 2024, while heart disease continues to be the leading cause of death for men and women. However, the promising news is that preventive measures can be taken to help ward off the flu while also boosting cardiovascular health. For starters, practicing healthy lifestyle behaviors throughout the year can be a highly effective strategy.

499.The passage mainly ……..

a)describes the difference between the flu, pneumonia and heart attack
b)indicates the association between the flu and heart conditions
c)compares the flu and its complications with stroke
d)shows the effects of the influenza on stroke

500.According to the passage, the flu …….. .

a)causes the same degree of heart attack in all adults
b)is limited to individuals with a history of heart attack
c)does not develop into a heart attack among the young adults
d)increases the risk of ischemic stroke in adults aged 50 and over

501.The underlined word "that" in the passage refers to….

a)Health complication b)Ischemic stroke
c)Heart attack d)the flu

502.Which of the following is TRUE according to the passage?

a)Unlike the flu, the heart attack was decreasing from 2023 to 2024.
b)The probability of a heart attack may continue over life following the flu.
c)Patients in all three reported studies were at risk of developing a heart condition.
d)All studies report the number of infected individuals at the risk of heart attack.

503.According to the passage, ……

a)the CDC promises to prevent the flu effectively in a year
b)yearly lifestyle changes improve adults' cardiovascular condition
c)a lasting healthy lifestyle helps prevent the flu and heart conditions
d)promising news throughout the year improves cardiovascular condition

---

Despite advances in medicine, racial, ethnic, and socioeconomic disparities in chronic disease prevention and management persist. In the health care sector, social determinants of health have increasingly become part of the conversation around reducing health disparities. **This** makes sense given that social determinants account for 50% of health outcomes, whereas medical care only accounts for 20% (health behaviors account for 30%). Multi-level, multi-sector, and multi-system efforts are needed to address health inequities. Behavioral medicine can help inform these efforts. However, as behavioral medicine researchers and practitioners, we must:1) understand the details in the different terminology that is used related to social health as it has implications for study design and level of impact, and 2) do a better job at incorporating social health-related measures in behavioral medicine research. The goals of this article are to explain the difference between social determinants of health, social risk factors, and social needs as well as provide a brief overview of available measures that can be used to assess these constructs in future research.

504.The health care system……..ethnicity-related differences in preventing and managing chronic disease.

a)is discussing ways to decrease
b)has already intended to resolve
c)denies the presence of
d)owes its existence to

505.The underlined word "This" refers to…….

a)Racial, ethnic, and socioeconomic disparities existing in the prevention of chronic diseases
b)Inclusion of social determinants of health in discussions of decreasing the health disparity
c)Advances in medicine as regarded by behavioral medicine researchers and practitioners
d)The attempts to address the inequities practiced in the health sector by authorities

506.Health authorities are required to seek help from ……. if they are to resolve health inequities.

a)their own resources
b)behavioral researchers
c)numerous sectors and systems
d)medical practitioners'

507.The text asks behavioral medicine researchers and practitioners to ……. and perform better scholarly research.

a)increase the 20% share of medical care outcome
b)understand the small differences in terminologies
c)assess the accuracy of 50% health outcomes.
d)do more regardless of multi-system efforts

508.Advances in medicine ……. chronic diseases across different racial, ethnic, and socioeconomic groups.

a)has resulted in proper management and prevention of
b)has failed to manage and prevent chronic diseases
c)unexpectedly serves as a barrier in preventing
d)accounts for unjust management of
